(SDW)

OPERATION AND MAINTENANCE, AIR FORCE INTRODUCTORY STATEMENT

The Operation and Maintenance, Air Force appropriation supports combat readiness and sustainability of Air Force operations through the financing of the day-to-day costs of operating and maintaining the Air Force (excluding military pay and allowances). This appropriation provides the money needed to buy fuels, lubricants and expendable parts for aircraft, missiles, and vehicles. It is also used to support space programs, maintain runways and facilities, operate the physical plants, train and provide health care to personnel, pay civilian employees, maintain worldwide communications and to support combat related activities such as intelligence, logistics, weather, air traffic control, and search and rescue operations. to 8.1

The Operation and Maintenance (O&M) appropriation is the backbone of readiness. Approximately 85 percent of the O&M budget is for fixed, must pay bills that cannot be reduced in the short term: flying hours and training, weapon system support and maintenance, civilian pay, equipment and facility maintenance, and contract operations. The appropriation is priced based on programmed force structure and operating activity levels such as flying hours, deployments, workyears, and scheduled weapon system maintenance. O&M resources must be sufficient to support the force structure and to sustain a mission ready force of existing weapon systems as well as field new or modernized systems on schedule. It must be balanced, affordable, and executable given the mission objectives and taskings.

Even the most technologically advanced weapon systems require sufficient O&M funding to perform their mission. From a historical perspective, the military capability of a nation has been measured in terms of troop strengths and quantities of hardware, ignoring the readiness element. From our own experiences of the 1970s, hardware was emphasized over support, leading us down the path to a hollow force. The period of the 1980s has been one of building, not only in terms of quantity, but also quality. Readiness, reliability, and maintainability became Air Force watchwords. The hollow force of the seventies faded and we fielded the most up-to-date, technologically capable Air Force in the world.

Today, there are disturbing signs on the horizon. The results of the FY 1988 Congressional actions have challenged the Air Force capabilities to maintain its current state of readiness. The FY 1988 Congressional reductions were an outgrowth of deficit reduction through outlay control which focused on the fast spending appropriations such as O&M and Military Personnel. This resulted in a negative 10.5 percent real growth to O&M, Air Force. Actions were taken to minimize the impact of these reductions on our ability to carry out our war fighting mission. These actions, while creating considerable turmoil in the commands, were accommodated in the near term mainly through increased weapon systems and facility

maintenance backlogs and civilian personnel management actions. However, it is already clear that further realignment of O&M funds will be required to solve a critical medical shortfall.

The Air Force made a conscious decision to submit a balanced FY 1989 Air Force budget. Force structure was reduced, dollars were focused into logistics and readiness areas, and O&M was properly priced to support the force structure. While still operating in a constrained funding environment, the Air Force will be ready and able to do its mission.

The Operation and Maintenance, Air Force, FY 1989 request is \$21,950 million. The projected real growth from FY 1988 to FY 1989 is 6.7 percent. However, this growth is misleading. As stated earlier, the results of the FY 1988 Congressional reductions have challenged our capabilities to maintain our current state of readiness. When considering the nearly \$2 billion in refunds in FY 1987, (which added to our buying power), and the \$1 billion in programs that transferred to O&M in FY 1988, the \$1.7 billion Congressional reduction resulted in a negative real growth of 10.5 percent from FY 1987 to FY 1988. This bad situation was made worse by Congressionally directed refunds that could not be completed by the respective stock funds, by the Congressionally directed absorption of the civilian pay raise, and by unanticipated increased CHAMPUS and fuel costs. Although there is positive real growth from FY 1988 to FY 1989, there is still a negative 3.7 percent real growth from FY 1987 to FY 1989. The Air Force has made a conscious decision to rectify the FY 1988 imbalance by reducing force structure and properly pricing the O&M programs necessary to support this force structure. The following pages provide detailed O&M, AF budget data by Major Force Program for FY 1987-1989.

FORCE PROGRAM 1: STRATEGIC FORCES

I. DESCRIPTION OF OPERATIONS FINANCED:

The resources requested for Strategic Forces provide for mission operations in two major categories - strategic offensive and strategic defensive. These forces ensure credible strategic deterrence in support of national policy through the development and maintenance of a ready, effective and survivable nuclear force which has and is perceived to have the selectivity, redundancy, and flexibility to respond in a timely manner to any level of aggression.

Resources provide for offensive and defensive forces in support of national policy to ensure strategic deterrence and aerospace warning and defense against potential aggressors. This is accomplished through operations, field maintenance, training, and personnel support; strategic offensive aircraft squadrons consisting of B-1Bs, B-52s, FB-111s, SR-71s, EC-135s, and KC-135s; nuclear gravity bombs and Short Range Attack Missiles (SRAM); deployment of cruise missiles with the B-52 force; all Intercontinental Ballistic Missiles (ICBMs) (Peacekeeper, Minuteman II, and III); air defense aircraft squadrons (F-15); air defense surveillance and warning radars such as Distant Early Warning/North Warning System and long range radars; ballistic missile/space surveillance and warning sensors such as EBWES and SPACETRACK.

Strategic Offensive Forces are those of the Strategic Air Command (SAC) consisting of combat aircraft, intercontinental ballistic missiles and command, control and communications systems. SAC's primary mission is to deter war through its ability to deliver the major portion of the Free World's nuclear firepower to any part of the globe. SAC's ground alert bombers and tankers can be airborne and secure in the event of a surprise attack within the warning time provided by surveillance and warning systems. SAC's global command control and communication systems ensure warning of attack and positive control of the Strategic Offensive Forces.

The Strategic Air Command administers, trains and equips an offensive force prepared to conduct aerospace operations on a global basis and is responsible for maintaining a capability to conduct conventional (non-nuclear) bomber operations and other selective collateral missions. SAC controls operations that include two numbered air forces, 12 air divisions, 30 aircraft wings/groups, and eight missile wings.

Strategic Air Command (SAC) offensive forces consist of B-1B, B-52, FB-111, SR-71, EC-135, and KC-135 aircraft and Minuteman II, Minuteman III and Peacekeeper Intercontinental Ballistic Missile (ICBM) systems. SAC also employs Air Launched Cruise Missiles (ALCM) and Short Range Attack Missiles (SRAM) with the bomber forces.

FORCE PROGRAM 1: STRATEGIC FORCES

Strategic Defensive Forces are those of the Space Command (SPACECMD), Tactical Air Command (TAC), and the Alaskan Air Command (AAC). These forces include: supersonic interceptors, atmospheric/space/missile warning detection systems and associated command and control.

The Defensive Forces are provided by the United States Air Force to the Unified Space Command and the combined United States-Canadian North American Aerospace Defense Command (NORAD) which have the responsibility for detection, identification, interception, and destruction of any forces involved in an aerospace attack on the North American continent. SPACECMD, TAC and AAC administer, train and equip Air Force aerospace defense forces to be combat ready and responsive to the operational requirements of the Commander-in-Chief, NORAD and USCINCSpace.

Alaskan Air Command (AAC) responsibilities within the control and warning system include atmospheric radar surveillance of the 596,000 square miles of Alaska. The AAC electronic alerting system includes the operation of 13 aircraft control and warning squadrons under the operational control of a Region Operations Control Center (ROCC).

Tactical Air Command (TAC) provides a combat readiness level for the NORAD for all Air Force surveillance, warning and control systems such as the Joint Surveillance System, the Distant Early Warning (DEW) Line, North Warning System and the dedicated air defense interceptors.

Space Command (SPACECMD) maintains the Ballistic Missile Early Warning System (BMEWS) and the Submarine Launched Ballistic Missile Warning System. SPACECMD also maintains the SPACETRACK system, the United States Air Force element of NORAD's Space Detection and Tracking System (SPADATS), which maintains and catalogues all man-made objects in space and provides a capability for radar signature threat analysis to the National Command Authorities (NCA), the Joint Chiefs of Staff and US Intelligence Community. SPACECMD also provides trained and equipped forces for CINCNORAD's and USCINCSpace's space surveillance and missile warning mission. These systems assist in deterring attack on the U.S. by providing the NCA, Strategic Air Command and other Unified and Specified Commands, early tactical warning to permit responsive posturing of allied strategic offensive forces.

U.S. Space Command (USSPACECOM) centralizes operational responsibilities for space communications, weather forecasting, navigation, surveillance and warning systems while assuming current Air Defense missions and new space control and space operations missions.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Offensive Aircraft

I. NARRATIVE DESCRIPTION:

This activity group supports strategic offensive heavy bomber (B-2, B-1B, and B-52), medium bomber (FB-111), tanker (KC-135), and strategic reconnaissance (SR-71) aircraft squadrons, wing headquarters, field and organizational level maintenance and aircrew flying training. The requested funds will provide for maintaining the readiness of strategic deterrent forces and for countering projected growth and improvements in hostile capabilities. This deterrent capability includes bombers for highly accurate weapons delivery, air refueling and surveillance missions in support of National Command Authorities and Single Integrated Operational Plan requirements.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for pay of civilian personnel, aviation fuels, supplies and equipment and costs associated with wing headquarters, organizational and field level maintenance and the conduct of combat crew training to achieve and maintain proficiency. The objective is to maintain strategic offensive aircraft forces at a high level of readiness.

FORCE PROGRAM I: STRATEGIC FORCES

\$+139,512

10. Program Increases

a. AVPOL/Flying Hour Supplies.....	\$+62,972
------------------------------------	-----------

Restores the Strategic Air Command hours-per-crew/per-month to FY 87 levels.

b. B-2 Expansion (FY 88, Base \$0).....	\$+45,162
---	-----------

B-2 Justification available through classified channels

c. B-1B Sustaining Engineering(FY 88, Base \$124,208)	\$+18,436
---	-----------

The increase will fund the following vital engineering requirements:

(1) Avionics/Electronics Upgrade..... \$+5,340

Engineering support will provide investigative analysis and feasibility studies to determine interface requirements, communication levels, and improve the effectiveness of the communication system.

(2) Operational Flight Program Support..... +6,000

Engineering laboratory support will be provided to correct and test Offensive Avionics System deficiencies. This task will support the Software Development System and radar tower test facility.

(3) Offensive Radar System Flight Test..... +1,800

Engineering support will provide configured flight test and engineering support to investigate and identify anomalies and verify problem solutions.

(4) Integrated Support Facility Software..... +5,296

Engineering support will provide for investigation of design and code anomalies, deficiency corrections, performance of system integration and testing of

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Offensive Aircraft

avionics software to include all compilers, assemblers, linkers, loaders, simulations, data programs, and test case generators.

d. B-52 Sustaining Engineering (FY 88, Base \$322,793)..... \$5,551

The B-52 digital autopilot and strategic offensive radar modifications will require follow on contractor support for test and verification of integration problems.

e. KC 135 Squadrons (FY 88, Base \$238,235)..... \$3,670

Additional funding is required for two areas. One new squadron will activate 1 Oct 88 at Malstrom AFB, Montana.

Additional funding will be required for contractor

operation and maintenance of seven operational flight

trainers, one at each of the following locations: Castle,

Robins, Ellsworth, Grand Forks, Grissom, Minot, and Beale AFBs.

f. B-52 HAVE NAP (FY 88, Base \$322,793)..... \$2,000

HAVE NAP is a conventional guided missile being installed on the B-52 in FY 89. Funding is required for Interim Contractor Support to maintain and troubleshoot the system until organic capability is available.

g. FB-111 Contractor Support (FY 88, Base \$36,925)..... \$962

The FB-111 Avionics Modernization Program is scheduled for completion in calendar year 1989. Funding is needed for contractor support for line repairable units, until test equipment and blue suit capability is developed.

h. Civilian Personnel..... \$759

Increase funds full year impact of contract conversions.

11. Program Decreases..... \$-63,678

a. SR-71 Squadrons (FY 88, Base \$204,482)..... \$-59,241

SR-71 Program restructured, details are available through classified channels.

b. B-52 Weapon System Trainer (WST) Relocation..... \$-4,300

Modification and transfer of B-52 WSTs will be completed in FY 1988, including relocation of a trainer from Castle AFB

FORCE PROGRAM 1: STRATEGIC FORCES

FORCE PROGRAM I: STRATEGIC FORCES

ACTIVITY GROUP: Offensive Missiles

I. NARRATIVE DESCRIPTION:

This activity group supports Minuteman and Peacekeeper Intercontinental Ballistic Missile squadrons, wing headquarters, field and organizational level missile and munitions maintenance. The requested funds will provide an acceptable strategic deterrent to counter projected growth and improvements in hostile capabilities. This deterrent capability provides for weapons application across a broad target spectrum in support of the National Command Authorities and the Single Integrated Operational Plan.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for pay of civilian personnel, combat crew training, transportation, utilities and rents, contractual services, field and organizational level maintenance, and supply and equipment costs associated with operation and maintenance of strategic weapon systems. The objective is an acceptable capability to counter projected growth and improvements in hostile capabilities.

FORCE PROGRAM I: STRATEGIC FORCES

ACTIVITY GROUP: Other Offensive Operations

I. NARRATIVE DESCRIPTION:

This activity group provides resources for support of Strategic Air Command (SAC) operational and management headquarters, the Accelerated Copilot Enrichment (ACE) Program, the 1st Combat Evaluation Group (CEVG) at Barksdale AFB, the 4315 Combat Crew Training Squadron and the 394 ICBM Test Maintenance Squadron at Vandenberg AFB, the 4235th Strategic Training Squadron at Carswell AFB, and SAC Air Division headquarters and the 3901st Strategic Missile Evaluation Squadron (SMES) at Vandenberg AFB.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources requested are to provide, operate, and maintain support to strategic offensive forces. Resources are for aircraft training and evaluation, missile training, and headquarters support of mission programs, and includes pay of civilian personnel, travel, supply and equipment costs associated with headquarters and training support for SAC and its Air Division headquarters.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Telecommunications and Command Control Programs Strategic Offense

I. NARRATIVE DESCRIPTION:

This activity supports the operation and maintenance of Communications, Command and Control (C3) systems capable of insuring full support to the management of flexible and responsive employment of Strategic Offensive Forces. This capability must consist of systems which are fast, accurate, reliable, secure, resistant to destruction and disruption, and tailored to the needs of the National Command Authorities, Commander in Chief, Strategic Air Command (CINCSAC), and Strategic Air Command (SAC) operational commanders.

II. DESCRIPTION OF OPERATIONS FINANCED:

Operation and maintenance of C3 systems is required to support CINCSAC's execution of the national security policy and military strategy of the US through all levels of conflict and in any environment. Provides support to modernize, enhance and otherwise improve Strategic Air Command (SAC) C3 systems to whatever degree required to support USAF readiness initiatives. Provides Worldwide Military Command and Control System (WWMCCS-SAC) resources in support of automated data processing.

Provides direct support of Post Attack Command and Control System (PACCS) aircraft and personnel.

Supports SAC communications consisting of Defense Communications Systems and non-defense communications systems, SAC automated command and control systems, and satellite terminals.

Provides communications systems dedicated leased equipment and other support of Titan and Minuteman missile systems.

Provides defense communications system dedicated circuitry in support of Strategic Air Command (SAC) special purpose communications.

This activity also provides for SAC base communications requirements consisting of base telephone systems, non-tactical radio systems, base wire communications services, official telephone charges, TWX usage and commercial refuel charges, and all other base-level commercial communications requirements.

An increasing number of Groundwave Emergency Network (GAEN) relay nodes will require additional supplies and, for the first year, contractor maintenance. The GAEN System will include 96 nodes by the end of FY 89.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Telecommunications and Command Control Programs Strategic Offense

Funding will support contract maintenance of input-output terminals at communication centers and sensor sites until blue suit maintenance capability can be developed.

b. WAR Planning ADP-SAC (FY 88, Base \$33,542)	\$+904
Program evolution will require increased purchased equipment maintenance and data processing services.	
c. SAC Automated Command and Control System (SACCS) Upgrade (FY 88, Base \$3,790)	\$+683
Increase will fund additional purchased equipment maintenance as new command and control hardware is acquired.	
d. Civilian Personnel	\$+436
Increase due to full year impact of contract conversions.	
e. Minuteman Communication (FY 88, Base \$6,623)	\$+338
Increase will fund additional supplies for communications improvements.	
f. PACCS Communications (FY 88, Base \$3,760)	\$+259
Increased lease costs with ATT for Ground Entry Control Points (GECP). GECPs are the interface points between airborne command posts and ground communications lines.	
g. AVPOL/Flying Hour Supplies	\$+231
Restores the hours-per-month/per crew ratio to FY 1987 levels.	
9. Program Decreases	\$-2,271
a. Post Attack Command and Control System (PACCS) VVWABNCP Contractor Support (FY 88, Base \$3,760)	\$-1,423
Program will require less contractor services as communications upgrades are completed.	
b. Base Communications - SAC (FY 88, Base \$21,285)	\$-491
Extension of the impact of FY 88 Congressional reductions for leased long line communications.	
c. Special Purpose Communications (FY 88, Base \$579)	\$-290
Contract engineering in support of this program will not be required in FY 89.	
d. Two Fewer Workdays in FY 1989	\$-67

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: BASE OPERATIONS - OFFENSE

1. NARRATIVE DESCRIPTION:

Base Operations support the Air Force's weapon system launch and recovery capability from fixed bases and installations. Base Operations thus meets the requirement for: the operation of utility systems; maintenance, repair, and minor construction of facilities; engineering services such as fire protection, crash rescue, custodial services, refuse collection, runway and street snow removal, and leasing of real property; a security force to protect aircraft, missiles, buildings, equipment, and to enforce the law; ground transportation to insure operations readiness; facilities and support to tenants on Air Force installations who service, assist, train, and protect our forces; administrative and ADP services essential to operations; food, clothes, and housing for our support and operational forces; morale, welfare, and recreation support to Air Force personnel and their dependents.

- Personnel costs, transportation, rent, supplies, and equipment for the maintenance and repair of real property facilities through in-service or contractual effort.
- Supplies or contract costs for minor construction performed by the base civil engineers and through facility project contracts with private concerns.
- Costs of procurement, or personnel, supply, and related costs of production and distribution of basic utility services (electric, heating, refrigeration, air conditioning, sewage and water).
- Supplies, equipment, purchase of services, and administrative support for other engineering activities such as fire protection, crash rescue, snow removal, refuse collection, or custodial activities.
- Personnel, supply, travel, ADP support, rent, and other costs associated with administration (such as Comptroller, Personnel, Judge Advocate, Command Section activities).
- Personnel costs, travel, equipment rental, and supplies for the management and operation of retail supply organizations, fuels management, and engine management activities.
- Personnel, supplies, and other costs of maintenance and repair of installation equipment, including vehicles, office machines, furniture, and appliances.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: BASE OPERATIONS - OFFENSE

- Personnel, supply, and other costs for other personnel support such as that provided by chaplains, food service operations, linen exchange, or Army and Air Force Exchange Service.
- Personnel, contracting, equipment and supplies, travel, and other costs associated with the supervision, management, and coordination of billeting.
- Personnel, supplies, equipment and other costs for morale, welfare, and recreation programs.

II. DESCRIPTION OF OPERATIONS FINANCED:

Funds provide base operating support in the following areas:

- A. Maintenance and Repair: Includes personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through in-service or contractual effort. Finances pay and allowances for civilian personnel.
- B. Minor construction: Includes supplies, personnel, and contract costs for minor construction performed in-service or by private concerns. Finances pay and allowances for civilian personnel.
- C. Operation and Utilities: Includes cost of production and distribution of basic utility service (electric, heating, refrigeration, air conditioning, and water). Finances pay and allowance for civilian personnel.
- D. Other Engineering Support: Includes fire protection, crash rescue, snow removal, refuse collection and custodial activities. Finances pay and allowance for civilian personnel.
- E. Administration: Finances all activities concerned with the headquarters command and administration of the Base; Organizational Effectiveness program; and other base-wide activities not otherwise provided for, such as comptroller activities. Finances pay and allowances for civilian personnel.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: BASE OPERATIONS - OFFENSE

- F. Retail Supply Operations: Finances the operation of base supply. Includes the operation of customer support center, purchasing and contracting offices, clothing issue points and POL resale points. Finances pay and allowances for civilian personnel.
- G. Maintenance of installation equipment: Finances system and general support maintenance of support systems such as vehicles and installation equipment. Finances pay and allowances for civilian personnel.
- H. Bachelor Housing Operation, Administration, and Furnishings: Finances the purchase, control, moving, and handling of bachelor housing, furnishings for bachelor officer quarters and bachelor enlisted quarters; and finances the operation and administration of all unaccompanied personnel housing. Finances pay and allowances for civilian personnel.
- I. Morale, Welfare, and Recreation: Finances the development, staffing, equipping, administering and operating of libraries, sports program, child care services, and open mess. Finances pay and allowances for civilian personnel.
- J. Other Base Services: Finances security police, terminal services, laundry and dry cleaning, base transportation, and other base-wide services. Finances pay and allowances for civilian personnel.
- K. Other Personnel Support: Finances chaplain activities, information program, food services, alcohol and drug abuse program, installation museums, and reenlistment activities. Finances pay and allowances for civilian personnel.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Surveillance and Warning - Radars

I. NARRATIVE DESCRIPTION:

This activity group supports the strategic defensive surveillance and tactical warning mission by providing radar surveillance and timely, reliable warning of enemy attack through: Joint Surveillance System (JSS) long range radar sites; Distant Early Warning (DEW) radars; Ballistic Missile Tactical Warning and Attack Assess System; Ballistic Missile Early Warning System (BMEWS); and Sea Launched Ballistic Missile (SLBM) System. Also supported are the JSS Region Operations Control Centers (ROCCs) which provide command and control of forces for the missions of airspace control and air defense against atmospheric attack.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources support JSS Region Operations Control Centers (ROCCs) which perform the mission of airspace control and air defense. The ROCCs receive sensor data from long range radar (LRR) sites to perform the tasks of detecting, tracking, identifying and intercepting, if necessary, aircraft penetrating U.S. sovereign airspace. Control centers also receive tactical warning information from the DEW line sites to provide warning of bomber attack so that survival decisions and timely defensive actions can be taken. There are 14 JSS sensor sites in Alaska of which one is a joint FAA/USAF site, one is FAA only, and 12 are military only. There are 47 JSS sensor sites in the CONUS of which 39 are joint FAA-USAF sites, and 8 are military only. The DEW line, which is a series of LRRs stretching from Alaska to Greenland, is contractor operated and maintained and will continue to operate as in the past. Two Aircraft Control and Warning (AC&W) radar sites in Iceland are operated by the USAF. The Iceland sites increase to 4 beginning FY 89. The Ballistic Missile Early Warning System (BMEWS) will provide warning of a single or mass ICBM attack against the U.S. and Southern Canada, an ICBM attack on the United Kingdom, or a Sea Launched Ballistic Missile (SLBM) attack within the system's geographical coverage. BMEWS provides limited attack assessment data to the North American Aerospace Defense Command, the Unified Space Command, Strategic Air Command, and the National Command Authorities. BMEWS also provides satellite detection and tracking data to the USAF Spacetrack System. The SLBM System is composed of an AN/FPS-85 at Eglin AFB, FL; the PAVE PAWS radars at Otis AFB, Beale AFB, Robins AFB, and Eldorado AFS, and PARCS (the former Safeguard radar in North Dakota). The Tactical Warning Attack Assessment System provides end-to-end integration and support to the entire ballistic missile warning network to include sensors and Communications, Command and Control facilities.

c. Federal Employees Retirement System (FERS).....	-254

7. Program Decreases..... \$-29,892

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Surveillance and Warning - Radars

- a. Reductions to more closely align the Surveillance and Radar Activity group to the executable level achieved in FY 87.

8. FY 1988 Current Estimate..... \$303,195

9. Price Growth..... \$+10,001

- a. Federal Employee Retirement System..... \$+43
- b. FY 89 Civilian Pay Raise..... +246
- c. Annualization of FY 88 Civilian Pay Raise..... +98
- d. Health Benefits..... +42
- e. Stock Fund Rates..... +375
- f. Industrial Fund Rates..... +104
- g. Contract Price Changes..... +8,391
- h. Other Price Changes..... +702

10. Program Increases..... \$+7,690

- a. Space Operations Training Facility..... \$+1,974

This increase is due to the continuing efforts of the integration/ support contractor to provide support for the Space Operations Training Facility (SOTF). The contractor will be integrating additional sensor simulators into the facility, with the associated increase in equipment maintenance support, and providing additional academic materials and training for the Space Systems Staff Officer Course. This increase will also provide the operation and maintenance for the equipment bought for the SOTF in FY 88.

- b. North Atlantic Defense System..... +2,803

Funding includes new software maintenance contract for Control and Reporting Center and the ICEROCC and O&M maintenance contract for two additional northern radars.

- c. Over-the-Horizon Backscatter Radar..... +2,913

Funding increase reflects increased power costs for additional sectors activated for test and integration.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Surveillance and Warning - Radars

11. Program Decreases		\$-9,283
a. C3 Power Reliability Program.		\$-3,506
This reflects continued reduction to contractual services as the limited number of sites to which this program applies are completed.		
b. Joint Surveillance System.		-1,104
Continued closure of height finder radar sites and continued early transfer of one radar site to FAA.		
c. CADIN-Pinetree Radar Closeout.		-1,312
The Memorandum of Understanding on North American Air Defense Modernization of March 1985 requires the United States to share costs due to closure of remaining sites. Bulk of site cleanup will be in FY 90.		
d. DEW Line/North Warning System.		-2,990
The Memorandum of Understanding on North American Air Defense Modernization of March 1985 requires the United States to share cost (60%/40%) with Canada for the O&M of the NWS long range radar starting in FY 89. Decrease reflects real decrease in cost of operating a modern state-of-the-art radar and a sharing of that cost.		
e. Ballistic Missile Early Warning System (BMEWS).		-371
Decrease amounts to a reduction of contractor technical analysis and support for system anomaly identification and correction.		
12. FY 1989 Budget Request (Amended)		\$311,603

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Other Defensive Operations

I. NARRATIVE DESCRIPTION:

This activity group provides for the operation of two active Air Defense F-15 squadrons; US and AF Space Command Headquarters; the Alaskan Air Command (AAC) Headquarters; and the operation of six Air Defense air divisions. Resources also support the operation of the strategic defensive training mission at Tyndall AFB, Florida. This requires T-33 and F-15 aircraft and QF-100 drones for basic, continuing, and advanced levels of training for aircrews and weapons controllers, and for the air defense Weapon System Evaluation Program (WSEP).

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for civilian pay, travel, contract services, supplies, aviation POL, and equipment in support of two 18 PAA F-15 squadrons and one combat crew training squadron; one specified command headquarters and one major command headquarters; TAC Air Defense air divisions; and the accomplishment of training for air defense of the United States. Support includes maintenance of F-15s in the alert and training missions, as well as support of a weapons firing range. These resources maintain forces and a command structure required for effective accomplishment of the strategic defense mission.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Industrial Fund and Stock Fund Support

I. NARRATIVE DESCRIPTION:

This activity group contains DoD stock fund and industrial fund refunds and passthroughs that affect the O&M, Air Force Appropriation (MFP 1).

II. DESCRIPTION OF OPERATIONS FINANCED:

Refunds and passthroughs that involve strategic forces in the O&M, Air Force appropriation are shown here. A refund from a DoD stock or industrial fund is shown as a credit, while a passthrough to a fund is shown as a direct appropriation requirement. Stock and industrial funds operate under a rate stabilization policy and refunds allow the Service to execute programs at published rates and provide refunds to customer accounts.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Telecommunications & Command Control Programs Strategic Forces (Defensive)

I. NARRATIVE DESCRIPTION:

The resources of the this activity group provide for data transmission, processing, and display support for tactical warning and peacetime air surveillance and control missions. These data allow increased time to implement strategic nuclear and conventional operations appropriate to the type and level of attack or situation.

II. DESCRIPTION OF OPERATIONS FINANCED:

The NORAD/ADCOM Command and Control System allows positive control of forces by CINCNORAD. It includes resources for the Worldwide Military Command and Control System (WWMCCS) and the NORAD Combat Operations Center (COC) within the Cheyenne Mountain complex.

The NORAD-COC Telecommunications system provides leased long-lines for support of the NORAD-COC which interface with other systems such as Ballistic Missile Early Warning System (BMEWS), SLBM Communications systems, etc.

The 416L Communications System provides internal, air/ground/air, and long-haul communications in support of the various components of the North American air defense system.

The Perimeter Acquisition Radar Characterization System (PARCS) communications system transmits surveillance and warning data over leased lines from the PARCS site in North Dakota to the NORAD COC.

The Command Center Processing and Display System provides resources for the consolidated management by HQ SAC of the data display systems at the National Military Command Center, the Alternate National Military Command Center, HQ SAC, and HQ NORAD.

The BMEWS communications system provides for the lease of communications lines to transmit surveillance and warning data from BMEWS sites to the NORAD COC.

The SPACETRACK communications system provides for lease of communication lines to transmit SPACETRACK data from the SPACETRACK sensors to the NORAD COC and other supporting communications links.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Telecommunications & Command Control Programs Strategic Forces (Defensive)

The Over-the-Horizon radar communications program provides leased long-lines support of the CONUS OTH-B Radar System.

The Submarine Launched Ballistic Missile (SLBM) communications system provides for the lease of communications lines to transmit surveillance and warning data from the SLBM sites to the National Military Command Center (NMCC), Alternate National Military Command Center (ANMCC), and SAC.

The Defense Support Program (DSP) communications system provides for lease of communications lines between the principal operational ground stations.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Base Operations - Defensive

I. NARRATIVE DESCRIPTION:

Base Operations Support (BOS) provides the necessary resources to be consumed at Air Force installations, activities, and facilities in support of personnel services and force readiness requirements. This includes real property maintenance activities, personnel, supply support, security, transportation, data processing, finance, procurement, administrative services, and morale, welfare, and recreation activities.

BOS support included herein is for bases of the Alaskan Air Command, Tactical Air Command, and Space Command.

II. DESCRIPTION OF OPERATIONS FINANCED:

Funds provide base operating support in the following areas:

A. Maintenance and Repair: Includes personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through in-service or contractual effort. Finances pay and allowances for civilian personnel.

B. Minor construction: Includes supplies personnel, and contract costs for minor construction performed in-service or by private concerns. Finances pay and allowance for civilian personnel.

C. Operation and Utilities: Includes cost of production and distribution of basic utility service (electric, heating, refrigeration, air conditioning, sewage, and water). Finances pay and allowance for civilian personnel.

D. Other Engineering Support: Includes fire protection, crash rescue, snow removal, refuse collection and custodial activities. Finances pay and allowance for civilian personnel.

E. Administration: Finances all activities concerned with the headquarters command and administration of the Base; Organizational Effectiveness program; and other base-wide activities not otherwise provided for, such as comptroller activities. Finances pay and allowances for civilian personnel.

FORCE PROGRAM 1: STRATEGIC FORCES

ACTIVITY GROUP: Base Operations - Defensive

- F. Retail Supply Operations: Finances the operation of base supply. Includes the operation of customer support center, purchasing and contracting offices, clothing issue points and POL resale points. Finances pay and allowances for civilian personnel.
- G. Maintenance of installation equipment: Finances system and general support maintenance of support systems such as vehicles and installation equipment. Finances pay and allowances for civilian personnel.
- H. Bachelor Housing Operation, Administration, and Furnishings: Finances the purchase, control, moving, and handling of bachelor housing, furnishings for bachelor officer quarters and bachelor enlisted quarters; and finances the operation and administration of all unaccompanied personnel housing. Finances pay and allowances for civilian personnel.
- I. Morale, Welfare, and Recreation: Finances the development, staffing, equipping, administering and operating of libraries, sports program, child care services, and open mess. Finances pay and allowances for civilian personnel. The FY 87 DOD Appropriations Act suspended appropriated fund (APF) support to revenue generating MWR activities (clubs, bowling centers, marinas, golf courses, skeet/trap ranges, skating rinks, stables, and amusement machine locations/centers) located in large metropolitan areas in the 50 states after 30 Sep 87. The FY 88 DOD Appropriations Act repealed the provision relating to clubs allowing metropolitan area open messes to receive APF support (including military and APF civilian personnel) within a 20% cap. It permits APF civilian employees employed on or before 1 Jan 87 in revenue-generating recreational activities to be retained in those activities provided salaries and other personnel expenses are reimbursed from nonappropriated funds.
- J. Other Base Services: Finances security police, terminal services, laundry and dry cleaning, base transportation, and other base-wide services. Finances pay and allowances for civilian personnel.
- K. Other Personnel Support: Finances chaplain activities, information program, food services, alcohol and drug abuse program, installation museums, and reenlistment activities. Finances pay and allowances for civilian personnel.

FORCE PROGRAM II: GENERAL PURPOSE FORCES

1. DESCRIPTION OF OPERATIONS FINANCED:

Resources requested are for Tactical Air Forces (TAF) assigned to Pacific Air Forces (PACAF), Tactical Air Command (TAC), the United States Air Forces in Europe (USAFE), and the Alaskan Air Command (AAC). The resources requested also support Strategic Air Command (SAC) and Military Airlift Command (MAC). These funds will provide support for: combat, test, and training fighter aircraft; command, control, and communications, including the Airborne Warning and Control System (AWACS) and OV-10/EC-135/C-130E Tactical Air Control aircraft; F-5 Dissimilar Air Combat Training (DACT) aircraft; support ranges; and command and base support personnel and activities. Also supported are the Air Force Logistics Command, the Air Force Systems Command, Air Force Operational Test and Evaluation Center (AFOTEC), Unified Commands (US Special Operations Command, Unified Transportation Command), JCS Exercises, Chemical and Biological Defense activities, the KC-10 tanker/cargo aircraft, Tactical Reconnaissance and Electronic Warfare, Tactical Intelligence and Special Activities, United States Central Command (CENTCOM), Joint Deployment Agency (JDA), and the Joint Communications Support Element (JCSE).

The long range goal is to maintain a capability to counter a wide range of threats to the U.S. and its allies. Tactical forces are required to assure a visible deterrent posture or to terminate conflict on advantageous terms by maintaining: theater nuclear forces to deter nuclear conflict; the capability to resist non-nuclear aggression with conventional forces and weapons; a U.S. superiority in tactical air forces; a high degree of expertise in mobility operations; a balanced modern force with a high degree of readiness; modern, responsive, and reliable C3 systems and facilities, both fixed and mobile; a continuous update of U.S. tactics through combined joint and unilateral training programs employed against scenarios which use current enemy tactics; an on-going test and evaluation effort providing rapid integration of new systems and refinements to existing first-line equipment; unified command structures to plan and evaluate the joint exercises, to plan for contingencies, and to provide a command element for such activities; the capability to operate in a chemical warfare (CW) environment; and on-going efforts to improve efficiency and effectiveness in the maintenance and operation of tactical air forces.

Resources provide for tactical force operations including manpower authorizations, peculiar and support equipment, necessary facilities and the associated costs specifically identifiable and measurable to wing headquarters, avionics, field munitions and consolidated aircraft maintenance, weapon system security for tactical fighters, Tactical Electronic Warfare Forces, JCS Exercises, F-5 Dissimilar Air Combat Training (DACT) aircraft squadrons, intelligence squadrons, combat crew training aircraft and training courses, airborne command posts, command and control and associated communications systems, the E3-A Airborne Warning and Control System (AWACS), unified and tactical air forces management headquarters, operational test ranges and activities, and the 2nd Aircraft Delivery Group. Resources are also provided for

FORCE PROGRAM II: GENERAL PURPOSE FORCES

sustaining engineering, contractor logistical support, and contractor engineering technical services for all tactical weapons systems.

14. FY 1989 Budget Request (Amended)	\$4,475,268
--	-------------

FORCE PROGRAM III: GENERAL PURPOSE FORCES

III. PERFORMANCE CRITERIA AND EVALUATION:

	FY 1987 Actual	FY 1988 Estimate	FY 1989 Estimate
(1) Flying Hours.....	1,080,084	1,039,744	1,073,312
(2) Primary Aircraft Authorization (PAA)	3,100	3,100	2,972

The funds required for the FY 1988 and 1989 flying hour programs are based on the pricing of flying hours by mission, design and series of aircraft using the latest aviation fuel prices. The aviation fuel factors incorporate experience, operational characteristics, and consumption rates for each type of aircraft. The supply cost factors for each aircraft are similarly based on actual experience of maintenance requirements per flying hour.

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: TAC Fighters, Weapons, Support Aircraft and Training

I. NARRATIVE DESCRIPTION:

This activity group supports F-4, F-111, F-15, A-10, F-16, and F-4G (Wild Weasel) fighter squadrons; tactical AIM, AGM and Maverick missiles; and the KC-10. It also provides support for Dissimilar Air Combat Training (DACT), whereby aggressor squadrons, using Soviet aerial combat tactics, provide tactical air force (TAF) pilots with highly realistic training under simulated combat conditions. This activity group also funds for TAF training. Specifically: advanced flying training; combat crew training; forward air controller training; tactical deployments; and Red Flag, Blue Flag, and Maple Flag exercises -- all of which are imperative to maintain the Air Force's readiness posture. The funds requested will provide a capability to counter a wide range of threats to the U.S. and its allies and to assure a viable deterrent posture.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for civilian personnel, support equipment, necessary facilities, and the associated costs specifically identified and measurable to: wing headquarters, tactical fighter squadrons, tactical training squadrons, organizational avionics, consolidated aircraft and munitions maintenance, tactical systems security, and tactical range payments. The objective is to increase readiness and functional proficiency through flying and ground operations training with personnel/equipment/systems that would be involved in responding to crisis/contingency/emergency situations.

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: TAC Fighters, Weapons, Support Aircraft and Training

III. FINANCIAL SUMMARY (Q&M \$ in Thousands):

9. Program Increases

		\$+160,702
Program Increases		
a.	Flying Hour Costs (FY 88 Base, \$699,930)	\$+55,968

Increased flying hours have driven an additional requirement for aviation fuels and supplies. This activity group includes the deactivation of the 474 TPW at Nellis and funds the reduced flying hours which had been removed from the original FY 89 budget but added back when congress prohibited deactivated overseas fighter wing. Additionally, the deactivation of a notional overseas fighter wing is also reflected. The following table displays the program and funding requirements.

Aircraft	FY87 (87\$)	FY88 (88\$)	FY88 (89\$)	FY89 (89\$)
F-15				
AVPOL/Supplies	\$205,404	\$174,800	\$176,304	\$191,418
Flying Hours	136,002	127,726	127,726	138,697
F-4G				
AVPOL/Supplies	\$31,854	\$31,330	\$32,017	\$33,768
Flying Hours	20,326	19,065	19,065	20,112
F-16				
AVPOL/Supplies	\$172,489	\$164,931	\$166,656	\$183,774
Flying Hours	197,189	214,401	214,401	236,423

FORCE PROGRAM 11: GENERAL PURPOSE FORCES

ACTIVITY GROUP: TAC Fighters, Weapons, Support Aircraft and Training

<u>A-10</u>			
AVPOL/Supplies.....	\$86,795	\$73,986	\$77,888
Flying Hours.....	130,283	123,562	128,352
<u>KC-10</u>			
AVPOL/Supplies.....	\$27,028	\$44,146	\$47,814
Flying Hours.....	22,064	24,798	26,834
<u>Training</u>			
AVPOL/Supplies.....	\$235,645	\$198,122	\$215,146
Flying Hours.....	234,008	221,790	227,474
<u>F-5</u>			
AVPOL/Supplies.....	\$14,668	\$12,615	\$13,121
Flying Hours.....	18,841	18,095	18,378

- b. Contractor Logistics Support (FY 88 Base, \$72,055).....+50,033
Increases are due to the addition of simulator devices, increasing aircraft inventory, and Air Force-wide conversion from organic blue-suit maintenance to contractor support for all current and future simulators.
- c. T-38 Contract Maintenance (FY 88 Base, \$12,882).....+8,255
Full-year cost (\$23,137) of conversion of T-38 maintenance at Holloman AFB from military to contract operation.
- d. KC-10 Follow-On Aircrew Training (FOAT) (FY 88 Base, \$14,307).....+1,288
Increase continues the aircrew ratio build from 3.3:1 in FY 88 to a steady level of 3.5:1 in FY 89. This raises the FOAT contract requirements.
- e. Sustaining Engineering (FY 88 Base, \$6,008).....+5,975
Increase funds engineering support of F-15 for flight control radars, electronic combat countermeasures, system engineering and operational

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: TAC Fighters, Weapons, Support Aircraft and Training

f.	flight program updates.	
	F-15 Support (FY 88 Base, \$33,681).....	+11,706
	Funds for travel, civilian personnel, contract services, supplies, and equipment for 432 PAA F-15A/B/C/D and 24 additional F-15E PAA.	
g.	Training (FY 88 Base, \$134,352).....	+11,408
	The apparent growth from FY 88 to FY 89 in the training program is primarily caused by the significant congressional reductions in FY 88 funding to include civilian personnel. The FY 89 program reflects a FY 87 level of effort in programs critical to combat readiness (Red Flag, Overseas deployments, etc.) Funding at levels less than proposed will severely impact the capability of the TAF to train toward full combat capability.	
h.	F-16 C/D and LANTIRN Aircrew Training (FY 88 Base, \$2,560).....	+525
	Continues syllabus development and full-year support of courses for the F-16 C/D and LANTIRN.	
i.	Range O&M Contracts (FY 88 Base, \$3,160).....	+879
	Completes military to civilian contract conversion of Class II and III weapons ranges begun in FY 88.	
j.	POLY-GONE Electronic Warfare (EW) Range (FY 88 Base, \$5,911).....	+1,034
	Funds full contractor operation of a surveillance radar and a surface-to-air missile simulator in Europe.	
k.	Aircrew Training Devices (ATD) Instructor/Operator Contract (FY 88 Base, \$4,100).....	+3,900
	Expands the ATD instructor/operator contract program to all tactical fighter training bases.	
l.	Fuel Consumption (FY 88 Base, \$616,913).....	+7,024
	Fact of Life increase for fuel consumption.	
m.	Alaskan Range Support (FY 88 Base, \$0).....	+728
	Provides funding to support Alaskan Air Command tactical ranges upon withdrawal of current helicopter support.	
n.	F-16 Sustaining Engineering (FY 88 Base, \$17,544).....	+1,979
	Funds minimum essential contract engineering technical assistance for structural life limit assessment and correction of service revealed discrepancies.

FORCE PROGRAM 11: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Tactical Reconnaissance and Electronic Warfare (EW)

I. NARRATIVE DESCRIPTION:

This activity group supports RF-4, TR-1, and EF-111 squadrons. The funds requested will provide for detecting, identifying, and locating enemy radar transmitters, and provide decision makers the latest tactical reconnaissance available. The TR-1 provides day or night, all weather surveillance of a battle area in direct support of U.S. and allied ground and air forces during peacetime crisis and war situations.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources support civilian personnel, support equipment, necessary facilities, and the associated costs specifically identified and measurable to wing headquarters, tactical reconnaissance, and electronic warfare squadrons, field armament, electronics maintenance, photo processing, and weapon systems security.

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: JCS Directed and Coordinated Exercises

I. NARRATIVE DESCRIPTION:

This activity group funds the training required to maintain U.S. capability to effectively employ joint combat forces to meet contingencies worldwide. It provides tangible demonstration of U.S. resolve and joint readiness capability to project a military presence anywhere in the world in support of national interest and commitments to U.S. allies. Joint training with allies provides the necessary interaction to test/evaluate combined systems, lines of communication, and technical agreements.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide funding for Air Force conduct of, or participation in, designated JCS directed and coordinated exercises involving forces of more than one unified or specified command or agency. Funds provide for transportation of equipment, travel of personnel, supplies, and other exercise-related requirements.

FORCE PROGRAM : : GENERAL PURPOSE FORCES

ACTIVITY GROUP: JCS Directed and Coordinated Exercises

III. FINANCIAL SUMMARY (OBM \$ in Thousands):

A. SUBJECTIVITY BREAKOUT	FY 1987	FY 1988			FY 1989			Change FY 88/89
		Budget Request	Approp	Current Estimate	Initial Estimate	Change	Amended Estimate	
28011 JCS Exercises.....	\$32,839	\$31,033	\$31,033	\$31,033	\$32,235	\$-2,353	\$29,882	\$-1,151
B. SCHEDULE OF INCREASES AND DECREASES:								
1. FY 1988 President's Budget Request.....								\$31,033
2. Congressional Adjustments.....								\$0
3. FY 1988 Appropriated Amount.....								\$31,033
4. FY 1988 Current Estimate.....								\$31,033
5. Price Growth.....								\$+764
a. Stock Fund Rates.....							\$+207	
b. Transportation.....							+162	
c. Contract Price Changes.....							+233	
d. Other Price Growth.....							+163	
6. Program Decreases.....								\$-1,915
The FY 1989 JCS Exercise program consists of 78 planned exercises (24 directed and 54 coordinated exercises) which is 4 exercises less than the FY 1988 program of 82 planned exercises (24 directed and 58 coordinated exercises). The decrease in planned exercises and the overall reduced participation and deployment of units/personnel results in lower JCS requirements. (FY 88 Base, \$31,033).								
7. FY 1989 Budget Request (Amended).....								\$29,882

FORCE PROGRAM III: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Combat Support

I. NARRATIVE DESCRIPTION:

This activity group provides support for operational test and evaluation aircraft used to support experimentation, tests, projects, and evaluations necessary to develop and/or validate new doctrine, material, and organizations for the development of combat procedures, the ground launched cruise missile, air defense missile system, air base ground defense measures, chemical and biological defense, electronic combat support, and war readiness material (WRM) programs.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for civilian personnel, travel, supplies, equipment, contractual services, necessary facilities, and associated costs specifically identified and measurable to the above programs.

FORCE PROGRAM 11: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Combat Support

FORCE PROGRAM III. GENERAL PURPOSE FORCES

ACTIVITY GROUP: Combat Support

8.	FY 1988 Current Estimate.....	\$243,306
9.	Price Growth.....	\$+7,981
	a. FERS.....	\$+53
	b. FY 1989 Civilian Pay Raise.....	+312
	c. Annualization of FY 1989 Civilian Pay Raise.....	+95
	d. Health Benefits.....	+39
	e. Stock Fund Rates.....	+2,001
	f. Industrial Fund Rates.....	+1
	g. Transportation.....	+628
	h. Contract Price Changes.....	+4,311
	i. Other Price Growth.....	+541
10.	Program Increases.....	\$+4,206
	a. WRM - Equipment (FY 88 Base, \$53,894).....	
	Increase is for CONUS caretaker contract costs and transportation costs for HARVEST FALCON assets which are currently housed at five storage locations. These HARVEST FALCON assets will be shipped to one location for the contractor to maintain. Contractor also will aggregate these assets into port squadron size deployable packages (bare base), and ship to deployment locations.	
	b. Combat Development (FY 88 Base, \$47,593).....	+885
	Reflects costs related to increased FY 89 flying hour program (119 hours) such as AVPOL, flying hour supplies, and purchased maintenance for AF ADPE used for tracking/testing the aircraft.	
	c. WRM - Ammunition (FY 88 Base, \$17,406).....	+527
	Reflects cost of +9 manyears over FY 1988 and increased miscellaneous contractor support services.	
	d. Air Base Ground Defense (FY 88 Base, \$2,806).....	+1,978
	Reflects the increase in the number (+11) of flights equipped with new air base ground defense equipment over FY 1988. The cost to equip a flight is about \$180K. The equipment buys DOD protection against terrorism and enemy special forces.	

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Combat Support

11. Program Decreases.....		\$-23,613
a. Two fewer workdays in FY 1989 (FY 88 Base, 262 Workdays).....	\$-146	
b. Ground Launched Cruise Missile (GLCM) (FY 88 Base, \$63,983).....	-21,272	
GLCM drawdown in accordance with the INF Treaty which was signed on 8 Dec 87. The treaty mandates the gradual reduction in GLCM flights and people which reduces requirements for contractor logistics support, contract engineering, equipment, and other expenses.		
c. Chemical Biological Defense Program (FY 88 Base, \$22,738).....	-616	
Reflects a reduction in the number (45) of new shelters (survivable, collective protection systems) that will be outfitted in FY 1989. Equipment and supplies such as radios, lockers, hygiene items, nuclear biological chemical filters, bedding decontamination items, etc. are included in the outfitting package.		
d. Electronic Combat Support (FY 88 Base, \$34,795).....		
Completion of software development efforts and initial system implementation costs for the TAC/SAC common software development.....	-1,579	
12. FY 1989 Budget Request (Amended).....		\$235,270

FORCE PROGRAM III: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Combat Support

IV. PERFORMANCE CRITERIA AND EVALUATION:

	FY 1987 Actual	FY 1988 Estimate	FY 1989 Estimate
<u>Primary Aircraft Authorization (PAA)</u>			
Combat Development.....	57	59	58
<u>Average Primary Aircraft Inventory (APAI)</u>			
Combat Development.....	57	58	58
<u>Flying Hours</u>			
Combat Development.....	14,975	15,810	15,929
<u>Annual Flying Hours Per APAI</u>			
Combat Development.....	262	273	275

Explanation of Changes in Flying Hours

FY 87-88 Reflects increase in hours due to a net increase of one APAI.

FY 88-89 Reflects slight increase in hours due to increased testing of the F-15E.

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Other Command and Control

NARRATIVE DESCRIPTION:

This activity group provides support for air weapons control systems, tactical air control systems, (e.g., forward air control posts, tactical air control center, air support operations center); airborne command and control systems, (including the AWACS (E-3), EC-135, EC-130E, O-2, OA-37, OV-10, OA-10 aircraft and CH/HH-53 heavy lift helicopters) and COMPASS CALL (EC-130H) Command Control and Counter Measure (C3CM) aircraft.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for civilian personnel, travel, communications, supplies, equipment, contractual services, necessary facilities, and associated cost specifically identified and measurable to the activities described above.

FORCE PROGRAM III: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Other Command and Control

Offsets for Program and Price Increases.....	\$-7,921	
8. FY 1988 Current Estimate.....		\$162,767
9. Price Growth.....		\$+4,446
a. Annualization of FY 88 Pay Raise.....		\$+40
b. FY 89 Civilian Pay Raise.....		+133
c. Civilian Health Benefit Increases.....		+26
d. Stock Fund Rates.....		+1,587
e. Industrial Fund Rates.....		+138
f. Transportation.....		+403
g. Contract Price Changes.....		+1,857
i. FERS Increase.....		+27
h. Other Price Growth.....		+235

10. Program Increases.....		\$+21,481
a. Flying Hour Costs (FY 88 Base, \$2,663).....		\$+2,611

The modernization of the Forward Air Control (FAC) force with OA-10 aircraft increases the requirement for aviation fuel and supplies. The following table displays the program and funding requirements:

	FY 87 (87\$)	FY 88 (88\$)	FY 88 (89\$)	FY 89 (89\$)
OA-10				
AVPOL/Supplies.....	\$0	\$2,632	\$2,663	\$5,274
Flying Hours.....	0	4,415	4,415	8,520
b. Airborne Warning and Control System (FY 88 Base, \$65,746).....				+10,845
Support of ELF-1, which is reimbursable, is phasing down--causing an increase in direct funding requirements. There is also a slight increase in flying hours from FY 88 to FY 89.				

FORCE PROGRAM 11: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Other Command and Control

E-3	FY87 (87\$)	FY88 (88\$)	FY88 (89\$)	FY89 (89\$)

c. TAF Command, Control, Communication, and Computer (C4) Systems (FY 88 Base, \$11,844).....					+3,708
Provides maintenance support for equipment being installed in the headquarters and TAF wings under unique modernization programs such as the Wing Command and Control System (WCCS) and connection of the TAF wings to WMMCS/WIS. Four wings are receiving processors and a command and control system. Increase also provides for the beginning of data base design at PACAF and beginning of code modernization at USAFE. In addition, contract services will provide integration and modernization support of the TAF software systems.					
d. Advanced Systems Improvement (FY 88 Base, \$485).....					+300
Classified Program. Details will be provided separately.					
e. HQ 5th AF C3I Upgrades (FY 88 Base, \$0).....					+2,267
Supports ADP contract services and communications equipment integration for the HQ 5th AF Command, Control, Communications, and Intelligence (C3I) Upgrades project at Yokota AFB, Japan.					
f. Poker Buff/Joint Task Force (FY 88 Base, \$1,500).....					+1,100
Increased JCS taskings for classified operations and joint task force support continues.					
g. System Training Program (STP) (FY 88 Base, \$0).....					+650
Funds purchase of following STP products which have been deferred for previous four years: Joint System Training Exercise Scenario, Air Liason Officer Training Package, and Sector Operations Center Training Module Review and Update.					

11. Program Decreases..... \$-3,387

a. Two less work days in FY 1989 (FY 88 Base, 262 days)..... \$-58

FORCE PROGRAM 11: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Other Command and Control

b. Flying Hour Costs (FY 88 Base, \$1,914) -1,711

Cancellation of dedicated helicopter support for the Tactical Air Control System (TACS) mission results in reduced flying hours, supplies and AVPOL. The following table reflects the program and funding requirements.

	FY87 (87\$)	FY88 (88\$)	FY88 (89\$)	FY89 (89\$)
Aircraft				
CH/HH-53				
AVPOL/Supplies	\$1,024	\$1,369	\$1,399	\$174
Flying Hours	1,725	2,000	2,000	249
CH/HH-3				
AVPOL/Supplies	\$579	\$545	\$557	\$71
Flying Hours	1,690	1,680	1,680	216

c. Flying Hour Costs (FY 88 Base, \$9,894) -1,618

Modernization of the Forward Air Control (FAC) force with OA-10s replacing OV-10s and OA-37s results in the following flying hour and AVPOL/Supplies reduction.

	FY87 (87\$)	FY88 (88\$)	FY88 (89\$)	FY89 (89\$)
Aircraft				
OA-37				
AVPOL/Supplies	\$4,635	\$2,584	\$2,616	\$1,731
Flying Hours	10,142	6,412	6,412	4,200
OV-10				
AVPOL/Supplies	\$7,989	\$7,310	\$7,490	\$6,757
Flying Hours	26,989	25,740	25,740	23,141

12. FY 1989 Budget Request (Amended) \$185,307

FORCE PROGRAM 11: GENERAL PURPOSE FORCES

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Tactical Intelligence and Special Activities

I. NARRATIVE DESCRIPTION:

This activity group funds Air Force facilities and activities which support the tactical use of national intelligence systems (TENCAP), the CONSTANT PEG Program, and organizations and activities which provide intelligence and intelligence functional support to USAF tactical command and control and other USAF tactical force elements. Further, this activity group supports the Tactical Cryptologic Program operated in support of tactical operations and project Elegant Lady.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for civilian personnel, general and peculiar support equipment, necessary fixed and deployable facilities, and the associated costs specifically identified and measurable to tactical intelligence squadrons, reconnaissance technical squadrons not identified with a specific system, reconnaissance-intelligence technical squadrons, intelligence centers, air intelligence squadrons, tactical air intelligence systems, the tactical cryptologic program, the TENCAP program, the Have Flag Program, and project Elegant Lady.

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Telecommunications & Command and Control Programs

I. NARRATIVE DESCRIPTION:

This activity group supports tactical missions in the Air Force. The requested funds provide for the operation, maintenance, planning, and programming for base communications-electronics services. The required services include base telephone support, record communications (AUTODIN), intrabase radios, secure telephones, air traffic control and navigation, and other communications-electronics service. Funds are also included for communications and manpower to support tactical long-haul communications-DCS, and provide manage, operate and maintain a worldwide Communications and Command Control (C3) capability of such quality, capacity, and security as to insure that C3 will fully support the flexible and responsive employment of general purpose forces. This capability must consist of systems which are fast, accurate, reliable, secure, resistant to destruction and disruption, and tailored to the needs of the national command authorities, the military commanders, and the combat forces.

II. DESCRIPTION OF OPERATIONS FINANCED:

Requirements are for pay of civilian personnel, communications-electronics supplies, leased communications-electronics services, the costs associated with providing communications operations, and air traffic control services and maintenance. The goal is to provide the tactical forces worldwide with a minimum acceptable level of communications-electronics capability to insure the effective accomplishment of their day-to-day mission of deterrence. In addition, resources are required for communications and manpower to support Airborne Command Posts, US Special Operations Command, Unified Transportation Command, Overseas Air Weapons Control System, Tactical Air Control System and Command Communications for the Tactical Air Forces. Resources will provide for pay of civilians, contract services, aviation fuels, supply and equipment costs associated with communications, command and control.

FORCE PROGRAM 11: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Base Operations

1. NARRATIVE DESCRIPTION:

This activity group provides the O&M resources for the Air Force's weapon system launch and recovery capability from fixed bases and installations. Base Operations provides for the operation of utility systems; maintenance, repair and minor construction of facilities; engineering services such as fire protection, crash rescue, custodial services, refuse collection, runway and street snow removal, and leasing of real property; a security force to protect aircraft, missiles, buildings, equipment, and to enforce the law; ground transportation to insure operations readiness; facilities and support to tenants on Air Force installations who service, assist, train and protect our forces; administrative and ADP services essential to operations; food, clothes, and housing for our support and operational forces; morale, welfare and recreation support to Air Force personnel and their dependents.

- Personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through in-service or contractual effort.
- Supplies or contract costs for minor construction performed by the base civil engineers and through facility project contracts with private concerns.
- Costs of procurement, or personnel, supply and related costs of production and distribution of basic utility services (electric, heating, refrigeration, air conditioning, water).
- Supplies, equipment, purchase of services and administrative support for other engineering activities such as fire protection, crash rescue, snow removal, refuse collection, or custodial activities.
- Personnel, supply, travel, ADP support, rent and other costs associated with administration (such as Comptroller, Personnel, Judge Advocate, Command Section activities).
- Personnel costs, travel, equipment rental, supplies for the management and operation of retail supply organizations, fuels management and engine management activities.
- Personnel, supplies and other costs of maintenance and repair of installation equipment, including vehicles, office machines, furniture and appliances.

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Base Operations

- Personnel, supply and other costs for other base services such as security police, traffic management, vehicle operations.
- Personnel, supply and other costs for other personnel support such as that provided by chaplains, food service operations, and linen exchange.
- Personnel, contracting, equipment and supplies, travel and other costs associated with the supervision, management and coordination of billeting.
- Personnel, supplies, equipment and other costs for morale, welfare and recreation programs.

II. DESCRIPTION OF OPERATIONS FINANCED:

Funds provide base operating support in the following areas:

- A. Maintenance and Repair: Includes personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through in-service or contractual effort. Finances pay and allowances for civilian personnel.
- B. Minor Construction: Includes supplies, personnel, and contract costs for minor construction performed in-service or by private concerns. Finances pay and allowance for civilian personnel.
- C. Operation and Utilities: Includes cost of production and distribution of basic utility services (electric, heating, refrigeration, air conditioning, sewage, and water). Finances pay and allowance for civilian personnel.
- D. Other Engineering Support: Includes fire protection, crash rescue, snow removal, refuse collection and custodial activities. Finances pay and allowance for civilian personnel.
- E. Administration: Finances all activities concerned with the headquarters command and administration of the Base, Organizational Effectiveness program, and other base-wide activities not otherwise provided for, such as comptroller activities. Finances pay and allowances for civilian personnel.

FORCE PROGRAM 11: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Base Operations

- F. Retail Supply Operations: Finances the operation of base supply. Includes the operation of customer support centers, purchasing and contracting offices, clothing issue points, and POL resale points. Finances pay and allowances for civilian personnel.
- G. Maintenance of installation equipment: Finances system and general support maintenance of support systems such as vehicles and installation equipment. Finances pay and allowances for (FY88, 250; FY89, 248) civilian personnel.
- H. Bachelor Housing Operation, Administration, and Furnishings: Finances the purchase, control, moving, and handling of bachelor, housing furnishings for bachelor officer quarters and bachelor enlisted quarters; and finances the operation and administration of all unaccompanied personnel housing. Finances pay and allowances for civilian personnel.
- I. Morale, Welfare, and Recreation: Finances the development, staffing, equipping, administering and operating of libraries, sports programs, child care services, and open mass. Finances pay and allowances for civilian personnel. The FY 87 DOD Appropriations Act suspended appropriated fund (APF) support to revenue generating MWR activities (club, bowling centers, marinas, golf courses, skeet/trap ranges, skating rinks, stables, and amusement machine locations/centers) located in large metropolitan areas in the 50 states after 30 Sep 87. The FY 88 DOD Appropriations Act repealed the provision relating to clubs allowing metropolitan area open masses to receive APF support (including military and APF civilian personnel) within a 20% cap. It permits APF civilian employees employed on or before 1 Jan 87 in revenue-generating recreational activities to be retained in those activities provided salaries and other personnel expenses are reimbursed from nonappropriated funds.
- J. Other Base Services: Finances security police, terminal services, laundry and dry cleaning, base transportation, and other base-wide services. Finances pay and allowances for civilian personnel.
- K. Other Personnel Support: Finances chaplain activities, information program, food service, alcohol and drug abuse program, installation museums, and reenlistment activities. Finances pay and allowances for civilian personnel.

FORCE PROGRAM II: GENERAL PURPOSE FORCES

ACTIVITY GROUP: Industrial Fund and Stock Fund Support

I. NARRATIVE DESCRIPTION:

This activity group contains DoD stock fund and industrial fund refunds and passthroughs that affect the O&M, Air Force Appropriation (MFP 2).

II. DESCRIPTION OF OPERATIONS FINANCED:

Refunds and passthroughs that involve tactical forces in the O&M, Air Force appropriation are shown here. A refund from a DoD stock or industrial fund is shown as a credit, while a passthrough to a fund is shown as a direct appropriation requirement. Stock and industrial funds operate under a rate stabilization policy and refunds allow the service to execute programs at published rates and provide refunds to customer accounts.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

I. DESCRIPTION OF OPERATIONS FINANCED:

The resources requested are for the intelligence and communications program and for the conduct of national or centrally-directed DOD intelligence and security programs, communications support, specialized service-wide missions, space support and associated base operations. Details for the National Foreign Intelligence Program (NFIP) resources are contained in the NFIP Congressional Budget Justification Book provided separately. Details for the Communications Security (COMSEC) Programs are contained in the National Security Agency (NSA) Congressional Budget Communications Justification Book, also provided separately.

Consolidated Cryptologic Program (CCP) National Foreign Intelligence Program (NFIP) consists of the resources required to carry out the Signals Intelligence (SIGINT) mission of the Air Force, which involves the performance of highly specialized technical functions in support of the intelligence activities of the U.S. Included are resources for cryptologic communications and all ground SIGINT stations. CCP activities provide intelligence for planning and development of national policy as well as support to national, departmental and tactical users by providing indications and warning of actions by foreign powers and groups which may affect the interests of the U.S. CCP activities also support military operations by furnishing accurate and timely intelligence to national command authorities, departments, and U.S. operational forces.

General Defense Intelligence Program (GDIP) National Foreign Intelligence Program (NFIP) includes a wide variety of intelligence collection, production, processing and dissemination activities which provide foreign military, scientific and technical intelligence for the Air Force, DOD, and national users. The Air Force GDIP activities include providing intelligence for planning and development of national policy for U.S. weapons systems and for force structuring. Air Force GDIP activities also support national, departmental and tactical users by providing indicators and warnings of actions by foreign powers and groups which may affect the interests of the United States. Finally, these GDIP activities support military operations through the provision of accurate and timely intelligence to national command authorities, departments, and U.S. operational forces.

Communications Security (COMSEC) Program includes resources to continually assess hostile threats to Air Force communications and to counter threats by procedural and technical means.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

Other Communications. This activity group includes services to support the National Military Command System (NMCS) support, the National Emergency Airborne Command Post (NEACP), Electromagnetic Compatibility Analysis Center, the Worldwide Military Command and Control System (WVMOCS-ADP), management headquarters, the Air Force Satellite Communications System, the engineering and installation of communications systems, the Satellite Control Facility, the Satellite Data System, the Defense Meteorological Satellite Program, and base communications Air Force-wide.

Station Operations-Communications. This activity group includes communications support for the National Military Command System (NMCS), National Emergency Airborne Command Post (NEACP), and Air Force Communications, Long-Haul Communications-DCS, Satellite Control Facility (SCF)-Communications, Weather Service Communications, and Communication Terminals.

Leased Communications. This activity group includes communications to support the Long Haul Communications of the Defense Communications System, and Non-Defense Communication System.

Service-Wide Activities. This activity group provides for continued management, operation and maintenance of meteorological and aerospace environmental services, air traffic control, approach and landing systems, search and rescue systems, investigative activities, weapons storage systems, electronic combat intelligence support, and classified programs.

Space Support. This activity group provides consolidated launch tracking, telemetry and command services for operational DOD space programs. The consolidated launch support provides a continuing launch capability to support expendable launch vehicle capability at Cape Canaveral AFS, FL and at Vandenberg AFB, CA. Space support also includes a space-based, all-weather, radio navigation system, upper stage launch services, space shuttle flight charges, and Vandenberg shuttle launch and landing site operations.

Base Operations. This activity group includes resources for real property maintenance and base operating support for activities in Major Force Program 3.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Other Communications

I. NARRATIVE DESCRIPTION:

- a. This activity group provides for non-leased communication requirements to support the functions of information management, headquarters/base level operations, and military command and control. Specifically, it supports Air Force requirements within the overall military command, control and communication network (eg. the World-Wide Military Command and Control System). The activity group also provides for the management, operation and administration of the Air Force's Information Management Automation Program. Further, it covers other miscellaneous support requirements at the headquarters and base levels.
- b. This activity group provides, manages, operates and maintains a worldwide Communications, Command and Control (C3) capability to support the National Military Command Center (NMCC), National Emergency Airborne Command Post (NEACP), National Military Command System (NMCS), Worldwide Military Command and Control System (WMCCS)-ADP, Air Force Communications Command - Engineering and Installation (E&I), Minimum Essential Emergency Communications Network (MEECN), the Standard Information Systems Center (SISC), Air Force Computer Acquisition Center (AFCAC), 2nd Information Systems Group, Management Headquarters, and base communications systems.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for pay of personnel, travel, transportation, contract communications, printing and reproduction, other contract services, aviation fuels, supplies and equipment costs associated with this activity group.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Other Communications

III. FINANCIAL SUMMARY (QRM \$ in Thousands):

A. SUBJECTIVITY BREAKOUT	FY 1987	FY 1988			FY 1989

4. Functional Program Transfers.....		\$0
5. Price Changes.....		\$-666
a. FY88 Pay Raise.....	\$+1,706	
b. FY88 Health Benefits Increase.....	+711	
c. Federal Employees Retirement System (FERS) Changes.....	-3,083	
6. Appropriation Transfer.....		\$-1,500
a. CHAMPUS Program Financing.....	\$-1,500	
Transfer out for part of the Air Force share (\$152.3M) to finance the underfunded CHAMPUS Program.		
7. Program Increases.....		\$+1,200
		220

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Other Communications

- a. Minimum Essential Emergency Communications Network..... \$+1,200
 Funds are required for land purchase of forty-five Final Operational Capability relay node sites. Any reduction would necessitate leasing the sites instead of purchasing them and cause an increased life cycle cost to the government. Funds sourced from other lower priority AF requirements.

8. Program Decreases..... \$-4,534
 a. Information Management Automation Program..... \$-2,134
 This decrease impacts the following programs:

- 1) Reduced contract services funds..... \$-1,470

will decrease the number of contract computer programmers and systems analysts supporting the Standard Base Supply System (SBSS), the Contingency Operations Mobility Planning and Execution System (COMPES), the On-Line Vehicle Interactive Management System, and the Standard Base Level Computer Systems (SBLC) formerly known as Phase IV. The reduction will delay all software modifications for these programs. In addition, the time required to correct software problems will be significantly extended resulting in the expenditure of additional manhours at base-level to perform day-to-day activities.

- 2) Base Contracting Automated System (BCAS)..... -446

Eliminates all on-call maintenance funds for BCAS sites Air Force-wide. Base level BCAS users will be forced to fund on-call maintenance costs from Base Operating Support (BOS) funds, thereby further reducing their capability to fund other essential base-level requirements.

- 3) Transportation Operation Personal Property Standard System (TOPS) -131

Eliminates funds for maintenance of TOPS hardware being installed at SSC in FY88. Without preventive maintenance, correction of major hardware problems

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Other Communications

would be delayed and could cause the system to become non-operational.

4) Combat Supply Management System (CSMS)..... -51

Eliminates all contract analyst support as of 31 Mar 88 for software quality assurance and technical support. Resulting software problems could effect war readiness and sustainability.

5) Work Information Management System/Service Information Management System (WIMS/SIMS)..... -36

.Eliminates all funding for maintenance of the Standard Systems Center's (SSC) development and quality control system for WIMS/SIMS. Without preventive maintenance, correction of major hardware problems would be delayed and could cause major portions of the system to become non-operational.

b. AFCC Engineering and Installation Projects..... -1,500

Due to austere funding in FY88, AFCC is forced to cut back 30% of planned E&I for programs vital to the Air Force's readiness and sustainability. This action will cause a backlog of approximately 150 projects which will not be designed, scheduled, or accomplished. This could result in equipment downtime and increase manhours expended by system users in accomplishing day-to-day activities. The effects on control tower systems could impact flying operations.

c. VMMCCS-ADP..... -750

This decrease represents a reduction in funding required for contractual services to develop software for joint deployment efforts. Requirements were decreased as a result of the transfer of some activities to the new Transportation Command and in response to overall O&M funding shortfalls.

d. AFCC Travel Requirements..... -150

This reduction represents a decrease in AFCC for all administrative travel.

9. FY 1988 Current Estimate..... \$254,839

10. Functional Program Transfers..... \$0

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Other Communications

11. Price Growth.....	\$+8,823
a. Stock Fund.....	\$+37
b. Industrial Fund Rates.....	0
c. Annualization of FY88 Civilian Pay Raise.....	+562
d. FY 1989 Civilian Pay Raise.....	+1,481
e. FY 1989 Health Benefit Increase.....	+238
f. Federal Employee Retirement System (FERS) and Health Benefits.....	+351
g. Contract Price Change.....	+2,565
h. Other Price Growth.....	+3,589

12. Program Increases.....

a. AFCC Engineering and Installation Equipment (FY88 Base, \$95,550)..... \$+3,662

Restores partial funding (\$+750, approximately 78% of requirement) of planned E&I for Air Force programs as well as providing for replacement equipment (\$2,912) in support of the E&I mission. Such requirements include cable splicing equipment, tools, portable transmitters/receivers, and microfiche readers/printers. Obsolete equipment must be replaced so that communication upgrades can be effectively and efficiently accomplished.

b. WIS Joint Program Management Office (JPMO) (FY88 Base, \$5,265)..... +1,879

Increased funding provides for preparation of full scale development of WIS capability (Block C) where the JPMO will be performing trade-off analysis, exploration of alternative ADP solutions, and requirements definition work. Block C initiates concept definition of communication requirements needed to support mobilization, deployment and sustainment activities. Lack of funding will delay JCS required improvements to WIMCCS.

c. NEACP/E-4B Class V Modifications (FY88 Base, \$32,139)..... +1,675

Due to technical difficulties in equipment development, the E-4B classified modification has slipped to FY89.

d. Base Communications (FY88 Base, \$1,646)..... +1,029

Provides for 85% restoration of the base communications requirements decreased in FY88 due to austere funding. Funding will provide for services at the Kelly Complex servicing San Antonio, TX and the DMATS operation in Dayton, OH. Lack of sufficient funding would effect the availability of communication lines, switchboard personnel, and equipment. The reduction in communication capabilities will result in

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Other Communications

many wasted manhours among base level users attempting to accomplish day-to-day activities.

- e. National Military Command Center (FY88 Base, \$3,652).....+245
Increased funding provides for upgrade and maintenance costs of various systems to support the National Military Command Center. Failure to upgrade these systems increases their vulnerability.
- f. Management Headquarters (FY88 Base, \$18,449).....+111
Restores travel funds to seventy-five percent of requirement. Additionally, funds provide for specialized communications requirements within the headquarters.
- g. National Military Command System-Wide Support (FY88 Base, \$51).....+13
This increase represents full year funding of minimum essential civilian support.

13. Program Decreases.....\$-19,417

- a. Information Management Automation Program (FY88 Base, \$55,758).....\$-7,582
Reduces funding (\$-7,070) for the Cargo Movement Operations System (CMOS) and the available dollars for contracting life cycle software maintenance and modification of SBLC, COMPES, SBSS, OLVIMS, and CBAS. Civilian Personnel are also reduced (\$-512). Funding reductions, due to fiscal constraints, will delay implementation of the CMOS program. CMOS was initiated in 1987 to improve the method of identifying, palletizing and scheduling cargo to support deployment operations. CMOS would also permit tracking cargo in-route to permit diverting supplies to where they are most needed in the operational theater.

- b. VMMCCS Automated Data Processing (FY88 Base, \$22,607).....\$-4,532
Reduces manpower (\$3.5M) as a result of 3 actions: (1) the transfer of the Joint Deployment Agency to the new Transportation Command, (2) the conversion of Readiness Command to the Southern Command, and (3) the general reduction in headquarters manning. In addition, supplies, TDY, other purchased services, etc. have been reduced approximately \$1 million due to reductions in civilian personnel.

- c. VMMCCS Information System (WIS) (FY88 Base, \$17,949).....-2,973
Reduction slips procurement and installation of hardware to replace Air Force VMMCCS equipment in local area networks at thirteen sites. The overall replacement program slipped approximately 18 months due to lack of sufficient procurement funding.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Other Communications	
d. AFCC Engineering and Installation Manning (FY88 Base, \$95,550).....	-2,368
Civilian Personnel reductions as part of overall headquarters manning reductions.	
e. Two Less Civilian Workdays.....	-797
f. Minimum Essential Emergency Communications Network (MEECN) (FY88 Base, \$1,773).....	-635
Terminates GWEN at thin line nodes without the required portables for dispersal bases or airborne insertion terminals. Due to funding constraints, the overall number of land sites to be leased/purchased, to provide for relay nodes, has been permanently reduced. This will decrease the final size and capability of the GWEN Network.	
g. Performance of Commercial Activities.....	-530
The reduction is based on anticipated savings to be achieved from future conversions to contract in accordance with the requirements of OMB Circular No. A-76.	

14. FY 1989 Budget Request (Amended)..... \$252,859

FORCE PROGRAM INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP Station Operations - Communications

1. NARRATIVE DESCRIPTION:

a. This activity group provides for non-leased communication requirements for several key communication functions. It supports ground-level operations and maintenance requirements for mobile and fixed-based communication systems. It also provides for weather service communication requirements and for the connection of individual stations and sites to the Air Force and Defense Communication Systems.

b. This activity group supports communications requirements for the National Emergency Airborne Command Post (NEACP), National Military Command System (NMCS), Defense Satellite Communications System, Electromagnetic Compatibility Analysis Center (ECAC), Long-Haul Communications-DCS, Air Force Satellite Communications (AF SATCOM) System, Weather Service, Satellite Control Facility, and Air Force Communication Service (AIRCOM).

11. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for pay of civilians, travel, transportation, utilities and rents, payments to Foreign National Indirect Hire (FNHI) personnel, other contract services, supplies and equipment costs.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Station Operations - Communications
 needed to complete hook-up of distribution plants at base-level.
 Delays upgrade and expansion of communication capabilities at affected
 bases. Results in delays for communication support for new facilities
 and interfacing computer systems.
 b. Long Haul Communications (DCS) Contract Maintenance. -726
 Reduces funding for contract maintenance at overseas DCS transmission
 sites. The reduction in repair capability will increase downtime on
 already overtaxed communication systems.

9. FY 1988 Current Estimate.....	\$194,702
10. Functional Program Transfers.....	
11. Price Growth.....	\$0
a. Stock Fund Increase.....	
b. Industrial Fund Rates.....	\$+24
c. Annualization of FY 1988 Civilian Pay Raise.....	0
d. FY 1989 Civilian Pay Raise.....	+286
e. FY 1989 Health Benefit Increase.....	+1,045
f. Federal Employees Retirement System (FERS).....	+166
g. Contract Price Growth.....	+196
h. Other Price Growth.....	+4,020
	+820

12. Program Increases.....	\$+27,870
a. Satellite Communications Terminals (FY 88 Base, \$22,479).....	
Requested funds are for Jam Resistant Secure Voice terminals at six	
sites located in Turkey(2), Cape Cod, Alaska, and North Dakota and	
Illinois. These are new electromagnetic pulse hardened sites scheduled	
to come on-line in FY89. Thus far, approximately \$30 million in	
communication/electronic funding and \$10 million in MILCON funding has	
been expended on these sites, which are required for the strategic	
connectivity of the system. Without the requested funding, the sites	
cannot be brought on-line.	\$+6,021

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Station Operations - Communications

- | | | |
|----|--|--------|
| b. | Air Force Satellite Communications Systems (FY 88 Base, \$9,102).....
Funds are essential to supporting communications requirements necessary to the first launch of MILSTAR. Requirements data concerning this program are classified. Acceleration of the program, required by the FY88 Defense Appropriation Act, will result in additional funding requirements in FY89 to provide for communications support. | +5,320 |
| c. | Satellite Control Facility Communications (FY 88 Base, \$8,690).....
The increase to SCF Communications is for switch board system operations for interfacing Sunnyvale AFS with its remote tracking station. In addition, it provides for communication hook-up requirements at two new remote sites (Falcon AFS and Oakhanger AFS). These two locations are scheduled for initial operational capability in FY89. Lack of funding will delay activation and allow approximately \$60 million, in funds already invested, to sit idle. FY88 base funding provided for the operation and maintenance requirements of day-to-day activities. | +4,487 |
| d. | Defense Switch Network (FY 88 Base, \$32,345).....
These increased funds are required to install connections in support of the Defense Switch Network in the Pacific and Europe. The increase is necessary in support of efforts to move towards meeting JCS prescribed standards for communications capabilities in these two locations. Lack of funding will contribute to delaying improvements to the aged, inefficient and inadequate communication systems in these highly sensitive areas. | +4,565 |
| e. | Air Force Communications - BIDDS (FY 88 Base, \$105,610).....
Increased funding is required for the BIDDS program due to slippages resulting from reduced FY 88 funding and additional FY89 requirements. Funding is required for cable and telephone instruments. Without sufficient O&M funding, hook-up of distribution plant switches cannot be completed to meet established schedules. This will degrade base mission capability by failing to provide required communication support for new facilities and interfacing computer networks. Further, an insufficient supply of telephone instruments could increase manhour | +3,652 |

FORCE PROGRAM ||| INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Station Operations - Communications

utilization expended by base level users in performing day-to-day activities.

+1,840

f. Defense Satellite Communications System (FY 88 Base, \$2,632).....
This increase represents a survivability requirement for a DSCS system at Falcon AFS to support the CINCSpace mission as well as correcting scarce funding shortfalls. DSCS was cut 62% below the FY88 budget request. Funds must be restored just to sustain the capability of our current satellite network. Without the additional funding, orbital support and anomaly analysis cannot be performed for satellites already in orbit. Loss of this capability will result in degradation in the health of the current system and in support provided to users. The increase restores funding to only 56% of requirement.

+378

g. Weather/NOTAM Communications (FY 88 Base, \$6,245).....
Increased funding is required to provide weather support for the Air Force and the Army. This allows for the dissemination of satellite imagery that is essential to proper flight planning and without it, flight safety would be impaired. Minor contract changes caused the increase.

+85

h. NEACP-Communications (FY 88 Base, \$96).....
Resources are required for specialized communications equipment to be used as spare/replacement equipment such as protocol converters and circuit boards. Lack of funding for specialized equipment could impact the effectiveness of NEACP communications.

+1,522

i. AFCC Manpower Realignment.....
Realigns manpower authorizations between AFCC program elements to properly reflect manpower usage. Transfers authorizations and funding for 42 civilian positions from PE 33196 (Base Operations) to PE 33112 (Air Force Communications).

13. Program Decreases..... \$-5,190
a. Air Force Communications (FY 88 Base, \$105,610)..... \$-3,590
Civilian personnel reduction of 129 positions as a result of AFCC Communication Division cutback.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Leased Communications

I. NARRATIVE DESCRIPTION:

This activity group centralizes the leased communication requirements of the overall communication function. It provides for the management and operation of commercial communications systems and networks to support both the Defense Communications System (DCS) and Non-DCS Systems. The requested funds will provide for a leased communications capability to insure full support of the strategic, tactical and airlift forces.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for leased long-line communications for the National Emergency Airborne Command Post (NEACP), the National Military Command System (NMCS), the Air Force Communications System (AIRCUM), the Weather Service, Air Force Communications Command (AFCC) Command & Control Systems, the Satellite Control Facility, and the Defense Meteorological Satellite Program (DMSF).

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Leased Communications

a. CHAMPUS Program Financing..... \$-2,766

Transfer out for part of the Air Force share (\$152.3 million) to finance the underfunded CHAMPUS program.

\$+10,890

7. Program Increases..... \$+10,890

a. Long Haul Communications - DCA/JCS Programs.....
Funds were transferred in from lower priority projects/programs to cover the existing "must-pay" Communications Service Industrial Funds (CSIF) billings (reference Exhibit 43-A, line 5.A). The funds will cover JCS/OSD directed programs/services to include, but not limited to, downscoped conversion to the Defense Data Network and funding 75% of routine AUTOVON requirements.

\$-3,203

8. Program Decreases..... \$-3,203

a. Air Force Communications - AUTODIN Equipment.....
Due to fiscal constraints in FY 88, the Air Force was forced to discontinue maintenance of its AUTODIN equipment to a level which will cause spot equipment failure.

\$263,509

9. FY 1988 Current Estimate.....

\$0

10. Functional Program Transfers.....

\$+13,174

11. Price Growth..... \$+13,174

a. Industrial Fund Rates.....

\$+52,705

12. Program Increases.....

(NOTE: The dollars addressed below are cross-referenced in the President's Budget, Exhibit 43-A, Line 5.A.)

a. Long Haul Communications - DCS (FY 88 Base, \$209,909)..... \$+36,932

1) Defense Switch Network (DSN) (FY 88 Base, \$181,091)..... \$+28,285

a) This increase of \$14,400 is required for replacement and upgrading of circuits, switches and network control facilities within the Pacific and European theaters. These are JCS/OSD directed

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP:	Leased Communications	
	changes necessary to improve communications reliability and survivability.	
b)	<p>Restoration of the routine AUTOVON circuits which were disconnected as a result of austere FY88 funding. The reduction in available circuits jeopardizes the reliability and survivability of the AUTOVON network. Restoration of these circuits, costing \$5,285, is required to return AUTOVON capabilities to 100% of the previous level of operation (excluding JCS programmed improvements).</p>	
c)	<p>JCS directed grade of service (GOS) increases have caused additional requirements of \$8,600. This will bring CONUS and overseas locations GOS to a uniform P.20 (which means for every 100 calls made, 20 may be blocked). As a comparison, the accepted standard within the commercial industry is no more than 1 call blocked per 100.</p>	
2)	<p>Secure Voice Improvements (FY 88 Base, \$161)..... Additional funds are required to support the secure conferencing project and secure voice maintenance for the National Military Command Center, Tactical Air Command, and Military Airlift Command. Without these funds, secure communications among these key agencies cannot be assured, adversely affecting their wartime preparation and warfighting capability.</p>	+5,115
3)	<p>Defense Data Network (DDN) (FY 88 Base, \$18,657)..... This increased funding is necessary for the build-up of equipment and circuitry to support full network configuration due for completion in FY 90. These items were previously budgeted for and purchased with 3080 funds. They have since been realigned into the CSIF rate structure to be reimbursed by the O&M users. Without this funding, priority systems</p>	+3,532

FORCE PROGRAM III INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Leased Communications

cannot be connected to the DDN and a potential 20% cost savings will not be realized. Continuing to maintain the systems on Long-haul Leased Lines would cost the Air Force approximately \$4,238. Further delays in converting to the DDN will result in higher long-term costs, since potential discounts under the planned User Billing System could not be realized.

\$-12.403

b Air Force Communications (FY 88 Base, \$17,725)

1) Maintaining/Leasing AUTODIN/AUTOVON

Equipment (FY 88 Base, \$5,487)

\$-10.557

The additional funds are required to restore maintenance of AUTODIN equipment as well as equipment leases for Command and Control AUTOVON. These funds were severely reduced in FY 88 due to funding constraints and the need to fund higher priority projects/programs. This increase will raise maintenance to 80% of the required level.

\$-1.846

2) Project 688AJ (FY 88 Base, \$12,238)

Classified Program.

c. NMCS-Wide Support - for OSD Crisis Coordination Center

(FY 88 Base, \$7,467)

\$-1.203

This increase provides full year funding of the maintenance contract for the OSD Crisis Coordination Center (CCC). Without additional funding, the Air Force cannot provide necessary maintenance for key CCC computer systems nor connect the CCC to the Secure Video Teleconferencing System. This will significantly curtail OSD's ability to respond in crisis situations.

d Defense Meteorological Satellite Program (DMSP)

Communications (FY 88 Base, \$1,247)

\$-978

Funding is required to initiate a communications link for the new Fairchild Satellite Operations Center scheduled to go operational in FY89. Funding will provide the primary communications capability for the \$30 million facility currently being completed.

\$-941

e. NEACP - Communications (FY 88 Base, \$10,804)

FORCE PROGRAM INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Leased Communications

Requested increase is for projected one-time costs associated with the relocation of ground entry points resulting from election requirements.

8-248

1. Weather Service Communications (FY 88 Base, \$10,446)
Provides increased funding to cover minimum requirements for weather and space forecast systems

13. Program Decreases

90

14. FY 1988 Budget Request (Amended)

\$329,308

FORCE PROGRAM INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP Service-Wide Activities 1. NARRATIVE DESCRIPTION

This activity supports the operating costs of: the Air Force Weather Service; Defense Meteorological Satellite Programs; Air Traffic Control; Approach and Landing System (TRACALS); DOD Civil Search and Rescue; Security Investigation Activities; Weapons Storage and Security Systems; Installation Audiovisual Support; and Classified Programs.

Air Force Weather Service provides for continued management, operation and maintenance of USAF meteorological and aerospace environmental services capabilities. It assures: the general and specialized support required by Air Force and Army units unique worldwide centralized support services provided by the Air Force Global Weather Central and USAF Environmental Technical Applications Center; a weather reconnaissance capability in support of national hurricane/tropical storm advisory centers; the observation/forecast capabilities essential for assessing solar activity impacts on the earth's near space environment; and the organizational/intermediate level maintenance of various meteorological equipment.

Defense Meteorological Satellite Program (DMSP) provides global visible and infrared cloud cover data and specialized meteorological, oceanographic and solar-geophysical data to support worldwide DOD strategic and tactical missions. DMSP consists of operational satellites, satellite command and control systems, ground-based strategic weather data processing equipment at Air Force Global Weather Central, and tactical data readout terminals at key locations worldwide.

Air Force Air Traffic Control Approach and Landing System (TRACALS) combines Air Force ground facilities and equipment with associated avionics, personnel, and procedures to support safe, orderly, and expeditious aerospace vehicle movement on a worldwide basis. It includes DoD common systems not provided by the Federal Aviation Administration (FAA) in the following major functional areas: enroute and terminal navigation, approach and landing, air traffic control communications, air traffic control simulators, operational evaluations, and navigational and flight inspection. It also provides selected support for the Air Traffic Control Enhancement system in restricted airspace over the Mojave Desert, and other special activities.

The DOD Civil Search and Rescue program supports a joint DOD, DOT, NOAA, and NASA agreement which tasks participation in an international Satellite-Aided Search and Rescue (SARSAT) program during the demonstration and transition phases (FY 1982-89), including SARSAT ground station at Scott AFB and personnel to man 24-hour a day coverage during the test demonstrations. The systems involved will become fully

FORCE PROGRAM : INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Service-Wide Activities
operational in FY 1990, and will use both Russian COSPAS and NOAA satellites to monitor civilian emergency distress beacons.

The Air Force Office of Special Investigations (AFOSI) is a centrally directed organization accomplishing its mission at 150 units located at CONUS and overseas. These units are tasked with the full range of the AFOSI mission. AFOSI is authorized special agents and these agents are assigned to units responsible for conducting criminal and fraud investigations, antiterrorism and protective security operations, and counter intelligence security polygraph program. Most AFOSI units directly support active USAF installations. HQ AFOSI provides operational guidance to the field units and serves as the principal point of interface with other service and national governmental investigative agencies.

The Weapons Storage and Security System provides vaults and associated intrusion detection equipment underground in theater aircraft shelters in both Europe and the Pacific.

The Electronic Combat Intelligence Support program includes maintenance of and improvements to data bases for Electronic Warfare (EW) and Command, Control, Communications Countermeasures (C3CM) strategies, and the specialized task of suppression of enemy air defense (SEAD). The data bases produce tailored information supporting the EW acquisition process, C3CM strategy development and applications, and the operations of all Air Force electronic combat assets.

This activity group includes installation audiovisual support for the Satellite Control Facility, AFOSI and classified activities.

II. DESCRIPTION OF OPERATIONS FINANCED:

Air Weather Service (AWS) resources provide for civilian personnel pay, aircraft operations and for extensive ADPE. Civilian personnel are assigned to centralized forecast facilities headquarters, wing, and squadron staffs, and many of the 180 plus AWS units supporting Air Force and Army units. Extensive ADPE are required at the USAF Global Weather Central and USAF Environmental Technical Applications Center to collect, assimilate and analyze worldwide space environmental data for specialized support to DOD, USAF, and US Army customers. AWS continues the management, operation and maintenance of meteorological capabilities in support of Air Force and Army missions. Sustains an aircraft weather reconnaissance capability to perform specialized missions in support of national requirements. Provides for a space environment observation and forecast capability required to continuously monitor solar activity and assess its impact upon military space systems, communications, and strategic defense systems.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Service-Wide Activities

Defense Meteorological Satellite Program (DMSP) provides funds for contractor support of launch and early orbit command and control, on-orbit analyses, and daily command and control of spacecraft. Resources support operation and maintenance of a command read-out station and two Satellite Operations Centers of the 1000th Satellite Operations Group (AFSPACECOM) at Offutt AFB, which conducts on-orbit satellite operations. Support and service contracts for ground equipment maintenance are provided. All satellite flight software validation, verification, modification, and maintenance are performed with O&M funds.

TRACALS resources provide for the operation and maintenance required to support the Air Force air traffic control mission. This includes support for LORAN-C/D equipment in PACAF, integrating new radars and communications equipment into the R-2508 test range complex in the upper Mojave Desert, contract air traffic control services in support of the Air National Guard at various locations, AFCC contract engineering technical services, AFLC service engineering, allied support, and support to the HQ MAC Flight Inspection and Evaluation Programs.

The DOD Civil Search and Rescue program provides DOD funding to support a joint DOD, DOT, NOAA and NASA agreement to conduct an international demonstration program using the Satellite-Aided Search and Rescue (SARSAT) system to aid in the search and rescue of aircraft and ships in distress. Provides SARSAT distress alert station and mission control center at Scott AFB and personnel to man 24-hour-a-day coverage to act as the focal point during the demonstration and transition phases (FY 1982-89) for dissemination of appropriate satellite data and search and rescue information to international participants. The system is programmed to become fully operational in FY 1990. SARSAT provides support planning for possible operational follow-on program. The program uses both Russian COSPAS and NOAA satellites to monitor emergency distress beacons.

The Office of Special Investigations provides for investigative support to Air Force activities worldwide. It provides training of special agents to fill anticipated losses to the investigative force and on-going professional training to enhance the effectiveness of the existing force; provides for continued technical and forensic support of investigations; provides protective services for distinguished persons; operates Air Force antiterrorist programs; and provides professional investigative support to commanders at all levels in response to their requests. In addition, improves technical, polygraph and forensic support for investigations through acquisition of technologically improved equipment and enhanced techniques. Upgrades follow-on training to improve quality and achieve greater productivity in order to handle increased case load within current manning constraints.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Service-Wide Activities

Weapons Storage and Security Systems provide for supervision and inspection of Nuclear Weapon Storage and Security System (WS3) Program storage vaults and associated intrusion detection equipment. Inspections are performed in theater aircraft shelters in both Europe and the Pacific.

The Electronic Combat Intelligence Support program provides Air Force Electronic Warfare Center (AFEWC) resources to perform analysis and documentation needed to validate simulators for USAF test and operational elements. Also funds the Electronic Warfare Data Base development at the Foreign Technology Division (FTD) and the Red C3QM data base development at Electronic Security Command (ESC). Provides test range support to the operational test and evaluation of acquired foreign EW and C3QM systems.

The installation audiovisual support program provides audiovisual support for the Satellite Control Facility, the Office of Special Investigations (OSI) school and other OSI activities, and classified activities.

Classified Program. Details will be made available to cleared persons upon request.

FORCE PROGRAM INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Space Support

I. NARRATIVE DESCRIPTION:

This activity provides consolidated launch and orbital support for operational DOD space programs.

The Satellite Control Network (SCN) (formerly the Satellite Control Facility (SCF)) includes the Consolidated Space Test Center (CSTC), Onizuka AFB, CA, the Consolidated Space Operations Center, (CSOC) Falcon AFS, CO, thirteen remote satellite tracking stations (at 8 worldwide locations) and various other facilities for launch and on-orbit satellite support. The SCN provides the telemetry, tracking and command capabilities to support launch, on-orbit checkout and sustaining operations for approximately 55 DOD satellites in numerous orbits, configurations and designs. Orbital support requirements are directly related to the hardware design and mission complexity of each satellite family supported.

The Consolidated Space Operations Center is the headquarters and a primary control node for the AFSCN. It contains mission control center for DSP, DMSP, GPS and communications satellites, a backup to the Range Control Complex at CSTC, a network communications control center and hosts the GPS master control station.

The Space Boosters program provides consolidated launch and orbital injection support to DOD space programs. Consolidated launch support includes expendable launch vehicle activities at Cape Canaveral AFS, FL and Vandenberg AFB, CA for Titan 34D, Titan IV, Atlas E, Titan II and Delta II space boosters. This program must satisfy the launch requirements of the DOD satellite programs. Booster mission planning and launch requirements are a function of the number of satellites on-orbit, launch successes and failures, and on-orbit replenishment requirements.

The Navstar Global Positioning System (GPS) is a space based, all weather, radio navigation system capable of providing 16m (spherical error probable) (SEP) accuracy to authorized users. GPS also includes sensors for the Nuclear Detonation (NUDET) Detection System (NDS) which provides a highly accurate detection and location capability for the National Command Authority (NCA) and the CINCs.

The Space Launch Support Program provides Shuttle consolidated mission planning, payload integration and launch, and orbital support for operational DOD space programs. The consolidated launch support includes the Inertial Upper Stage (IUS) launch services, GPS Payload Assist Module-Delta II (PAM-D II), Upper Stage launch services, Space Shuttle flight reimbursements (orbiter flight charges), the Vandenberg Space Shuttle Launch and Landing Site preservation and other Shuttle mission support activities. This program provides the centralized management for Shuttle launch and upper Stage orbit injection support

FORCE PROGRAM INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Space Support

requirements of DOD national security satellite programs and satisfies their requirements for Air Force missions. Shuttle and upper stage mission planning and launch requirements are a function of the number of satellites on-orbit and their success and failure rates.

II. DESCRIPTION OF OPERATIONS FINANCED:

The Air Force Satellite Control Network (AFSCN) consists of the Consolidated Space Test Center (CSTC), Onizuka AFB, CA, the Consolidated Space Operations Center (CSOC), Falcon AFS, CO, thirteen remote satellite tracking stations located at 8 worldwide locations and various other satellite support facilities to support launch and on-orbit satellite requirements. The AFSCN operates 365 days-per-year, 24 hours-per-day conducting over 85,000 satellite operations annually. Funding provides for contractor operation, maintenance and technical management of the AFSCN. Contracts include the Ford Aerospace Communications Corporation for remote station operations and Lockheed Space and Missile Company for CSTC mission control complex operations. Funding also provides for government civilian manpower, lease of facilities, logistics and shipments to/from remote tracking stations, and travel of military and DOD civilian personnel for support of AFSCN operations.

The Consolidated Space Operations Center (CSOC), a part of the AFSCN but separately funded, began initial operations in FY 1986 with the activation of the GPS Master Control Station. During FY 1989, CSOC will activate two Mission Control Complexes (MCCs) for operational support of GPS, DSP, DMSP and Communication satellites. CSOC will provide expanded satellite control capacity from a new mid-CONUS location, accommodate increased AFSCN workload and provide increased survivability. Full operational capability and total integration into the AFSCN is scheduled for late FY 1990.

The Space Boosters program funds booster processing, booster/payload integration and launch operations for the following vehicle systems: Titan 340, Titan IV, Titan II, Atlas E, and Delta II. Expendable vehicles are launched from four pads at Cape Canaveral AFS, FL and two pads at Vandenberg AFB, CA. Fluctuations occur in annual launch requirements due to changes in spacecraft on-orbit configuration and health. Other funding fluctuations are caused by Titan II/Titan IV/Delta II phase-in which overlaps with Titan 340/Atlas E phase/out. The FY 89 program provides for thirteen expendable vehicle launches.

The NAVSTAR Global Positioning System (GPS) funding will support all efforts associated with the Control Segment. The control segment is comprised of the Master Control Station (MCS) located at the CSOC, and three ground antennas and five monitor stations located world-wide. The MCS maintains satellite health

FORCE PROGRAM INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Space Support

and status and perform navigation updates as required. It also provides navigation status and satellite visibility information to a large user community for mission planning purposes. Funding for all hardware and software operation and maintenance is provided. GPS funding will also cover labor cost associated with modification of Air Force aircraft to install GPS on-board avionics systems. GPS system will be installed in all Air Force aircraft.

The Space Launcher Support program funds OOD Shuttle mission planning, payload integration and launch, and orbital support of OOD space programs. Funded activities include Shuttle controlled mode operations at the NASA Johnson Space Center, Goddard Spaceflight Center and Kennedy Space Center for secure OOD operations. The program also funds Inertial Upper Stage processing, integration and launch operations at the launch base, and Vandenberg Shuttle Launch Site maintenance in mothball status capable for future reactivation. Three missions are planned in FY 1989 of which one is a two month slip of the FY88 launch.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Base Operations
I. NARRATIVE DESCRIPTION:

This activity group comprises a variety of essential miscellaneous base operating functions not included elsewhere. Among these are: utility systems; maintenance, repair and minor construction of facilities; engineering services such as fire protection, crash rescue, custodial services, refuse collection, runway and street snow removal, and leasing of real property; a security force to protect aircraft, missiles, buildings, equipment, and to enforce the law; ground transportation to insure operational readiness; facilities and support to tenants on Air Force installations who service, assist, train and protect our forces; administrative and ADP services essential to operations; food, clothes, and housing for our support and operational forces; morale, welfare and recreation support to Air Force personnel and their dependents.

II. DESCRIPTION OF OPERATIONS FINANCED:

Funds provide for civilian salaries and benefits, transportation, rents, utilities, contractual services, supplies and equipment to operate and maintain routine base functions, as follows:

- A. Maintenance and Repair of Real Property. Includes work performed by base civil engineering trade shops including the cost of planning, scheduling, logistical support and supervision; and contractor performed maintenance and repair, design and technical inspection.
- B. Minor Construction. Includes all activities for the execution, installation or assembly of a new real property facility; or the addition, extension, expansion, alteration, conversion, or replacement of an existing real property facility through in-service or contractual effort. The O&M cost of each undertaking classified as minor construction cannot exceed \$200,000.
- C. Operation of Utilities. Includes purchase of all heat, light, water and power, operation of electric generating plants and distribution, operation of heating plants and distribution systems, operation of water plants and systems and waste water systems; and the operation of energy monitoring and control systems.
- D. Other Engineering Support. Includes in-service and contractual services for fire protection, aircraft crash rescue, custodial services, entomology services, refuse collection and disposal and snow removal. Finances the rental of real property and the costs of the administrative management of the base civil engineering office and military family housing management.

FORCE PROGRAM III: INTELLIGENCE AND COMMUNICATIONS

ACTIVITY GROUP: Base Operations

E. Administration. Includes all activities concerned with the headquarters command and administration of the Base; Organizational Effectiveness program; and other base-wide activities not otherwise provided for, such as comptroller activities.

F. Retail Supply Operations. Includes the operation of all base supply activities, customer support center, purchasing and contracting offices, clothing issue points and POL resale points.

G. Maintenance of Installation Equipment. Includes general support equipment vehicles, heavy duty transportation and installation equipment.

H. Bachelor Housing Facilities. Includes the administration of bachelor officer and enlisted quarters and the purchase, control, moving and handling of bachelor housing furnishings.

I. Morale, Welfare, and Recreation. Includes the staff, equipment, administration and operation of libraries, sports programs, child care services, open mess and other authorized activities.

J. Other Base Services. Includes security police, flight line terminal services, laundry and dry cleaning, base transportation, and other base-wide services.

K. Other Personnel Support. Includes chaplain activities, information program, food service, alcohol and drug abuse program, installation museums, reenlistment activities and miscellaneous services and support.

FORCE PROGRAM IV: AIRLIFT FORCES

1. DESCRIPTION OF OPERATIONS FINANCED:

The primary mission of the Military Airlift Command (MAC) is to provide strategic and tactical combat airlift to support contingency and wartime operations in pursuit of national objectives.

The rapid mobility of United States combat forces made possible by the MAC airlift forces is a major instrument of United States national policy to deter aggression through capability to rapidly respond anywhere in the world with effective combat forces that can be logistically sustained as required to thwart enemy threat or overt action. The Joint Chiefs of Staff (JCS) and the military services, as well as other Department of Defense (DOD) and government agencies, use MAC for essential cargo and troop movement. To assure responsiveness, MAC is responsible for adequately training and equipping other service components to insure the wartime capability to execute required JCS plans, maintain and operate global command and control systems, and operate a global airlift system.

The resources requested for airlift forces provide for mission operations in four major complementary mission areas: Strategic Airlift, Tactical Airlift, Special Operations and Combat Rescue, and Services and Support.

Strategic Airlift is a major contributor to US force projection by providing intertheater deployment and resupply airlift capability; a capability which, when required, can also augment tactical airlift's intratheater role. Strategic airlift can land or airdrop troops, equipment, and supplies. While accomplishing the peacetime readiness training requirements, the strategic airlift system produces airlift capability for use by DOD agencies to economically airlift personnel and cargo worldwide.

Tactical Airlift provides immediate and responsive air movement and delivery of combat troops, equipment, and supplies to meet specific theater objectives and requirements. This is accomplished through extraction, airdrop, or other delivery techniques. Tactical airlift provides air logistics support of air theater forces, including those engaged in combat operations, special operations and rescue interdiction, or armed reconnaissance operations.

Combat Rescue forces provide responsive, capable, and professional rescue service, both during peacetime and wartime to the USAF, DOD, and the nation. Forces are positioned in each major military theater to be readily available for contingency operations. Additional missions include Strategic Air Command (SAC) missile range support. Beginning in FY 88, Special Operations Forces resources are transferred to Force Program XI and only those resources associated with H-3 rescue forces are reflected in this activity group.

FORCE PROGRAM IV: AIRLIFT FORCES

Services and Support. As the DOD's single manager of airlift, MAC is responsible for the peacetime performance or procurement of air transportation and services required for the movement of passengers, cargo, mail, and other goods, including Special Air Missions (SAMs) and related support of the White House, Congress, and other high-level government official travel.

The principal means of financing the direct operation of the strategic and tactical airlift forces, services and support is through the Airlift Service Industrial Fund (ASIF). Certain portions of the airlift readiness training program, however, are paid from the O&M appropriation as an Air Force mission responsibility. The source of this financing is the Air Force Mission Account.

The Military Airlift Command (MAC) is organized on a global basis with headquarters at Scott AFB, Illinois. Airlift forces operate under the control of three "numbered" Air Forces. These contain 3 air divisions, 13 airlift wings, 1 military airlift support wing, 3 air base wings, 1 aeromedical airlift wing, 1 special operations wing, and common support of the Aerospace Audiovisual Service, Air Weather Service, and the Aerospace Rescue and Recovery Service. Resources requested in this Major Force Program are for operational support of the airlift force, initial upgrade, local area training of crews, advanced helicopter crew training, command and control, and field and organizational aircraft maintenance. Funding also supports DOD requirements for specific airlift missions such as Joint Airborne/Air Transportability Training, Special Airlift Missions, and other assigned mission responsibilities.

This Major Force Program is comprised of six activity groups. They are: (1) Assigned Airlift Mission, which provides for reimbursement to the Airlift Service Industrial Fund (ASIF) for those programs and activities assigned to the Air Force as mission and funding responsibilities; (2) Mission Support, which provides for operational support airlift forces, MAC airlift transition training for airlift and helicopter forces, MAC Command and Control System, and MAC Integrated Management Systems (MACIMS); (3) Special Operations and Combat Rescue Forces; (4) Command Support, which provides personnel; peculiar and support equipment, necessary facilities, and associated costs in support of Headquarters MAC and its detachments, Headquarters Twenty-first, Twenty-second, and Twenty-third Air Force, and the United States Transportation Command (USTRANSCOM); (5) Telecommunications and Command Control, which provides funds for the operation, maintenance, planning and programming of base communications-electronic services; and (6) Base Operations, which contains the O&M resources for the Air Force's weapon system launch and recovery capability from fixed bases and installations.

The minimum essential flying hour program for the global strategic airlift system has been funded through the ASIF since FY 1958, and since FY 1977 for the tactical airlift system. The flying hour program

FORCE PROGRAM IV: AIRLIFT FORCES

is scoped to provide essential aircrew training and strategic airlift system combat readiness. As a by-product, the flying hour program produces a peacetime airlift capability that is used by DOD customers who reimburse the ASIF for the services provided.

Under the ASIF operation, the Air Force does not request funds from Congress for airlift programs in the same manner as for other aircraft flying training programs. Rather, funding for the airlift peacetime training flying hour program is requested from Congress by the Services in various line items, such as second destination transportation, permanent change of station of personnel, and JCS exercises within the various appropriations comprising the President's Budget for the DOD. The funds appropriated by Congress for these purposes are then used to reimburse the ASIF for the airlift services and capability it provides as a by-product of the flying hour program. The ASIF and the airlift force are, therefore, dependent upon numerous appropriations within the DOD to provide critical balance between essential airlift aircrew readiness training requirements and available funding.

Funding is included in this Major Force Program for funding of specific airlift missions of the Air Force to support Joint Airborne/Air Transportability Training (JA/ATT); special airlift missions in support of the President, Congress, other high-level government official travel; and for the remainder of readiness training of the airlift crews that does not result in a saleable airlift by-product. Therefore, the cost of readiness training of the Air Force airlift crew forces is in part recouped through the ASIF by reimbursement from users of the by-product of airlift/cargo hauling capability generated, and in part, via direct funding support by the Operation and Maintenance, Air Force Appropriation.

Beginning in FY 88, the Special Air Mission (Assigned Airlift Mission activity group) is financed directly from appropriated funds in lieu of reimbursement to the ASIF. This change resulted in civilian personnel end strength being added to O&M, Air Force with a corresponding decrease to ASIF end strengths. Beginning in FY 88, Major Force Program IV also reflects the transfer of management headquarters functions from the ASIF. This transfer enables the Air Force to fully account for management headquarters in the O&M appropriation.

FORCE PROGRAM IV: AIRLIFT FORCES

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Assigned Airlift Mission

I. NARRATIVE DESCRIPTION:

This activity group provides for airlift and other services provided to programs/activities assigned to the Air Force and Military Airlift Command (MAC) as mission/funding responsibilities. Specifically, these are: the Special Airlift Mission (SAM); Joint Airborne/Air Transportability Training (JA/ATT); local area C-5, C-141, and C-130 aircrew training; ASIF maintenance and terminal support of non-industrial fund USAF aircraft; and permanent change of station (PCS) overseas movement of household goods for Air Force civilian personnel. Most of these requirements are in the form of reimbursements to the Airlift Service Industrial Fund (ASIF).

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for the following:

Local Area Training. Crew training not obtainable on routine missions. For example, aircrews are provided instructor and supervised training in emergency procedures which include unusual flight characteristics and simulated, engine-out landings. Also included in this category are flying hours required for annual instrument and proficiency flight evaluations.

Joint Airborne/Air Transportability Training (JA/ATT). Mutually beneficial proficiency and continuation training in a joint environment for airlift aircrews and members of the Air Force, Army, Navy, and Marine Corps to insure that the combat readiness of forces assigned to Unified Commanders (including forces assigned in the Alaskan theater) is maintained.

Special Air Missions (SAMs). SAM activity (C-9, C-135, C-137, C-140, C-20 aircraft) and directly related Special Assignment Requirements Directed (SARD) flights (C-5, C-141, C-130 aircraft) in support of the White House, Congress, and other high-level government official travel. Beginning in FY 88, the Special Air Mission is financed directly from appropriated funds in lieu of reimbursement to the Airlift Services Industrial Fund (ASIF). This change resulted in civilian personnel end strength being added to O&M, Air Force with a corresponding decrease to MAC's industrial fund end strengths.

Test and Ferry. Flying hours for testing and ferrying aircraft to and from contractor facilities.

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Assigned Airlift Mission

C-130 Rotations. Flying hours for deployment and redeployment of C-130 aircraft from the continental United States to Mildenhall Royal Air Force Base, United Kingdom, at 60-day intervals.

Maintenance/Terminal Support. The amount of ASIF terminal support and base and en route maintenance performed for O&M aircraft exceeding O&M support provided ASIF aircraft.

Other. Costs associated with household goods movement for civilian personnel in overseas locations and the Search and Rescue Service.

g. Other Price Growth.....		

8. Program Increases.....	\$+5,700	\$+26,351
a. AF-1 Contractor Logistics Support (CLS) (FY 88, Base \$0).....		

Provides CLS for the new AF-1. Funds are required for program operational planning (support for initial delivery), maintenance replenishment spares, and contract operational maintenance. Aircraft to be operational in FY 89.

b. Special Air Mission CLS (FY 88, Base \$24,454).....	+5,667
--	--------

Provides additional contract logistic support for the special air mission aircraft. Additional requirement due to an addition of one hot section inspection (C-9c), an increase in Contractor Operated and Managed Base Supply (COMBs) onsite/home office charge, increased depot requirements and replenishment benchstock requirements due to additional maintenance requirements (C-137), and increased engineering service costs due to additional requirements forecast for the aging fleet.

c. C-5 Flying Hour Increase (FY 88 Base \$36,464).....	+6,236
--	--------

C-5 flying hour increases reflect phased increase of two PAA due to C-5A transfer to the ARF and C-5B procurement. Training +479 F/Hs, JA/ATT +315 FHs and Test/Ferry +7 F/Hs.

d. C-141 Flying Hour Change (FY 88, Base \$67,093).....	+6,473
---	--------

Restores JA/ATT to FY 1987 level of effort to support Army requirements +3,293 F/Hs; includes decrease of -432 F/Hs as a result of program refinements in air refueling and credit for events accomplished on JA/ATT missions.

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Assigned Airlift Mission

e. Special Assignment Requirement Directives (SARDs). (FY 88, Base \$13,371)		
Supports increased requirements for VOLANT BANNER (Presidential flights) type SAAMs flown in support of the 89 MAW.	+1,312	
9. Program Decreases		
a. Two Fewer Workdays in FY 89 (FY88, Base 262 Workdays)		\$-1,713
b. C-130 Flying Hour Decrease (FY 88, Base \$80,561)		\$-28
C-130 flying hour decreases reflect phased reduction of five PAA and crew ratio reduction from 1.8 to 1.75. Training -937 F/Hs, JA/ATT -866 F/Hs and Test/Ferry -41 F/Hs.	-1,685	
10. FY 1989 Budget Request (Amended)		\$329,744

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Mission Support

NARRATIVE DESCRIPTION:

This activity group includes operational support airlift forces, Military Airlift Command (MAC) command and control systems, installation audiovisual support, and aircrew transition training for airlift and rescue forces.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources requested will insure that the Air Force can perform priority movement of personnel and cargo with time, place, or mission sensitive requirements during peacetime, contingencies, or wartime; and provide for pilot seasoning in peacetime. The Mission Support activity group provides airlift and rescue aircrew members and maintenance personnel with training required to meet readiness criteria. It maintains instructor readiness qualifications. In addition, it provides personnel, equipment, and facilities in support of worldwide MAC command and control system; data automation capability to accomplish command and control airlift planning, scheduling, and transportation management; and necessary base level audiovisual support at Military Airlift Command bases. The Mission Support Activity Group reflects the transfer in FY 88 of the management headquarters functions from the Airlift Service Industrial Fund (ASIF) to O&M, Air Force. This transfer enables Air Force to fully account for Military Airlift Command (MAC) management headquarters in the O&M appropriation.

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Mission Support

10. Program Increases.....		\$+48,916
a. C-STOL (FY 88, Base \$4,679).....		\$+6,604
Provides contract intratheater airlift to USSOUTHCOM in Central and South America and the Caribbean region. The main operating base will be Howard AFB, Panama, with a forward operating base in Honduras. The Aircraft are required to carry cargo and military passengers into and out of military and civilian airfields down to 1,500 feet in length.		
b. Senior Citizen (FY 88, Base \$0).....		+10,901
Classified program		
c. MAC Command and Control System (FY 88, Base \$24,636).....		+1,500
Increased funding for contractor services support for MAC C2 Red Switch requirements		
d. C-130 Aircrew Training System (ATS) (FY 88, Base \$17,093).....		+8,127
Increase is for full buildup of the C-130 ATS program begun in FY 88.		
e. Contract Conversions (FY 88 Base \$0).....		+1,130
Full year implementation of contract conversions for simulator maintenance and simulator platform instruction that were begun in FY 88. Functions were previously performed by military personnel.		
f. European Distribution System (C-23 A) (FY 88, Base \$0).....		+11,007
Full year operation of this readiness-sustainability program will require 18,784 Flying Hours. EDS is designed to ensure Air Force weapon system spares required to generate sorties in support of a NATO war are responsively distributed to preclude major mission degradation. This support should produce between 300 and 800 additional TACAIR sorties per day in war.		
g. Operational Support Airlift (OSA) Program (FY 88 Base \$62,626).....		+5,647
Reflects increased funds for contractor logistics support (CLS) due to additional requirements forecast for the operational support aircraft fleet.		
h. C-141 Aircrew Training System (ATS) (FY 88, Base \$0).....		+4,000
The C-141 ATS is a total contracted training system that provides

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Combat Rescue Forces

I. NARRATIVE DESCRIPTION:

The Combat Rescue Forces provide responsive, capable, and professional rescue service, both during peacetime and wartime to the USAF, DOD, and the Nation. Forces are positioned in each major military theater to be readily available for contingency operations. Additional missions include special operations augmentation, tactical weapons range support, and Air Force survival school rescue training.

In FY 88, all Special Operations Forces were moved from Force Program IV to the newly created Force Program XI. This action was directed by the Goldwater-Nichols, Department of Defense Reorganization Act of 1986 and the General Provisions of the H. J. Res. 738 (FY 1987 Continuing Appropriations Act). Only H-3 rescue forces remain in this activity group.

II. DESCRIPTION OF OPERATIONS FINANCED:

Combat rescue resources provide for civilian personnel pay, aviation fuels, supplies and equipment, and costs associated with wing headquarters, the ARRS headquarters, and field activities. Beginning in FY 88, only those resources associated with H-3 reserve forces are reflected in this activity group.

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Combat Support

I. NARRATIVE DESCRIPTION:

This activity group provides for costs in support of the Military Airlift Command headquarters and its detachments, and Headquarters Twenty-first Air Force, Twenty-second Air Force, and Twenty-third Air Force. Also, beginning in FY 88, it provides for costs in support of the newly established US Transportation Command (USTRANSCOM).

II. DESCRIPTION OF OPERATIONS FINANCED:

Supports management headquarters which provides administrative support of command and elements involved in managing peacetime logistics mission and preparing airlift forces to meet wartime objectives. Insures staff capability required for contingencies and natural disasters. Includes civilian personnel pay, travel, transportation, equipment rental, printing and reproduction, contractual services, supplies, and equipment. The Combat Support Activity Group reflects the FY 88 Management Headquarters transfer from the Airlift Service Industrial Fund (ASIF). This transfer enabled Air Force to fully account for Military Airlift Command management headquarters in a single appropriation.

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Telecommunications & Command Control Program Airlift Forces

I. NARRATIVE DESCRIPTION:

This activity group provides funds for the operation, maintenance, planning and programming of base communications-electronics services. These services include base telephone support, record communications (AUTODIN), intrabase radios, secure telephones, and other communications-electronics services.

II. DESCRIPTION OF OPERATIONS FINANCED:

Provides funds for civilian personnel, supplies, and leased communications-electronics services. The goal is to provide the airlift forces with a minimum acceptable level of communications-electronics capability to insure the efficient accomplishment of their day-to-day mission.

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Base Operations

I. NARRATIVE DESCRIPTION:

Base Operations support the Air Force's weapon system launch and recovery capability from fixed bases and installations. Base Operations provides for the operation of utility systems; maintenance, repair and minor construction of facilities; engineering services such as fire protection, crash rescue, custodial services, refuse collection, runway and street snow removal, and leasing of real property; a security force to protect aircraft, missiles, buildings, equipment, and to enforce the law; ground transportation to insure operations readiness; facilities and support to tenants on Air Force installations who service, assist, train and protect our forces; administrative and ADP services essential to operations; food, clothes, and housing for our support and operational forces; morale, welfare and recreation support to Air Force personnel and their dependents.

- Personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through in-service or contractual effort.
- Supplies or contract costs for minor construction performed by the base civil engineers and through facility project contracts with private concerns.
- Costs of procurement, or personnel, supply and related costs of production and distribution of basic utility services (electric, heating, refrigeration, air conditioning, water).
- Supplies, equipment, purchase of services and administrative support for other engineering activities such as fire protection, crash rescue, snow removal, refuse collection, or custodial activities.
- Personnel, supply, travel, ADP support, rent and other costs associated with administration (such as Comptroller, Personnel, Judge Advocate, Command Section activities).
- Personnel costs, travel, equipment rental, supplies for the management and operation of retail supply organizations, fuels management and engine management activities.
- Personnel, supplies and other costs of maintenance and repair of installation equipment, including vehicles, office machines, furniture and appliances.

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Base Operations

- Personnel, supply and other costs for other base services such as security police, traffic management, vehicle operations.
- Personnel, supply and other costs for other personnel support such as that provided by chaplains, food service operations, linen exchange, Army and Air Force Exchange Service.
- Personnel, contracting, equipment and supplies, travel and other costs associated with the supervision, management and coordination of billeting.
- Personnel, supplies, equipment and other costs for morale, welfare and recreation programs.

II. DESCRIPTION OF OPERATIONS FINANCED:

Funds provide base operating support in the following areas:

- A. Maintenance and Repair: Includes personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through in-service or contractual effort. Finances pay and allowances for civilian personnel.
- B. Minor Construction: Includes supplies, personnel, and contract costs for minor construction performed in-service or by private concerns. Finances pay and allowance for civilian personnel.
- C. Operation and Utilities: Includes cost of production and distribution of basic utility services (electric, heating, refrigeration, air conditioning, and water). Finances pay and allowance for civilian personnel.
- D. Other Engineering Support: Includes fire protection, crash rescue, snow removal, refuse collection and custodial activities. Finances pay and allowance for civilian personnel.
- E. Administration: Finances all activities concerned with the headquarters command and administration of the base; Organizational Effectiveness program; and other base-wide activities not otherwise provided for, such as controller activities. Finances pay and allowances for civilian personnel.

FORCE PROGRAM IV: AIRLIFT FORCES

ACTIVITY GROUP: Base Operations

F. Retail Supply Operations: Finances the operation of base supply. Includes the operation of customer support center, purchasing and contracting offices, clothing issue points and POL resale points. Finances pay and allowances for civilian personnel.

G. Maintenance of installation equipment: Finances system and general support systems such as vehicles and installation equipment. Finances pay and allowances for civilian personnel.

H. Other Base Services: Finances security police, terminal services, laundry and dry cleaning, base transportation, and other base-wide services. Finances pay and allowances for civilian personnel.

I. Bachelor Housing Operation, Administration, and Furnishings: Finances the purchase, control, moving and handling of bachelor housing furnishings for bachelor officer quarters and bachelor enlisted quarters; and finances the operation and administration of all unaccompanied personnel housing. Finances pay and allowances for civilian personnel.

J. Other Personnel Support: Finances chaplain activities, information program, food service, alcohol and drug abuse program, installation museums, and reenlistment activities. Finances pay and allowances for civilian personnel.

K. Morale, Welfare, and Recreation: Finances the development, staffing, equipping, administering and operating of libraries, sports programs, child care services, and open mess. Finances pay and allowances for civilian personnel. The FY 87 DOD Appropriations Act suspended appropriated fund (APF) support to revenue generating MWR activities (clubs, bowling centers, marinas, golf courses, skeet/trap ranges, skating rinks, stables, and amusement machine locations/centers) located in large metropolitan areas in the 50 states after 30 Sep 87. The FY 88 DOD Appropriations Act repealed the provision relating to clubs allowing metropolitan area open messes to receive APF support (including military and APF civilian personnel) within a 20% cap. It permits APF civilian employees employed on or before 1 Jan 87 in revenue-generating recreational activities to be retained in those activities provided salaries and other personnel expenses are reimbursed from nonappropriated funds.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

1. DESCRIPTION OF OPERATIONS FINANCED:

The resources requested provide for a centralized supply and maintenance system which supports the active Air Force, Reserve forces, and other federal agencies.

The central supply mission involves computing essential materiel requirements, establishing repair schedules, determining optimum materiel distribution locations, acquiring essential materiel or services, and providing for receipt, storage and issue of essential materiel to operational forces. The depot maintenance mission encompasses inspection, repair, overhaul and modification of Air Force weapon systems, missiles, engines, support equipment, and their exchangeable components. Depot level maintenance is that maintenance beyond base level capability which is required to assure safe and efficient operation of aircraft, missiles, engines and support equipment; it also provides exchangeable components in sufficient quantities to meet peacetime and wartime initial surge requirements.

These resources also provide for central logistic command and control, timely first and second destination transportation of materiel, trajectory measurement, data acquisition and processing for ballistic and space missile launches, and appropriated funds support for all Air Force commissary resale as well as troop issue subsistence functions.

Additionally, resources requested within this Major Force Program provide for base operating support, including support of tenant tactical units; communications requirements; supplies, equipment, and fuel for assigned aircraft/engines in support of the central supply and maintenance mission; payment to the U.S. Postal Service for Air Force official mail costs. Beginning in FY 1986, Environmental Restoration activities which were previously funded in the Defense Environmental Restoration Program (DERP) and managed by the Office of Secretary of Defense, will be financed from the Operation and Maintenance appropriation, Major Force Program 7. The major objective is to identify, characterize, and accomplish remedial actions at hazardous waste sites which, due to past disposal practices, present a threat to health or the environment.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

11. FINANCIAL SUMMARY (O&M \$ in Thousands):

A. ACTIVITY BREAKOUT	FY 1987	FY 1988			FY 1989		Change FY 88/89

3.	FY 1988 Appropriated Amount.....		\$6,023,041
4.	Functional Program Transfers.....		+135,663

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

a. Defense Environmental Restoration Program (from DOD Central Account)...	+\$137,663	
b. Special Operations Forces Support to MFP 11.....	- 2,000	
5. Appropriation Transfers.....		+61,150
a. Directed Transfers Out.....	-\$183,200	
(1) Directed Transfer for the Airlift Service Industrial Fund (ASIF).....		
ASIF refund of \$63,700 could not be made in FY 88 due to inadequate resources. A program reduction to MFP7 must be made to accommodate a portion of this.	-\$21,700	
(2) Directed Transfer for Part of the Asset Capitalization Program (ACP).....		
Although Congress reduced O&M, Air Force \$34,700 associated with the ACP, only \$17,400 was included in the Industrial Funds as an ACP surcharge. A program reduction of \$17,300 is required to accommodate the difference.	-17,300	
(3) Directed Transfer for Part of DLA Surcharge Refund..		
In FY 88 the Defense Logistics Agency (DLA) Stock Fund restored none of the \$98,257 DLA Surcharge Refund directed by Congress. Funds were restored at the expense of other O&M programs.	-23,857	
(4) Directed Transfer for Industrial Fund Pay Raise Absorption.....		
No FY 88 funds were appropriated for the Civilian Pay Raise for O&M nor for the Industrial Fund. Thus the Industrial Fund Pay Raise was absorbed at the expense of other O&M programs.	-19,635	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

(5) Directed Transfer for part of the DOD Dependent Schools..... Funds were restored at the expense of other Air Force O&M programs	-3,900
(6) Directed Transfer for Part of DOD CHAMPUS Overhead Costs..... Funds were restored at the expense of other Air Force O&M programs.	-5,200
(7) Directed Transfer for part of the Intermediate Nuclear Forces (INF) Treaty Start-up Operational Requirements..... Funds were restored at the expense of other Air Force O&M programs.	-36,300
(8) Directed Transfer to the Communications Service Industrial Fund (CSIF)..... The CSIF requires a \$13,000 pass-through in place of the one eliminated by Congress, to restore its financial stability. Funds were restored at the expense of other Air Force O&M programs.	-6,200
(9) Directed Transfer for the Underfunded CHAMPUS Program..... Funds were restored at the expense of other Air Force O&M programs.	-30,200
(10) Revised Industrial Fund Inflation Assumptions..... Congressionally directed changes to workyear pricing could not be made by the Industrial Funds due to lack of resources. Funds were restored at the expense of other Air Force O&M programs.	-18,908

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

b. Directed Transfer In.....	+244,350
(1) Airlift Service Industrial Fund Refund Restoral..... Funds were restored at the expense of other Air Force O&M programs.	+63,700
(2) Restoral of the Asset Capitalization Program Refund. \$17,300 was restored at the expense of other Air Force O&M programs. \$17,400 was restored by transfer from Industrial Funds	+34,700
(3) Restoral of Stock Fund Policy Cut by Congress..... Funds were restored by transfer from Air Force Stock Funds.	+45,500
(4) Part of Restoral of DLA Surcharge Cut by Congress.... No funds were restored from Defense Logistics Agency (DLA) Stock Funds. However, the Air Force Stock Fund restored \$20,800. The remaining \$23,857 was restored at the expense of other Air Force O&M Programs.	+44,657
(5) Industrial Fund Pay Raise Absorption..... Funds were restored at the expense of other Air Force O&M programs.	+19,635
(6) INF Treaty Operational/Start-up Requirements..... Funds were restored at the expense of other Air force O&M programs.	+4,250
(7) Directed Transfer to the communications Service Industrial Fund.....	+13,000

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

CSIF FY 88 funds were required to restore financial stability. Funds were restored at the expense of other Air force O&M programs.

- (8) Directed Transfer for Revised Industrial Fund Inflation Assumptions..... +18,908
- Congressionally directed changes to workyear pricing could not be made by the Industrial Funds due to lack of funds. Funds were restored at the expense of other Air force O&M programs.

6. FY 1988 Current Estimate.....		\$6,219,854
7. Price Growth.....		+246,069
a. Industrial Fund Rates.....	+\$132,941	
b. Stock Fund Rates.....	+4,609	
c. Contract Price Changes.....	+44,443	
d. Annualization of FY 1988 Civilian Pay Raise.....	+7,640	
e. FY 1989 Civilian Pay Raise.....	+31,399	
f. FY 1989 Civilian Health Benefits Increase.....	+5,676	
g. Federal Employees Retirement System (FERS).....	+6,312	
h. Other Price Growth.....	+13,049	
8. Program Increases.....		+454,361
a. Depot Maintenance (FY88 Base \$2,567,000).....	\$+204,278	
This increase is necessary to redress the readiness capabilities lost as a direct result of FY88 funding constraints.		
b. Modernization (FY88 Base \$225,285).....	+10,182	
This increase is driven by increased missile and aircraft modification kits which must be installed during FY89.		
c. Civilian Pay (FY88 Base \$1,748,325).....	+177,154	
This increase of 3,633 workyears (\$116.5 million) is required to raise the MFP7 average utilization rate from 90% to 96% in FY89. Although		

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

- still short of requirements it is a reasonable attempt to redress the imbalance of workload versus manning created in FY88 due to funding constraints. The remaining \$60.7 million increase is for additional 1946 workyears that would be reduced to pay the CHAMPUS and other directed absorptions in FY88. The utilization rate for civilian personnel would drop below 87 percent.
- d. Transportation (FY88 Base \$391,325).....+23,174
This increase is required to reduce part of the backlog of cargo that was not shipped in FY88 due to fiscal constraints. During FY88 over 48,000 tons of vehicles and cargo destined for overseas and stateside locations were not shipped but will be shipped in FY89. An additional 7,395 short tons of cargo will also be shipped by MAC Channel in FY89 over FY88. This represents only 40% of the TP2 cargo which was diverted to surface in FY88 due to fiscal constraints. Shipping high value cargo by surface is not the most economical method. Surface shipment directly increases the pipeline time, which in turn drives up the purchase requirement for additional spares.
- e. Logistics Support Activities (non-civ pay) (FY88 Base \$164,522).....+30,771
This provides funding for Logistics Management Systems (LMS) programs which are necessary to improve the efficiency of AFLC's Supply Operations.
- f. Telecommunications Command & Control (non-civ pay) (FY88 Base \$52,191) +1,801
This provides for the communications support necessary to operate portions of the Logistics Management Systems (LMS) which will become operational in late FY88 and FY89.
- g. Industrial Preparedness (non civ pay) (FY88 Base \$11,042).....+53
General Office Supply requirements which were deferred from FY88.
- h. Acquisition and Command Support (non-civ pay) (FY88 Base \$20,886).....+6,948
Uneconomical lease buyout that was deferred from FY88 (\$3.0 million) due to funding shortfall. Information Management Systems improvements program for productivity increases (\$3.3 million) and general office supply requirements deferred from FY88.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

9. Program Decreases.....		-193,470
a. DERA (FY88 Base \$137,663).....	\$-142,576	
The Defense Environmental Restoration Account (DERA) program is centrally budgeted for by OSD and transferred to the services in years of execution (FY88). A minimum of \$142,576 would have to be transferred to the Air Force in FY89 to purchase the same program spent in FY88 due to inflation.		
b. Base Operating Support (non-civ pay) (FY88 Base \$435,863).....	-23,135	
This funding decrease will result in serious reductions to real property maintenance both by contract and with our in-house workforce. The MFP7 Backlog of Maintenance and Repair will increase accordingly. In addition uneconomical leases on equipment will be continued due to lack of funds for outright purchase. Finally, general office supplies and equipment purchases will be cut an additional 10% from the already constrained FY88 funded levels.		
c. Test Range Support (non-civ pay) (FY88 Base \$206,712).....	-5,859	
Maintenance will not be done on much of the high value range equipment due to fiscal constraints.		
d. Command (non-civ pay) (FY88 Base \$11,025).....	-736	
Decreased purchases of office supplies and equipment will be needed as more people are reduced at all Headquarters activities.		
e. Supply Depots (non-civ pay) (FY88 Base \$54,287).....	-6,693	
Decrease limits the support for fuel, packaging supplies, lumber, hand tools and other supplies necessary for day-to-day operations.		
f. Inventory Control Points (non-civ pay) (FY88 Base \$131,340).....	-11,247	
Decrease limits the support for mission essential travel, printing of bid sets, decreased scope for planned software upgrades for the maintenance and peacekeeper missiles, and general operating supplies.		
g. Procurement Operations (non-civ pay) (FY88 Base \$17,564).....	-3,224	
Decrease limits the support for general operating supplies, equipment, and software maintenance. Some degradation of operations will result.		
10. FY 1989 Budget Request (Amended).....		\$6,726,814

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

III. PERFORMANCE CRITERIA AND EVALUATION

	FY 1987 Actual	FY 1988 Estimate	FY 1989 Estimate
1. Line Items Managed.....	806,870	818,526	830,307

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

I. NARRATIVE DESCRIPTION:

This activity group finances the purchase of depot level maintenance services and the installation of modifications on O&M supported aircraft, engines, missiles, other major equipment items (OMEI), and related exchangeable components. This work is accomplished with organic, interservice, and contract resources. In addition, this activity group provides the financial resources to support interim Contractor Support (ICS) for new weapon systems and modified systems; funds the Big Safari Program (a classified activity) and Atlas Hot Fire (the overhaul and testing of Atlas missile engine sets prior to use as satellite launch vehicles); and supports other Air Force Logistics Command (AFLC) activities, such as the Metrology Center at Newark AFS, Ohio.

Modifications assure weapon system/subsystem safety, reliability and supportability, and enhance operational capability of weapon systems. This activity group shows Air Force O&M resources needed to perform depot level installation of modification kits on aircraft and strategic missiles. Modification kits are procured with Aircraft Procurement (BP 1100) and Missile Procurement (BP 2100) resources. Installation scheduling and the resultant O&M resource requests are based on kit deliveries, urgency of need, and weapon system availability. Modification kit installations are accomplished at organic facilities, contractor facilities and on-site by dispatched maintenance teams. These various methods of accomplishment are necessary in order to be responsive to operational requirements, safety needs, economy, and minimum weapon system downtime. As such, consolidation of modification kit installations with scheduled depot maintenance is pursued whenever it is economical and practical to do so. The categories of modification installation include: Class III - retrofit modifications; Class IV - safety, supportability, reliability, and maintainability modifications; and Class V - new capability modifications. Modification kit installation workloads are included in the Depot Maintenance Industrial Fund (DMIF) operations upon receipt of customer orders which provides financial visibility to program managers.

Resource requirements displayed here finance only Air Force O&M supported weapon systems. The Air National Guard, Air Force Reserve, Air Force Systems Command, and Airlift Service Industrial Fund (ASIF) budget for their maintenance and modification requirements.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

II. DESCRIPTION OF OPERATIONS FINANCED:

This activity has five management categories: (1) depot purchased equipment maintenance (without modernization), (2) interim contractor support, (3) Big Safari, (4) other logistics activities, and (5) modernization.

Depot maintenance is accomplished at Air Force organic industrial facilities, interservice/contractor facilities, or on location by specialized depot and contractor teams deployed to operational sites. Resources provide for programmed depot maintenance (PDM), analytical condition inspection (ACI); one-time repairs on airframes; engine overhaul/repair; and exchangeable component repair. PDMs, ACIs, and engine overhaul help assure safe and efficient operation of Air Force weapons systems. One-time repair of aircraft (aircraft damage repair, corrosion treatment, etc.) increases the availability of airframes to support mission requirements. Resources also provide for depot maintenance on air-launched and ground-launched missiles, and maintain system reliability and accuracy vital to the support of strategic offensive, defensive and tactical missions. The Other Major Equipment items (OMEI) category includes a wide variety of equipment such as ground communications, special purpose vehicles (fire trucks, refuelers, tow tractors, etc.), sound suppressors, and generator sets which periodically require depot repair or overhaul to maximize useful life. Resources provide for the repair of aircraft, missile and equipment components to assure end items are properly supported. Also, depot assistance is provided to worldwide operating activities and those collocated with Air Logistics Centers (ALCs) through host/tenant agreements.

Resources finance depot level modification, installation on Air Force O&M supported aircraft and strategic missiles. Modification installations, where economical and practical, are scheduled with programmed and unprogrammed depot maintenance requirements. In the case of aircraft this consolidation of work limits the number of visits an airframe makes to a depot repair facility, as well as eliminating redundant labor tasks. Where time is critical, because of urgency of need, some installations are performed on-site by depot (organic and/or contract) field teams.

ICS resources provide contractor support for new weapon systems and major modifications for which organic support will not be available when systems begin operations. Organic support is usually unavailable because of inadequate tech data, support equipment and/or software due to instability of system design or the high degree of concurrency of full-scale development and production. Twelve FY 1988 programs are new ICS programs and include the B-52 Common Strategic Rotary Launcher (CSRL), B-52 Integrated

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

Conventional Stores Management System (ICSMS), Low Altitude Targeting Infrared for Night (LANTIRN) for the F16 aircraft, C-130H Combat Talon II, Global Positioning System (GPS), F-15E Dual Role Fighter (DRF), Automatic Weapon Electrical System Tester (AWEST) and Navigation Weapons Delivery System (NWDS) for the F-4 aircraft, GBU-15/IR, AGM-130, and the F-5 Radar System. The remaining continued programs from previous years include component repair for the B-1B, Peacekeeper missile guidance and control systems, F-16, elements of the E-3A, Joint Tactical Information Distribution System, Pave Tack, EF-111A, B-52 Strategic Radar and Pave Mint, EC-135 Communications, and the F-15 Multi-Stage Improvement Program (MSIP). All programs involve contractor repair and management of component parts because the lack of support equipment, technical data and/or software has delayed organic accomplishment past the initial fielding of each system.

All of the funds in the Big Safari program are used for maintenance of equipment with classified missions. Two special contractor depots have been established for this purpose. Included are efforts such as: aircraft depot maintenance, depot level repair of special equipment, installation of depot level modifications, software maintenance, purchase of expense items used for depot maintenance, contractor field teams to maintain certain subsystems/equipment, and operation of supply activities supporting the two special depots.

Resources in the Other Logistics Activities category provide for pay of civilian personnel and support costs associated with performing calibration reviews of systems and equipment worldwide, managing classified intelligence projects, supporting the Minuteman launch schedules, and administering special programs such as Quality Assurance and the Joint Depot Maintenance Analysis Group (JDMAG).

Modernization is the depot purchased equipment maintenance cost to install modification kits to aircraft and missile systems.

This year's format for justification is changed to simplify the presentation of an increasingly complex request. In short, the year-to-year narrative justification is simplified, addressing only stand-alone requirements. The tabular data in Part IV, however, has been expanded to facilitate transition from funding requested to the stand-alone requirements discussed in Part IIIB.

The format for narrative justification (Part IIIB) is changed from previous years. Growth is still explained in terms of requirements instead of funding. The justification process this year is complicated by the presence of funding backlogs in each year analyzed. Because of this, narrative justification is

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

presented for the growth between years for stand-alone requirements instead of simple total requirements. Stand-alone requirements are those requirements anticipated to be generated in a given fiscal year, excluding the carry-over of workload from the previous year caused by funding backlogs. This analysis more accurately portrays program growth than the previous method, without obscuring the effects of financing actions. Conversion of stand-alone requirements to funding reported or requested for each year is accomplished in the expanded tabular justification material in Part IV. In addition to the funding reported/requested and the differences (price, program and net) between years previously displayed, the following information is added:

- *Carry-over of backlog requirements from prior year (discounted in some cases to reflect lost opportunities)
- *Stand-alone requirements
- *Total requirements (stand-alone requirements plus requirements carried over from the previous year)
- *Funding backlog (difference between total requirements and requested funding)
- *Price and program components of growth between stand-alone requirements for each year.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

III. FINANCIAL SUMMARY (Q&M \$ in Thousands):

4. Program Requirement Increases since the FY88 President's Budget

Submission	\$+88,111
Aircraft Maintenance	
	+601,484

a. Aircraft Maintenance.

Category	FY88 PB Requirement's
(1) F-111 Programmed Depot Maintenance (PDM)	\$29,511
Baseline \$93,154	

Baseline 93.154) Five additional F-111 aircraft are receiving PDM/ACI based on aircraft availability. Adding to the increased quantity is an increase in the scope of work for the PDM package.

(2) F-15 (FY88 PB Requirement's Baseline \$16,247)	+22,054
--	---------

The F-15 aircraft is experiencing more unprogrammed maintenance than originally projected. Note, a new PDM program will begin in FY 1989.

(3)	OV-10 (FY88 PB Requirement's Baseline \$1,867).....	+7,455
	A new requirement for refurbishment of the OV-10 aircraft which will extend the aircraft's airworthiness throughout its projected life.	

(4) B-52 (FY88 PB Requirement's Baseline \$75,008)..... +5,998

One additional B-52 receives PDM in FY 1988 based on aircraft availability. Also, the work package has increased.

(5)	T-38 (FY88 PB Requirement's Baseline \$20,591).....	+5,931
	The Depot Economy Repair Program (DERP) increased the scope of work.	

scope of work.	
(6) Other increases.....	+17,162

	(1) Contingency repair increases based on actual.....	\$+647
b.	Missile Maintenance (FY88 PB Requirement's Base line \$101,892).....	
	(1) Contingency repair increases.....	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

historical generations and miscellaneous cost increases on AGM-69 (SRAM) and AGM-86 (ALCM) missiles and other small programs.

c. Engine Repair/Overhaul (FY88 PB Requirement's Baseline \$421,423) \$+20,366

(1) J85-5 Engine (FY88 PB Requirement's Baseline \$2,349) \$+3,394

The repair requirement has increased by 26 engines due to an increase in required stock levels. This engine is used on the T-38 aircraft.

(2) T-62-T-40LC Engine (FY88 PB Requirement's Baseline \$2,457) +1,073

The T62-T-40LC engine is installed in the KC-135R aircraft and is utilized as an auxiliary power plant. Increasing inventory of KC-135R aircraft and increasing flying hours have increased the requirement for this engine by 31 engines.

(3) TF39-1C Engine (FY88 PB Requirement's Baseline \$857) +3,030

The repair requirements for this engine has increased by 8 engines due to an increased stock level requirement. This engine is used in the C-5A aircraft.

(4) J85-17A Engine (FY88 PB Requirement's Baseline \$0) +1,808

The repair/overhaul requirements for this engine has increased by 21 engines. This increase is due to a change in Source of Repair (SOR) for these engines from General Electric to Teledyne Corp. During the production audit of the new contractor, some engines could not be inducted for repair as planned in FY 87 and the requirement was deferred to FY 88 resulting in an increase of repair requirement in FY 88.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(5) F110-100 Engine (FY88 PB Requirement's Baseline \$3,221).....	+1,806	
This engine installed in the F-15 and F-16 is a new addition to the aircraft engine inventory. It is an ascending program with increasing numbers of installed engines.		
(6) T41M9 (FY88 PB Requirement's Baseline \$1,825).....	+1,404	
The repair/overhaul requirement for this airborne power unit has increased by 63 units. This engine is used in the C/KC-135 series aircraft.		
(7) Other Engines (Baseline).....	+7,851	
Small increases to numerous engines.		
d. Other Major Equipment (FY88 PB Requirement's Baseline \$62,851).....		+19,670
(1) 25K Tac loader (FY88 PB Requirement's Baseline \$6,313).....	\$+2,582	
Increase of 39 units.		
(2) Peacekeeper (FY88 PB Requirement's Baseline \$3,094). Peacekeeper Transportation Equipment increased by 23 units.	+2,514	
(3) Data Processing Eqp. (FY88 PB Requirement's Baseline \$0).....	+3,632	
RCA-50 Data Processing Equipment and RCA-47 Ancillary Equipment increased by 78 units.		
(4) LGM-30 Transportation Eqp. (FY88 PB Requirement's Baseline \$5,608).....	+3,508	
Equipment and repair increase by 32 units.		
(5) Small increases to numerous programs.....	+7,434	
e. Exchangeable Component Repair (FY88 PB Requirement's Baseline \$1,472,559).....		+257,958
(1) Unit Repair Code Adjustment Increase.....	\$+77,800	
Increased requirements is the result of corrections/updates to organic and contractor repaired item cost estimates. (For example the F-15 jet fuel starter		

FORCE PROGRAM VII. CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

unit repair cost is \$27 thousand versus the old estimate of \$3 thousand, another example is the F-15/16 case assembly for the F-100/200 engine has a unit repair cost of \$35 thousand versus the old estimated \$7 thousand, etc.).

(2) Increase in T-57-43 Program and Constant Speed Drive Repair	+3,508
(3) Increase in TF-39 Program Requirement	+4,218
(4) Increase in TF-30 P3/9 Engine Requirements and New Program	+49,200
(5) Gas Turbine Engine Requirements	+11,500
Understatement discovered during transfer from DO42 to DO4; requirements modified	
(6) Overall increase for small expendable parts in support of PMEL equipment	+10,000
(7) Avionics Intermediate Shop Modernization	+13,122
(8) Understated the A-10 engine (TF 34100A) non-job routed replacement requirements	+7,400
(9) Parts for the C-5A fuel nozzle cluster quantity per assembly were understated	+2,286
(10) Parts for the C-5 Fan Stator TF-39 engine requirements were understated previously	+2,163
(11) Repair requirement understated for numerous parts on the non-work loaded master. Oversight discovered when these parts were transferred to a workload substitute National Stock Number	+10,321
(12) Small increases to various other small programs	+66,440
f. Area Base Support (FY88 PB Requirement's Baseline \$88,507)	+59,684
(1) Special Support (FY88 PB Requirement's Baseline \$58,637)	
increased software support to numerous weapon systems and engines. For example the B-1, F-15E, F-16 and	\$+44,960

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

new engines are requiring software changes to the test equipment for their repair..		
(2) Base Support (FY88 PB Requirement's Baseline \$34,326).....	+8,367	
Increased PMEL and local manufacturing support.		
(3) Other Increases.....	+6,357	
Interim Contractor Support (FY88 PB Requirement's Baseline \$197,143)....		+90,110
(1) B-1B Requirements (FY88 PB Requirement's Baseline \$96,167).....	\$+27,306	
Due to support equipment purchase delays additional contractor procured (ICS) costs have been experienced.		
(2) B-52 Pave Mint (FY88 PB Requirement's Baseline \$4,500).....	+12,138	
Technical difficulties delayed support equipment purchases thus increasing contractor acquired equipment purchases.		
(3) EF-111A (FY88 PB Requirements Baseline \$1,000).....	+3,626	
Due to modification for environmental control and electrical power.		
(4) EC-135 Communications (FY88 PB Requirement's Baseline \$1,000).....	+2,626	
Increase is related to Pacer Link and PKPR/MM ALCC mods.		
(5) AMEST increases are for armament testers to replace field test stations. (FY 88 Baseline \$0).....	\$+1,615	
(6) AC-130H SOI (FY 88 Baseline \$0).....	+8,125	
Initial ICS requirement.		
(7) Other Increases.....	+34,674	
To numerous programs		
h. Big Safari (FY88 PB Requirement's Baseline \$172,464).....		+1,637
Increased maintenance/modification support for special purpose aircraft and associated mission equipment assigned to the classified Big Safari		

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

program, primarily attributable to a specific periodic maintenance action or modification.		
(1) Small increases.....	\$+1,637	
Classified effort.		
i. Aircraft Modifications.....		+49,085
(1) H-53 Special Operations Forces (FY88 PB Requirement's Baseline \$1,285).....	\$+14,784	
The H-53 SOF program increased their modification installation program based on additional requirements of the Pave Low III Enhanced Modification and SOF Improvements. The H-53 Service Life Extension Program (SLEP) is a requirement which was not portrayed last President's Budget.		
(2) F-15 (FY88 PB Requirement's Baseline \$2,930).....	+7,064	
The Vertical Stabilizer and ALE-45 modification installation requirements increased in quantity due to aircraft availability.		
(3) B-1B (FY88 PB Requirement's Baseline \$0).....	+9,300	
The bird strike modification is a new requirement due to the B-1B accident which destroyed a B-1B aircraft.		
(4) C-130 (FY88 PB Requirement's Baseline \$0).....	+5,530	
Throttle Cable Replacement is a new safety modification requirement.		
(5) Other Program Increases.....	+12,407	
j. Missile Modifications (FY88 PB Requirement's Baseline \$17,832).....		+14,216
(1) The Splice Case Force Change modification on the LGM-30F/G missile launch control and launch facilities increased due to changed labor cost rate factors by the supporting Contractor. The magnitude of the refurbishment, repair and/or replacement of deficient equipment to provide service life extension to launch control and launch facilities (upwards of 16,000 splice pits dug to access damaged cables),	\$+14,216	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

site preparation and restoration, and the intensity of the associated labor accounts.		
5. Program Requirement Decreases since the FY88 President's Budget Submission.....		-199,276
a. Aircraft Maintenance Requirements.....		\$-7,533
(1) Aircraft Damage Repair Requirements (FY88 PB Requirement's Baseline \$21,505).....	\$-6,505	
Aircraft damage repair projections were adjusted to better reflect actual generations.		
(2) Other small adjustments.....	-1,028	
b. Engine Repair/Overhaul (FY88 PB Requirement's Baseline \$421,420).....		-91,553
(1) F-100-100/200/22 (FY88 PB Requirement's Baseline \$163,340).....	\$-43,910	
The repair requirements for these engines used on the F-15/F-16 aircraft have decreased by 808 engines/modules as a result of increased Overhaul Removal Interval (OHRI) factors.		
(2) TF-30 Series Engines (FY88 PB Requirement's Baseline \$75,476).....	-7,711	
The repair requirement for the TF-30 series engines used in the TB/F-111 aircraft has decreased by 15 engines. This is a result of the completion of the Pacer modification programs and the resultant increase of OHRI factors.		
(3) F-100/200/220 Engine and Modules (FY88 PB Requirement's Baseline \$163,340).....	-15,410	
Item cost of repair requirements were lower than projected.		
(4) GTCP Engines (FY88 PB Requirement's Baseline \$13,632).....	-13,265	
The GTCP 85-71A, GTCP 85-180 and the GTCP 85-397 small gas turbine engines have been transferred from		

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

the Engine Management System to exchangeables under the DO-41 reporting system.		
(5) J-79 Series Engines (FY88 PB Requirement's Baseline \$30,048)	-6,052	
The overhaul/repair requirement for J79 engine used on the RF/F4 aircraft has decreased by 10 engines. This is the result of increased OHR factors and a decrease in flying.		
(6) F107-101 Engine (FY88 PB Requirement's Baseline \$13,342)	-5,205	
The F107-101 engine powers the Air Launched Cruise Missile. The refurbishment/recertification requirement has decreased by 329 units as a result of a maximum time requirement from a 30 month interval to a 36 month interval.		
(7) Other Decreases	-3,000	
c. Other Major Equipment Items (FY88 PB Requirement's Baseline \$82,851)		-3,778
(1) Simulator and Trainer (FY88 PB Requirement's Baseline \$14,608)	\$-2,654	
Program decreased from 118 units to 72 units.		
(2) Tractor and Trailers (FY88 PB Requirement's Baseline \$1,826)	-682	
Program decreased from 98 units to 90 units.		
(3) Other Decreases	-442	
Small decreases to numerous programs.		
d. Exchangeable Component Repair (FY88 PB Requirement's Baseline \$1,492,559)		-42,200
(1) F-100 engine repair requirement decreased from 167 units to 108 units	\$-25,930	
(2) Decrease in T-56 repair requirements from 232 units		

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

	to 202 units.....	-15,842	
	(3) Other Decreases.....	-428	
	Decreases to numerous programs.....		
e.	Area Base Support (FY88 PB Requirement's Baseline \$88,507).....		-1,562
	(1) Other Decreases.....	\$-1,562	
	Small decreases to numerous other programs.....		
f.	Interim Contractor Support (FY88 PB Requirement's Baseline \$197,143)....		-20,241
	(1) KC-135R Decreases (FY88 PB Requirement's Baseline \$7,000).....	\$-1,038	
	Decreases related to increased OC-ALC organic capability.....		
	(2) Joint Tactical Information Distribution System Decreased since limited organic capability reached. (FY88 PB Requirement's Baseline \$2,100).....	-1,649	
	(3) F-16 Decreased due to termination of Block 25/30 contracts (FY88 PB Requirement's Baseline \$7,530).....	-3,063	
	(4) Peacekeeper LGM 118A due to delivery of support equipment (FY88 PB Requirement's Baseline \$27,400).....	-12,082	
	(5) E-3A Decrease due to transfer to limited organic capability (FY88 PB Requirement's Baseline \$5,500).....	-1,722	
	(6) Other Decreases to numerous small programs.....	-687	
g.	Big Safari (FY88 PB Requirement's Baseline \$172,464).....		-20,413
	(1) Pacer Coin program one aircraft kit install cancelled.....	\$-3,882	
	(2) Decreases to Rivet joint as the result of deferral of mod installs.....		
	(3) Rivet fire one aircraft kit to be deferred.....	-3,296	
	(4) Combat Sent one PDM and mod installs deferred.....	-2,337	
	(5) Other Changes.....	-5,036	
	Changes to other programs based upon schedule and	-5,862	

FORCE PROGRAM V.I.I. CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

price changes.		
h. Other Logistics Activities (FY88 PB Requirement's Baseline \$8,028).....		-271
(1) Small decreases to numerous projects.....	\$-271	
i. Aircraft Modifications.....		-8,725
(1) B-52 (FY88 PB Requirement's Baseline \$8,970).....	\$-4,985	
The Bomb Navigation Radar modification will not be installed on any B-52G aircraft in FY 1988 due to a slip in kit delivery of B-52G conventional configured kits.		
(2) KC-135A (FY88 PB Requirement's Baseline \$1,096).....	-2,447	
MC-1 Autopilot modification installations were deferred due to design problems.		
(3) Other Small Program Decreases.....	-1,293	
6. Fiscal constraints discount new FY88 requirements.....		-402,208
As a result of FY88 fiscal constraints new requirements were forced to compete with current unfunded requirements. The entire Depot Maintenance program for FY88 is in the process of being restructured to minimize the operational impact on current readiness.		
7. FY 1988 Current Estimate.....		\$2,792,285
8. Functional Program Transfer.....		\$+12,445
a. Transfer from PE 78016, Inactive Aircraft Storage and Disposal.....	\$+12,445	
Effective 1 Oct 87 this function became a Depot Maintenance Industrial Fund (DMIF) operation, and all purchases from the DMIF are recorded as Depot Maintenance.		
9. Price Growth.....		+98,614
a. Industrial Fund Rates.....	\$+87,221	
b. Stock Fund Rates.....	+84	
c. Contract Price Change.....	+10,973	
d. Annualization of FY 1988 Civilian Pay Raise.....	+56	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

e.	FY 1989 Civilian Pay Raise.....	+198
f.	FY 1989 Civilian Health Benefits Increase.....	+30
g.	Federal Employees Retirement System (FERS).....	+29

		+309,943
10.	Program Requirement Increases.....	
a.	Aircraft Maintenance.....	\$+50,713
	(1) F-15 (FY88 Requirements Base \$0).....	
	A new F-15 Programmed Depot Maintenance (PDM) program begins in FY 1989.	\$+37,277
	(2) OV-10 (FY88 Requirements Base \$0).....	
	The refurbishment program, which will extend the aircraft's airworthiness throughout its projected life, along with the rewire program quantities increased from 16 in FY 1988 to 28 in FY 1989.	+6,623
	(3) AC-130H (FY88 Requirements Base \$0).....	
	No aircraft scheduled for FY 1988 PDM or Analytical Condition inspection (ACI) versus 4 in FY 1989.	+2,241
	(4) KC-135A/D/E/Q/R (FY88 Requirements Base \$62,385).....	
	PDM and PDM/ACI quantities increase from 125 in FY 1988 to 127 in FY 1989. Last year's President's Budget discussed only program increases for KC-135D and KC-135R.	+1,830
	(5) Other.....	
	Numerous small program changes.	+2,742
b.	Missile Maintenance (FY88 PB Requirement's Baseline \$106,275).....	
	(1) AGM-84 (Harpoon) recertification from 1 to 14 missiles.	\$+339
	(2) AGM-84 (Harpoon) maintenance repairs based on "BIT" check failures on 14 missiles.	+567
c.	Engine Repair/Overhaul (FY 88 Requirements Baseline \$350,236).....	
	(1) F101-102 Engine (FY 88 Requirements Baseline \$5,167).....	
	This engine powers the B-1B bomber and is a new addition to the engine inventory. It is an ascending program with increasing numbers of installed engines.	\$+5,428
		+13,129

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(2) F110-100 Engine (FY 88 Requirements Baseline \$5,213).....	+4,078	
The F110-100 engine is installed in the F-16 aircraft. The repair requirement will increase in FY 1989 by 14 engines. It is a new addition to the aircraft engine inventory with increasing numbers of installed engines.		
(3) J57-43 Engine (FY 88 Requirements Baseline \$25,979).....	+2,588	
The repair requirement for the J57-43 engine installed in the B-52G aircraft has increased by 17 engines as a result of decreased Overhaul Removal Internal (OHR) factors.		
(4) Other Engines (Baseline).....	+1,035	
Small increases to other engines.		
d. Other Major Equipment Items (FY88 PB Requirement's Baseline \$98,743)...	+12,070	
(1) Fire Trucks Increased by 23 Units (FY88 PB Requirement's Baseline \$7,806).....	\$+2,408	
(2) Warehouse Trucks Increased from 98 Units to 128 Units (FY88 PB Requirement's Baseline \$6,529)....	+2,234	
(3) Snow Plows Increased from 92 Units to 120 Units (FY88 PB Requirement's Baseline \$7,038).....	+1,963	
(4) Peacekeeper Transportation Equipment Increased by 24 Units over FY 1988 (FY88 Requirement's Baseline \$5,758).....	+2,653	
(5) Other Changes.....	+2,812	
Increase to numerous other programs.		
e. Exchangeable Component Repair (FY88 Requirement's Baseline \$1,685,317).....		+183,032
(1) Gas turbine engine repair transferred from DO42 to DO41.....	\$+14,292	
(2) Increased T-56 engine requirements.....	+17,323	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(3) Change in total Organizational Intermediate Demand Rate based on actual failures not being reported by field activities. More items projected to come in NRTS (not repairable this station).....		+53,476	
(4) Readjustment in URC of DO41 computation system.....		+32,563	
(5) Increase in organic contract repair, non-recurring requirements (i.e., an overall increase in one-time inspections and repairs are projected for FY89 driving up exchangeable parts requirements. For example more overhauls for \$+11,607; more analytical inspections for \$+6,444; more support equipment \$+3,904; and conditional checks \$+2,712).....		+55,826	
(6) Other increases in various programs.....		+9,552	
f. Area Base Support (FY88 Requirement's Baseline \$146,629).....			+12,192
(1) Increased Special Support (Baseline).....		\$+7,911	
Increased software support for weapon systems operational flight trainers.			
(2) Increased Base Support (Baseline).....		+3,081	
Increased PMEL support and small increases to other programs.			
(3) Other increases.....		+1,200	
Small increases to other programs.			
9. Interim Contractor Support (FY88 Requirement's Baseline \$267,012).....			+70,996
(1) MH-53J ENS RADAR/INS increased inventory (25 to 62) and four main bases to support (FY88 Requirement's Baseline \$16,558).....		\$+2,214	
(2) RSDR/KP Program Program New Start (FY88 Requirement's Baseline \$0).....		+7,497	
(3) SMLV F-15/16/111/C-130 (FY88 Requirement's Baseline \$0).....		+2,892	
Increased in inventory and main operating base.			

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(4) TFR increase of aircraft fielded with TFR mods (FY88 Requirement's Baseline \$9,155).....	+4,010	
(5) DSP increased as a result of more aircraft fielded with updated systems (FY88 Requirement's Baseline \$1,029).....	+2,495	
(6) AMRAAM (AIM-120) initial support as they enter inventory (FY88 Requirement's Baseline \$0).....	+6,416	
(7) F-15/DRF (FY88 Requirement's Baseline \$6,568).....	+5,169	
(8) LANTIRN (FY 88 Baseline).....	+4,906	
(9) F-16 (FY 88 Baseline).....	+17,640	
Increased depot repair because of early deployment of Block 40 F-16C/D aircraft.....		
(10) Other increases to numerous programs.....	+17,757	+16,157
h. Big Safari (FY88 Requirement's Baseline \$153,688).....		
(1) Increased Combat Sent as a result of mod installs, test and data support.....	\$+3,090	
(2) Other classified program changes.....	+13,067	
i. Other Logistics Activities (FY88 Requirement's Baseline \$7,757).....		+1,320
(1) Civilian Pay (FY88 Requirement's Baseline \$11,878).....	\$+976	
Increased of 25 workyears to restore stability to the AFLC civilian workforce.....		
(2) Office Supplies (FY88 Requirement's Baseline \$2,542).....	+150	
To purchase requirements deferred from FY88.....		
(3) AVPOL (FY88 Requirement's Baseline \$1,314).....	+95	
Increased flight testing as PDM's increase.....		
(4) Other Small Changes.....	+99	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

j.	Aircraft Modifications.....	+27,710
	(1) F-15 (FY88 Requirement's Base \$15,917).....	\$+11,854
	The Multi-Staged Improvement Program modification installation quantities increase from 46 in FY 1988 to 81 in FY 1989. These quantities differ from the quantities discussed during the FY 88/89 President's Budget due to aircraft scheduling.	
	(2) B-52 (FY88 Requirement's Base \$0).....	+8,829
	The B-52H Common Strategic Rotary Launcher modification and the Bomb Navigation Radar modification begin installation in FY 1989 (\$+6.1 million and \$2.7 million respectively).	
	(3) KC-135 (FY88 Requirement's Base \$9,602).....	+3,222
	The CFM-56 Reengine program increases input by 11 aircraft (34 in FY 1988; 45 in FY 1989).	
	(4) A-10 (FY88 Requirement's Base \$16).....	+2,586
	Conductive Fuel Foam modification essentially begins installation in FY 1989 with one kitproof in FY 1988.	
	(5) Other.....	+1,219
	Numerous small program change.	
k.	Missile Modifications (FY88 Requirement's Base \$33,208).....	+2,718
	Installations to numerous missile systems and small increases to other programs.	
11.	Program Decreases.....	\$-447,905
a.	Two Less Civilian Workdays in FY89.....	\$-96
b.	Aircraft Maintenance.....	-75,103
	(1) F-15 (FY88 Requirement's Base \$36,388).....	\$-30,608
	The F-15 Maintenance program decreases based on a projected decrease in other repair actions due to the PDM program beginning in FY 1989.	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(2) F-4E (FY88 Requirement's Baseline \$30,223).....	-21,371
Due to the inventory phasedown of this weapon system in the outyear, the F-4E PDM and ACI quantities decrease from 54 in FY 1988 to 16 in FY 1989.	
(3) F-111D/E (FY88 Requirement's Baseline \$63,502).....	-13,161
Both the F-111D and F-111E PDM and ACI aircraft quantities decreased by 1 (18 in FY 1988, 17 in FY 1989 for both systems); the scope of work decreased between 1988 and 1989; and the unit cost of the European contractor for FY 1988 is larger than projected for FY 1989 based on the rate of exchange fluctuation (\$-1.5 million - F-111D; \$-2.8 million - F-111E). The F-111E Structural Integrity program quantities decrease from 20 in FY 1988 to 2 in FY 1989.	
(4) B-52H (FY88 Requirement's Baseline \$35,754).....	-2,191
The B-52H quantities decrease by 2 between FYs 1988 (23) and 1989 (21) for PDM and ACI aircraft.	
(5) C-5A (FY88 Requirement's Baseline \$1,755).....	-1,820
Two C-5A aircraft are input for PDM/ACI in FY 1988 versus none in FY 1989.	
(6) HC-130P (FY88 Requirement's Baseline \$1,876).....	-1,557
PDM and ACI quantities decrease from 5 in FY 1988 to 1 in FY 1989.	
(7) Other.....	-4,395
Numerous small program changes.	
c. Missile Maintenance (FY88 Requirement's Baseline \$106,275).....	-2,270
(1) Reduced maintenance based on number of Minuteman....	\$-509
missiles required for recycle age-out program and slip in recycle schedule of missiles for stage 3 motor boot-to-flap degradation.	

FORCE PROGRAM V.I.I. CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(2) Reduced Minuteman maintenance based on fewer missiles scheduled for remanufacture of MM II stage 2 motor washout program.	-1,761	
d. Engine Repair/Overhaul (FY 88 Requirement's Baseline \$350,236)		-41,105
(1) TF30 Series Engines		
(FY 88 Requirements Baseline \$70,272)	\$-21,403	
The repair requirement for the TF30 engines used in the FB/F-111 aircraft has decreased by 79 engines. This is a result of the completion of the "Pacer 30" modifications and the increase in OHR1.		
(2) F100/200/220		
(FY 88 Requirements Baseline \$107,869)	-9,833	
These engines/modules are used on the F-15/F-16 fighter aircraft. The repair requirement for these engines/modules will decrease by 745 units as a result of changes to the OHR1 factors.		
(3) J79-1 Engine (FY 88 Requirements Baseline \$20,493)	-7,547	
The requirement for repair/overhaul for these engines has decreased by 27 engines in FY 1989 as a result of OHR1 factor changes. This engine is installed in the F-4E/G aircraft.		
(4) T41M-9 Engine (FY 88 Requirements Baseline \$3,348)	-2,322	
The requirement for this engine which is used as an airborne power unit on the C-KC-135 aircraft has decreased by 82 engines. This is the result of a projected completion of a refurbishment program started in FY 1988 on these power units.		
e. Other Major Equipment Items (FY88 Requirement's Baseline \$98,743)		-13,056
(1) Simulator Maintenance (FY88 Requirement's Baseline \$11,954)	\$-3,840	
Program units decreased from 72 units in FY 1988 to 56 units in FY 1989.		

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(2) Training Aids (FY88 Requirement's Baseline \$2,632)...	-2,632	
Program decreased 26 units in FY 1988 to 0 units in FY 1989.		
(3) Generator and Generator Sets (FY88 Requirement's Baseline \$6,083).....	-1,251	
Program units decreased from 396 units in FY 1988 to 336 units in FY 1989.		
(4) Other Changes.....	-5,333	
Small decreases to numerous programs.		
Exchangeable Component Repair (FY88 Requirement's Baseline \$1,685,317).....		-241,881
(1) Reduction in Flying Hours for all Major Weapon systems IAW Air Force decisions to reduce Force structure.....	\$-72,000	
(2) T-56 engine repair decreases from 209 units to 191 units.....	-14,574	
(3) Non-coded adjustment and unit repair code changes reduction.....	-87,578	
(4) F-100 Engine Repair decreased from 169 units to 113 units.....	-17,136	
(5) Other Decreases to Various Programs.....	-50,593	
Area Base Support (FY88 Requirement's Baseline \$101,055).....	\$-1,735	-1,735
(1) Small decreases to other programs.....		
Interim Contractor Support (FY88 PB Requirement's Baseline \$267,012)....	\$-2,723	-36,434
(1) EF-111A TJS (FY 88 Requirement's Baseline \$4,626)....		
(2) B-52 Pave Mint decreases due to partial organic capability at 1-level (FY 88 Requirement's Baseline \$2,747).....	-5,155	
(3) AC-130H SOI initial start-up costs are not incurred for FY 1989 (FY 88 Requirement's Baseline \$8,125)....	-5,366	
(4) Peacekeeper decreased, more organic capability developed (FY 88 Requirement's Baseline \$15,318)....	-6,014	
(5) Other decreases to numerous programs.....	-17,176	

FORCE PROGRAM V.1: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

i.	Big Safari (FY88 Requirements Base \$181,383)	-10,385
(1)	Rivet joint one aircraft PDM deferred as well as an upgrade kit	\$-5,000
(2)	Other Changes	-5,385
	Changes to other programs	
j.	Aircraft Modifications	-25,840
(1)	KC-135 (FY88 Requirements Base \$0)	\$-9,820
	The Life Extension Structure modification completes installation in FY 1988	
(2)	E-3 (FY88 Requirements Base \$0)	-5,800
	The E-3A Block 20/25 modification completes installation in FY 1988	
(3)	F-4E (FY88 Requirements Base \$0)	-3,118
	The F-4E Connector Replacement modification quantities decrease from 26 in FY 1988 to 9 in FY 1989	
(4)	C-130 (FY88 Requirements Base \$0)	-2,899
	The Outer Wing modification completes installation in FY 1988	
(5)	A-10 (FY88 Requirements Base \$0)	-1,634
	The Turbine Engine Monitoring System quantities decrease from 106 in FY 1988 to 3 in FY 1989	
(6)	B-52 (FY88 Requirements Base \$0)	-1,370
	The Environmental Control System quantities decrease from 58 in FY 1988 to 45 in FY 1989	
(7)	Other	-1,199
	Other numerous small modification decreases	
12.	FY 1989 Requirements Discounted due to Fiscal Constraints	+259,642
a.	Add requirements carry-in from FY 1988	+762,211
(1)	Aircraft	\$+88,324
(a)	Programmed Depot Maintenance (PDM) and Analytical Condition Inspection (ACI) deferrals	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

Additional base level and some depot level inspections are levied when PDM deferrals occur since PDMs are based on a fixed cycle determined by engineering specifications. As PDM aircraft are slipped in the schedule, a bowwave effect occurs to the outyear input schedule.

(b) Aircraft Damage Repair deferrals.

These are unusable Air Force assets based on FY88 fiscal constraints.

(c) Elimination of organizational/intermediate (O&I) level tasks performed in conjunction with FY88 PDM.

(2) Missiles.....

+6,163

(a) Reduced depot field team support to the operating commands which defers missile maintenance above organizational capability/skills in FY88.

(b) Defers missile maintenance in FY88.

(3) Engines.....

+56,619

(a) In FY88, the quantity of total engine repair jobs will be reduced by 10 percent. More emphasis will be put on module repair versus full up engine repair.

(b) In FY88, base stockage levels of engines will be reduced to 50 percent causing field units to cannibalize engine parts or engines from other aircraft.

(c) Elimination of organizational/intermediate tasks performed in conjunction with FY88 overhaul of engines causing possible grounding of aircraft.

(4) Other Major Equipment Items (OMEI).....

+21,566

(a) Operational units will not be able to send to depot approximately 1 percent of their equipment

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

for repair and will be forced into cannibalization in FY88.		
(b) Simulator and trainers will not be repaired.		
(5) Exchangeables.....		+478,649
(a) Operational impact will be felt by reduced spares and longer pipelines. All protection levels will be deferred in FY88.		
(b) Operational units workload will increase as a result of cannibalization. There will be more Not Mission Capable Supply (NMCS)/Not Mission Capable Maintenance (NMC), times during FY88.		
(c) Other War Readiness Materials will be held unserviceable in depot warehouses.		
(d) Impairs readiness as it reduces available peacetime assets/aircraft availability and forces use of War Reserve Materiel (WRM) assets in FY88.		
(6) Area Base Maintenance.....		+33,366
(a) In FY88, support to bases will be decreased. Precision Measurement Equipment Laboratory (PMEL) items will become past due and put out of service until inspected. Operational units will be unable to test aircraft systems, possibly causing aircraft grounding and definitely causing aircraft cannibalizations.		
(b) Field units will have to make software changes that should be accomplished at depot level. Operational flight trainers will have outdated and erroneous software packages in FY88.		
(7) Interim Contractor Support.....		+22,058
BIB and other weapon system requirements deferred in FY88		

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(8) Big Safari.....	+9,813
Numerous projects deferred in FY88	
(9) Aircraft Modifications.....	+36,389
Installation of modification kits deferred in FY88	
(10) Missile Modification.....	+9,264
Splice case work deferred in FY88	
b. Less FY89 Unfunded Requirements.....	\$-502,569
(1) Aircraft.....	\$-87,307
(a) The quantity of Programmed Depot Maintenance (PDM) and Analytical Condition Inspection (ACI) deferrals increases over the FY 1988 unfunded quantity. The bowwave created in the outyear schedule input will be greater.	
(b) Aircraft Damage Repair (ADR) deferrals. The ADR aircraft deferrals from FY 1988 are added to the FY 1989 ADR deferrals.	
(c) Elimination of organizational/intermediate (O&I) level tasks performed in conjunction with PDM. Other economy tasks will be eliminated within the FY89 PDM package.	
(2) Missiles.....	-4,917
(a) Reduced depot field team support to the operating commands which defers missile maintenance above organizational capability/skills in FY89.	
(3) Engines.....	-2,610
(a) The quantity of total engine repair jobs will be reduced. More emphasis will be put on module repair versus full up engine repair in FY89.	
(b) Elimination of organizational/intermediate tasks performed in conjunction with overhaul of engines causing grounding of aircraft in FY89.	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(4) Other Major Equipment Items (OMEI)	-14,028
(a) In FY89, operational units will be unable to send to depot approximately 4 percent of their equipment for repair and will be forced into cannibalization.	
(b) Simulator and trainers will not be repaired.	
(5) Exchangeables	-290,085
(a) Operational impact will be felt by reduced spares and longer pipelines in FY89. All protection levels will be deferred.	
(b) Operational units workload will increase as a result of cannibalizations. There will be more Not Mission Capable Supply (NMCS)/Not Mission Capable Maintenance (NMCN) time in FY89.	
(c) In FY89, other War Readiness Materiels will be held unserviceable in depot warehouses.	
(d) Impairs readiness as it reduces available peacetime assets/aircraft availability and forces use of War Reserve Materiel (WRM) assets in FY89.	
(6) Area Base Maintenance	-33,060
(a) In FY 89, support for bases will be decreased over FY 1988 by approximately 50 percent. Precision Measurement Equipment Laboratory (PMEL) items will become past due and put out of service until inspected. Operational units will be unable to test aircraft systems, possibly causing aircraft grounding.	
(b) Field units will have to make software changes that should be accomplished at depot level. Operational flight trainers will have outdated and erroneous software packages in FY89.	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

(7) Interim Contractor Support (ICS).....	-30,200
(a) in FY89, there is no organic capability, therefore repaired parts will not be fixed, causing cannibalizations. Aircraft will be not mission ready for parts and maintenance.	
(b) A five percent reduction in support from contractors will occur in FY89.	
(8) Aircraft Modifications.....	-33,761
Installation of Kits delivered in FY89 will not be installed until FY90.	
(9) Missile Modifications.....	-6,601
Splice case work deferred until FY90	

13. FY 1989 Budget Request (Amended)..... \$3,106,024

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Depot Maintenance and Modernization

3. FY 1989 Current Estimate.....	968	358

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Aerospace Maintenance and Regeneration Center (AMARC)

I. NARRATIVE DESCRIPTION:

The Aerospace Maintenance and Regeneration Center (AMARC) is located at Davis-Monthan AFB in Arizona. AMARC is the Department of Defense's single manager for the storage, reclamation, and disposition of all aerospace vehicles that are not currently required in the DOD operational inventory.

The facility supports the Air Force, Navy, Army, Marine Corps and Coast Guard. This fleet provides a unique savings account from which military units throughout the world may withdraw parts and aircraft. The government earns an additional income by selling aircraft to foreign governments. AMARC also donates aircraft to tax-supported organizations and air museums.

Although many aircraft are stored at AMARC, about one-half of the aircraft will go back into operation. Some return to military service. Others are sold to foreign governments or donated to state and local governments or federal agencies. Those aircraft stored at AMARC which do not fly again become a source for parts. AMARC became an industrial fund operation in FY 1988.

II. DESCRIPTION OF OPERATIONS FINANCED:

Funding in this activity group pays for non-industrial fund costs associated with the AMARC operation. These include payroll expenses for employees not directly involved in industrial fund operations and for supplies and equipment to support them.

FORCE PROGRAM V.1: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Aerospace Maintenance and Regeneration Center (AMARC)

III. FINANCIAL SUMMARY (OMB \$ in Thousands):

		FY 1988		FY 1989		Change FY 88/89
		Budget Request	Approp	Current Estimate	Initial Estimate	Change
A.	SUBACTIVITY BREAKOUT	FY 1987

5. Represervation			
Quantity.....	100	209	265
Hours.....	27,833	64,163	71,516
6. Total AMARC Hours.....	421,911	465,270	471,861

Explanation of Changes:

a. Funding responsibility for the above maintenance work transfers to PE 72207f, Depot Maintenance, effective 1 Oct 87 (FY88). For simplicity the workload indicators remain listed here for all years.

b. There is not always a direct correlation between quantity and manhours because of different workload requirements for different types of aircraft. For example, large and complex aircraft such as a B-52 or a KC-135 require substantially more manhours to process than smaller or less complex aircraft such as an O-2 or a T-38. Consequently, manhours do not always change in proportion to quantity. AMARC workload

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Aerospace Maintenance and Regeneration Center (AMARC)

projections are based on the Air Force Flying Hour Document and inputs from the Army, Navy and Coast Guard. Numerous factors impact performance criteria (workload), including weapon system procurement which allows old weapon systems to be retired, changes in mission, and aircraft that sustain damage beyond economical repair. Overall workload is projected to increase slightly in FY89 as additional Navy aircraft are input for storage.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Aerospace Maintenance and Regeneration Center (AMARC)

2. FY 1988 Current Estimate.....	2	64
a. No Change		
3. FY 1989 Current Estimate.....	2	64

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Supply Depots

I. NARRATIVE DESCRIPTION:

Supply depots in Air Force Logistics Command (AFLC) provide for centralized distribution of materiel used by the active Air Force, Air Force Reserve, Air National Guard, other DOD and US Government agencies, and selected foreign governments. Distribution consists of the receiving, storing, preserving, and packing of items of materiel that are received from suppliers, repair points, and retail customers and issued to users worldwide, in accordance with instructions from Inventory Control Points. Over one million line items are maintained in the inventory and over seven million issues are made annually. This includes extensive retail item management and supply support for Depot Maintenance and tenant organizations, as well as wholesale support worldwide.

II. DESCRIPTION OF OPERATIONS FINANCED:

The largest element of expense is the cost of civilian personnel that receive, store, inspect, pack, crate, and ship materiel at the five Air Force Air Logistics Centers (ALCs) (Ogden, UT; Oklahoma City, OK; San Antonio, TX; Sacramento, CA; and Warner Robins, GA), and two activities that perform limited supply depot functions (Wright-Patterson AFB, OH and the Aerospace Guidance and Metrology Center, Newark AFS, OH). Other significant costs are for equipment maintenance, stock fund purchases, and other purchases.

The supply depots provide centralized materiel distribution operations in support of three major groups of customers. In a wholesale capacity, over 7 million issues and receipts are processed annually in support of worldwide Air Force, other DOD, and other government organizations, and Security Assistance Program agreements. Over 3.5 million issues and receipts annually support the materiel requirements of the six Air Force Depot Maintenance activities. Base level support (retail) is provided through over 1.5 million issues and receipts to various AFLC organizations and over 500 tenant organizations on AFLC installations.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Supply Depots

III. FINANCIAL SUMMARY (OMB \$ in Thousands):

A. <u>SUBACTIVITY BREAKOUT</u>	FY 1987	FY 1988			FY 1989		Change FY 88/89
		Budget Request	Approp	Current Estimate	Initial Estimate	Change	
71111 Supply Depot Operations.....	\$347,529	\$341,010	\$334,129	\$344,129	\$351,523	\$10,833	\$28,227

B. SCHEDULE OF INCREASES AND DECREASES:

1. FY 1988 President's Budget Request.....	\$341,010
2. Congressional Adjustments.....	-6,881
a. Inflation.....	\$-412
b. Supply Operations.....	-3,000
c. Travel.....	-44
d. Workyear Pricing.....	-3425
3. FY 1988 Appropriated Amount.....	\$334,129
4. Price Changes.....	-1,380
a. FY 1988 Pay Raise.....	\$4,782
b. FY 1988 Health Benefit Increase.....	3,105
c. Federal Employees Retirement System (FERS) Changes.....	-9,267
5. Program Increases.....	+11,380
a. Civilian Pay.....	\$+11,380
This increase accounts for restructuring of manpower resources (541 endstrength and workyears necessary to the supply and distribution function) which were inadvertently reduced from this budget activity.	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Supply Depots

Resources were sourced from the Depot Maintenance Industrial Fund, where the manpower reduction should have been levied.

6. FY 1988 Current Estimate.....		+344,129
7. Price Growth.....		+10,006
a. Stock Fund Rates.....	\$+648	
b. Industrial Fund Rates.....	+1	
c. Annualization of FY88 Civilian Pay Raise.....	+2,169	
d. FY89 Civilian Pay Raise.....	+4,293	
e. FY89 Federal Employees Retirement System (FERS).....	+722	
f. FY89 Civilian Health Benefits.....	+1,035	
g. Contract Price Changes.....	+892	
h. Other Price Growth.....	+246	
8. Program Increases.....		+41,796
a. Increase of 1,372 Civilian Workyears Over FY 1988 (FY88 Base \$289,842). This increase of 1,372 workyears is required to raise the utilization rate from 89% in FY88 to 98% in FY89. These workyears are required to perform the most critical functions within supply Depots. Severe funding constraints necessitated the low utilization rate in FY88 and caused delays in many of the functional areas. If the workyears in supply depot operations are not supported at the requested rate there will be adverse impacts to: (1) depot maintenance will incur slower delivery of material resulting in increased line stoppages; (2) customer support will be degraded by increased processing time, backlogs in requisition processing, increased MICAPs due to lack of material, increased damages in transit and increased transportation costs; (3) storage of materials will receive insufficient inspection leading to deterioration of materials in storage; (4) inventory accuracy will not improve, in fact the improvements to date will be negated.	\$+41,796	

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Supply Depots

9. Program Decreases.....		-23,575
a. Performance of Commercial Activities.....	\$-4,260	
The reduction is based on anticipated savings to be achieved from future conversions to contract in accordance with the procedures of OMB Circular No. A-76.		
b. Two less civilian workdays in FY89.....	-2,453	
c. Logistics Management Systems (LMS) Productivity Savings.....	-8,114	
This reduction of 688 endstrengths (337 workyears) is a direct result of the implementation of portions of the LMS at AFLC.		
d. Purchased Equipment Maintenance (FY 1988 Base \$17,009).....	-638	
Results in decreased support for our aging vehicle fleet. In addition reduces contract maintenance on mechanized material handling equipment which replaced the manpower intensive effort in the warehouse system.		
e. Miscellaneous Contracts (FY 1988 Base \$7,075).....	-1,861	
This decrease increases the shortfall in funding to store special tools and equipment at contractor facilities. It is more cost-effective to pay for storage of the equipment for latter use rather than pay start-up costs to the contractor for each new production run.		
f. Supplies (FY 1988 Base \$26,582).....	-6,249	
This decrease limits the support for fuel, packaging supplied, lumber, hand tools storage aids, and supplied for day-to-day operations.		
10. FY 1989 Budget Request (Amended).....		\$372,356

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Supply Depots

IV. PERFORMANCE CRITERIA AND EVALUATION:

The following performance indicators project total workload requirements for this budget activity group. Projections are in terms of scope of program activity, quality, and production counts. No single indicator can be construed as being indicative of the total workload.

	FY 1987	FY 1988 Current Estimate	FY 1989 Current Estimate
1. Total Issues and Receipts (000)	11,855	11,974	12,094
2. Stock Records Maintenance (000)	2,458	2,490	2,522
3. Initial Inventory Accuracy	78%	78%	78%

Explanation of Changes:

1. Total Issues and Receipts:

This workload projection is based on programmed changes in the Air Force flying hour program and anticipated workload generated by new weapon systems entering the inventory. Issues and receipts are a process workload that will be accomplished regardless of the budgeted manpower, at the expense of lower priority workloads (e.g., inspections, inventories, packaging).

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Supply Depots

2. Stock Records Maintained:

This measure increases as new items are added to the inventory (e.g., new systems/models, modifications). Longer retention of assets for current systems/equipment, and the maintenance of records for systems that have left the inventory also causes increases in this measure.

3. Initial Inventory Accuracy:

No improvement is anticipated in the inventory accuracy rate. The draw down in people will preclude improvements in this manpower intensive effort.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Supply Depots

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

I. NARRATIVE DESCRIPTION:

Inventory Control Points (ICPs) centrally manage the total range of materiel, from major weapon systems to individual spare parts, and provide complete operational logistics support to the active Air Force, the Air National Guard, the Air Force Reserve, other DOD components, other U.S. Government agencies, and selected foreign governments. The scope of activities of the Inventory Control Points is more than the title implies, as it is considered the hub of the Air Force Logistics Command (AFLC). Examples of the ICP's influence on the other logistics functions are systems management, configuration control, modifications, and management improvement program engineering; defining logistics support concepts for Air Force Systems Command to acquire a reliable and maintainable new weapon system; initiating procurement actions for contracting and manufacturing; controlling the stock levels and requisitions for items that Supply and Transportation receive, store, and issue; and negotiating and scheduling the repair and overhaul of systems/items through Maintenance (both contract and organic). The ICP's mission is to ensure that systems/items such as aircraft, helicopters, missiles, support equipment, air munitions, nuclear weapons, electronic warfare, and communications-electronics are maintained at the highest levels of combat readiness and are capable of sustaining a war-fighting scenario.

II. DESCRIPTION OF OPERATIONS FINANCED:

The largest element of expense for this activity group is the pay of civilian personnel required to perform the logistics support mission. Personnel are located at the five Air Logistics Centers (i.e., Ogden, UT; Oklahoma City, OK; San Antonio, TX; Sacramento, CA; and Warner-Robins, GA), the Air Force Acquisition Logistics Center (WPAFB, OH), the Logistics Operations Center (WPAFB, OH), the Air Force Logistics Management Center (Gunter AFS, AL), and the Cataloging and Standardization Center (Battle Creek, MI).

Operations financed are described in more detail by the following:

1. Acquisition Management is responsible for improving force readiness by developing the logistics concepts and plans that emphasize supportability, reliability, and maintainability. These factors are incorporated into the design, development, and production phases of all new weapon system acquisition programs. Close coordination with Air Force Systems Command (AFSC) is needed to implement effective integrated logistics support plans prior to program management responsibility transfer (PMRT) from AFSC to

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

AFLC. This assures that our customers, the operating commands (e.g., TAC, SAC, MAC, ATC), will deploy new weapon systems that are logistically supportable and combat sustainable. Acquisition Management includes participating in source selection evaluations; determining initial provisioning requirements for spares and equipment; reviewing engineering change proposals; planning and monitoring depot activations. Contractor Logistics Support, and Interim Contractor Support; anticipating and correcting support problems; and overall surveillance of systems procurement to ensure integrity of design, performance and reliability.

2. System Program Management is responsible for the health, safety and structural integrity of weapon systems and for directing and controlling AFLC activities based on the wartime tasking. System Program Managers (SPM) direct what is bought, repaired, modified and distributed for each deployed weapon system, so that the greatest possible combat capability is achieved for every tax dollar invested. They also serve as the "single face" to the customer (the using commands) in resolving logistics support problems. Overall surveillance and monitoring of each weapon system unit in the Air Force inventory is accomplished by the SPM to insure its availability and readiness posture. This management category develops/revises maintenance concepts; manages configuration control as affected by overhaul, repair, and modification; assesses the capability to execute war plans; maintains close liaison with wings and squadrons supported; and plans interservice support agreements.

3. Item Management is responsible for the spare parts and equipment that support all weapon systems. This management category represents the basics of the logistics business, with the goal of getting the right item to the right place, in the correct quantities, and in time to meet the operational requirements of the customer.

Item management functions include determining item identification and cataloging; evaluating form, fit and function; determining stock levels; computing repair and buy requirements; initiating purchase requests; processing customer requisitions; resolving backorder problems; and being responsive to the SPM in keeping fill-rates high and Not Mission Capable-Supply (NMCS) incidents to a minimum.

4. Production Management is responsible for determining programmed depot maintenance (PDM) repair, overhaul, and modification requirements for all weapon systems, subsystems, engines and other major end items. Requirements are negotiated and scheduled for either organic or contract depot maintenance. Considerable advanced planning and coordination, with the using commands and maintenance, are required to remove active weapon systems/items from the fleet, accomplish simultaneous modification and repair, and

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

return the serviceable systems/items in the shortest time possible. Scheduling also involves identifying the availability of mod kits and other repair parts, managing the utilization of government furnished materiel (GFM) used by the contractors, and ensuring the technical and engineering data are available concurrently with the modification and maintenance workloads.

5. Technical Management is responsible for the overall engineering and technical integrity of weapon systems, subsystems, engines, and items as related to design, configuration, safety, nuclear survivability/vulnerability, and performance. This management category provides direct support to the SPM and the using command to resolve the technical problems of operation and materiel deficiencies; support to depot level maintenance through on-site guidance and to the using command's intermediate and field level maintenance through technical manuals; and support to Procurement for technical data in contracts and in evaluating the technical ability of contractors to manufacture required products. Technical management includes functions such as developing, publishing, and distributing technical manuals worldwide for all levels of maintenance; monitoring contractor support; resolving design deficiencies; analyzing changes in mission or life extension; investigating causes of accidents/incidents; evaluating the feasibility of modification and maintenance plans; developing and reprogramming computer software; and managing the software/hardware integration of operational flight program, communications-electronics, automatic test equipment, electronic warfare, and aircrew training device systems.

6. Special Programs includes unique logistics functions associated with the Inventory Control Points that have specific missions not directly related to the other management categories. Functions in this category are:

Directorate of Energy Management (San Antonio, TX) is responsible for worldwide logistics support and quality/reliability assurance of aviation fuels, ground fuels, petroleum products, missile propellants, oils, lubricants, chemicals, coal and gases for the AF, NASA, and other organizations. They also manage seven (7) COMUS and two (2) overseas analytical laboratories.

Directorate of Special Weapons (San Antonio, TX) is responsible for worldwide logistics support for the AF Nuclear Ordnance Program and management of the Nuclear Support Office (Kirtland AFB, NM). This program includes nuclear bombs and missile warheads/re-entry vehicles; aircraft carriage and release systems; test equipment; training devices; transport trailers; retardation parachutes and all other items/

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

equipment having a nuclear mission. Management is closely coordinated with the Department of Energy and the Defense Nuclear Agency.

Classified Programs encompass the AFLC detachments and operating locations that provide logistics support to the classified flying missions of certain weapon systems (e.g., TR-1, U-2).

International Logistics Center (Wright-Patterson AFB, OH) is responsible for developing, negotiating, and managing the AFLC Security Assistance (SA) program to provide the full range of logistics support required by foreign countries and international organizations. SA programs include foreign military sales (FMS), grant aid (GA), and the international military education and training (IMET) programs.

Office of Quality Assurance (all five ALCs) is responsible for developing and maintaining an assurance program which achieves a standard of quality for materiel and related management systems that ensures maximum logistics mission effectiveness and operational readiness.

7. Competition Advocate (CR) was established in 1983 at all five ALCs in compliance with the SECDEF ten point plan. It is dedicated to reducing the cost of procuring spare parts for the Air Force through increased competition among suppliers. CR personnel challenge sole source procurements, investigate new sources of supply, determine engineering/technical data needs for follow-on procurements, perform breakout screening, and conduct item should-cost studies and value analyses to ensure price reasonableness.

8. Air Force Logistics Management Center (AFLMC). The primary mission of the AFLMC is to improve the capability of USAF logistics forces. To perform this mission, the Center develops, analyzes, evaluates, and helps implement new or improved concepts and systems that increase the Air Force's readiness to react to and sustain combat.

h.	Other Price Growth.....	+655	

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

11. Program increases		
a. Civilian Pay (FY 1988 Base \$436,586)		+156,218
This increase of 2.211 workyears is required to raise the utilization rate from 89% in FY88 to 98% in FY89. These workyears are required to perform the most critical functions within the inventory control points. Severe funding constraints necessitated the low utilization rate in FY88 and caused delays in many of the functional areas. Inadequate workyears in the Inventory Control Point function will result in: (1) inaccurate forecasting of consumable, replacement, and equipment items; (2) inadequate provisioning; (3) lack of asset distribution oversight; (4) increased incorrect inventory levels; (5) poor factor maintenance which relates to wrong items on shelf/repairs; (6) purchase requests (PR's) late to procurement; and (7) increased back-orders/MICAP's.	\$+78,232	
b. Purchased Maintenance (FY 1988 Base \$8,132)		+163
Increased funding is needed for periodic and continued maintenance on sophisticated computers installed in several technical support facilities. An example is the Avionics Integration Support Facility for the F-15, F-16, F-4 and F-111. These weapon systems are highly computerized and the maintenance must be performed by special contractors.		
c. Dedicated MC-130, AC-130, MH-53, H-60, HC-130 Support, plus normal, KC-135 Reengineering, and ALCM/F107 Program Changes		+4,718
Addition of 168 endstrengths (137 workyears since dedicated support manning has been costed at full manyear costs) to support these weapon system requirements.		
d. Restoration of workyears and funding that were reduced in FY 1988 to fund CHAMPUS and Logistics Management Systems program requirements		+73,105

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

12. Program Decreases.....		-28,707
a. Two less civilian workdays.....	\$-3,907	
b. LMS Productivity Saving.....	-11,747	
This reduction of 727 endstrength (363 workyears) is a direct result of greater efficiencies created by the implementation of portions of the Logistics Modernization System (LMS). These greater efficiencies and reduction of personnel is in accordance with the intent of the Packard Commission Report on decreasing Acquisition Personnel.		
c. Small ICBM program restructure (23 authorizations.....		
46 Workyears Deleted).....	-1,584	
d. Travel (FY 1988 Base \$9,471).....	-1,532	
Reduction caused by programmatic adjustments to the small ICBM, and GWEN programs. Mission essential travel on all other programs has been decreased to 50% of requirement due to funding constraints. This will cause degradation to the required level of technical interface work being done on acquisition and modification phases of weapon systems. The technical interface is a meeting between logistics managers, manufacturers, contractors, Air Force Systems Command, and using commands to ensure the most cost-effective and most easily maintained system is procured.		
e. Printing (FY 1988 base \$6,683).....	-889	
Curtails printing support for the reproduction of bid sets that are required for competitive procurements. A reduction in this area can result in uneconomical contract awards.		
f. Miscellaneous Contracts (FY 1988 base \$85,806).....	-3,070	
This reduction will delete the planned software updates to the existing Minuteman Data Analysis System which would have accommodated component reliability data generated by the Peacekeeper weapon systems. Strategic War Planners will be using inaccurate planning factors without this data. Also, technical data to properly maintain the B-1B will not be available.		

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

- g. Supplies (FY 1988 base \$17,417) -4,177
This reduction will compress the level of day-to-day operations and limit support for engineering test supplies and laboratory chemical supplies.
- h. Equipment (FY 1988 base \$2,206) -1,801
Delay planned replacement equipment in test and laboratory facilities into FY90. The continued use of obsolete equipment will cause degradation of the test and laboratory mission.

13. FY 1989 Budget Request (Amended) \$639,495

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

The following performance indicators project workload requirements for this program budget activity group. Projections are in terms of scope of program activity, quality, and production counts. No single indicator can be construed as being indicative of the total workload trend.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

Explanation of Changes:

1. Aircraft Age (Force Average Years)

This indicator reflects the relationship that exists between the increasing age of the aircraft fleet and the increasing logistics support required to maintain their availability and readiness posture. With approximately 9,600 aircraft in the inventory, 60 percent are over 15 years old. In FY88 6,200 aircraft, or 65 percent of the fleet, are 15 years or over in age. In FY89 this figure will reach 6,500 aircraft, or 68 percent of the fleet.

2. Aircraft Inventory Supported.

This indicator reflects the relationship that exists between aircraft inventory and ICP's responsibility to provide and maintain logistics support to using commands. Estimates are primarily affected by aircraft acquisition programs and by planned inventory reductions.

3. Items Managed.

This indicator is shredded to cover consumable (Stock Fund), investment (recoverable), and equipment (support equipment) type items managed by the Air Logistics Centers. Workload associated with this indicator includes determining stock levels for field and depot activities, processing customer requisitions, computing buy requirements, initiating purchase requests, resolving back order problems and providing logistics management support.

FY99 growth is due to the continuation of new items for the C-5B, F-15E and F-16C/D. Reprourement of peculiar spares in addition to the common spares will generate about 4,248 PRs yearly from FY89-92.

The workload estimates, provided in the indicators, have been offset by items leaving the inventory due to the replacement of items from modification programs and weapon system deactivations.

Manpower resources are needed to determine item identification and cataloging requirements, evaluate form, fit and function, initiate purchase requests, process customer requisitions, resolve back order

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

problems and keep stock availability (fill rates) at acceptable levels and Not Mission Capable-Supply (NMCS) incidents to a minimum.

4. Requisitions Processed.

This indicator represents the total number of requests received from customers for spare parts in support of all AF weapon systems. The growth in FY89 is a continuation of the effect of acquisition programs due to their increased production and deployment in the field. The rate of growth has been offset by planned aircraft inventory reductions.

Manpower resources are required to ensure that back order conditions are kept to a minimum and stock availability (fill rates) are at acceptable levels.

In FY89-92, the C-5B will generate approximately 4,248 PRs annually.

5. Purchase Requests Line Items Initiated.

This indicator is representative of the workload involved in the procurement of the items, equipment or services needed to satisfy customer requirements.

FY 89 decrease is due to price reviews and competitive interfaces which have increased the use of quantity discounts for single large buys, reducing the number of repeat buys.

Manpower resources are needed to prepare purchase requests, determine security classification, requirements consolidation and first article inspection requirements, prepare justification and approval packages per Public Law 98-369 (CICA) for sole source selection, analyze demand trends, maintain procurement histories and get delivery schedules.

6. Aircraft flying Hours Supported.

These are total Air Force flying hours inclusive of Guard, Reserve, Active O&M, and Airlift Service Fund flying hour programs.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

The flying hour program impacts component and engine repair workload, both field and depot, which affects logistics support requirements. Considerable advance planning and coordination with the using commands and depot maintenance facilities are required to remove active weapon systems/items from the fleet, accomplish simultaneous modification and repair, and return the serviceable systems/items in the shortest possible time. Older weapon systems increase workload complexity, particularly in modification program accomplishment while ensuring the flying hour program will be met. Complexity also increases when aircraft inventory is reduced, yet their flying hours increase (i.e., B-52, T-37 and T-38).

Manpower resources are needed to schedule with organic or contract depot facilities for simultaneous modification and repair, identify the availability of modification kits and other repair parts, manage the use of government furnished materiel (GFM) by contractors, and ensure the availability of technical and engineering data.

7. Technical Data Changes Processed.

This indicator measures the number of publication changes to Technical Orders (TOs) that are attributed to identified deficiencies through the annual review of TOs or by deficiencies reported from field and depot activities. Technical Orders provide guidance to depot maintenance and using command's intermediate and field level maintenance activities on the replacement or repair of items. Engineering analyses are performed on the maintenance and repair procedures, equipment or system parts breakdowns and on any special tooling required to determine the extent of a deficiency and the appropriate change in technical data.

Workload increases in FY88 and FY89 due to the accelerated program management responsiveness transfer (PMRT) of Peacekeeper.

8. Modifications Managed.

This indicator includes both Class IV modifications which update weapon systems to improve their performance or extend their source life and Class V modifications which give weapon systems additional mission capabilities. Associated workload includes analyzing proposed changes in mission or life

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

extension, evaluating the feasibility of modification plans, determining requirements, managing configuration control of aircraft affected by modifications, negotiating and scheduling modification programs with using commands and maintenance activities, identifying required mod kits and spare parts, managing government furnished materiel (GFM) used by contractors, ensuring the availability of technical and engineering data and monitoring modification execution.

The growth in FY89 is attributed to R&M and safety modifications for the C-141, F-15, C-130, C-137 C-5, C-9, T-37 and multi-aircraft and Class V modifications for the A-10, C-130, F-4, F-16, E-4 and KC-10 aircraft. Adequate manpower resources are needed to ensure the timely execution and management of programmed modifications, determine tech data requirements, ensure adequacy of TOs, resolve design deficiencies and determine buy requirements.

9. Breakout Screening Line Items Processed.

This indicator represents the workload associated with the screening of engineering/technical data for the acquisition of replenishment spares at a competitive price.

No growth is projected for FY89.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Inventory Control Points

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Procurement Operations

I. NARRATIVE DESCRIPTION:

The Procurement Operations activity group provides for: (1) Air Force Logistics Command (AFLC) procurement of centrally managed supplies, equipment and services required to support Air Force and certain other DOD and foreign ally weapon systems; (2) contract administration services for contracts assigned to the Air Force Contract Maintenance Center (in AFLC) and the Air Force Contract Management Division (in AFSC); (3) funding for the Air Force members of the Armed Services Board of Contract Appeals (ASBCA). AFLC Central Contracting issues contracts for the acquisition of replenishment spare parts and equipment, programmed depot maintenance (PDM), and repair/modification of Air Force major weapon systems (F-15, F-16, B-1, B-52, Minuteman). Substantial revisions in contracting policy and procedures directed by Congress, DOD, and the Air Force (including the Spare Parts Pricing, Competition, and Data Rights initiatives), have significantly increased the workload in this activity group. The Air Force Contract Maintenance Center (AFCMC) administers contracts totaling \$5.6 Billion for CONUS contractor field teams, and overseas weapon system production, modification, maintenance and site activations. The Air Force Contract Management Division (AFOMD) performs surveillance/management of major weapon system research, development, production and support contracts totaling over \$205 Billion which are performed within the CONUS. The contracts which AFOMC and AFOMD administer have been awarded by the Air Force, other DOD components, other agencies of the U.S. Government, or by foreign allies. The ASBCA hears and rules on disputes between contractors and the government.

II. DESCRIPTION OF OPERATIONS FINANCED:

The largest element of expense for this activity is the pay of civilian personnel who:

(1) Solicit, analyze, negotiate, award, amend and terminate contracts for items of supplies, spare parts and equipment for which AFLC has inventory management responsibility; for maintenance, modification, repair, and overhaul of major weapon systems; and for related services. AFLC Central Contracting performs all functions related to contractual actions, from the initial receipt of requirement(s) identified by purchase request line items to the final "closeout" action on the contract file (retirement after evidence of completion of performance and payment). Intermediate steps include preparing and issuing solicitations, performing cost and price analysis, conducting negotiations, reviewing and awarding contracts, processing amended shipping instructions and delivery acceleration requests, monitoring both first article and production quantity delivery performance, and issuing and negotiating termination notices and settlements.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Procurement Operations

The organizations involved include the central contracting offices at the five Air Logistics Centers and the Wright-Patterson Contracting Center.

(2) Perform contract administration (AFOMC) at overseas contractor facilities, supporting such diversified efforts as weapon system production, modification, depot maintenance, engine overhaul, component repair, and site activations. Functions involved include quality assurance, flight acceptance, property surveillance, manufacturing, and contract administration. Air Force Contract Maintenance Center detachments and operating locations have been established at various European, Middle-East and Asian sites.

(3) Perform CONUS contract administration (AFOMD) for major weapon system acquisition and logistics support programs. AFOMD ensures contractor compliance with contractual terms and conditions through, hardware inspections, real-time surveillance of contractor operations, and a systematic appraisal of all contractor management systems -- including engineering, manufacturing; quality assurance; use of Government facilities, equipment and material; flight operations, logistics support; and subcontractor and purchasing, pricing, overhead and contracting functions. Intermediate steps include detecting existing and potential contractor deficiencies, generating timely corrective action, and motivating contractors to produce quality hardware and develop and maintain effective management systems.

(4) The ASBCA reviews and decides issues referred to it as the result of disputes between contractors and the government. PE 71113 pays for the Air Force members of the ASBCA and their support.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Procurement Operations

III. FINANCIAL SUMMARY (Q&M \$ in Thousands):

A. SUBACTIVITY BREAKOUT	FY 1987	FY 1988		Initial Estimate	FY 1989 Change	Amended Estimate	Change FY 88/89
		Budget Request	Approp				
71113 Procurement Operations.....	\$209,645	\$209,996	\$200,627	\$197,127	\$5,842	\$221,544	\$24,417

B. SCHEDULE OF INCREASES AND DECREASES:

1. FY 1988 President's Budget Request.....	\$209,996
2. Congressional Adjustments.....	
a. ADP Processing.....	\$-64
b. Civilian Personnel.....	-5,371
c. Inflation.....	-77
d. Manpower Savings.....	-1,241
e. Leased Telecommunications.....	-84
f. Travel.....	-156
g. Workyear Pricing.....	-2,376
3. FY 1988 Appropriated Amount.....	\$200,627
4. Price Changes.....	
a. FY88 Pay Raise.....	\$2,957
b. FY88 Health Benefits Increase.....	+1,736
c. Federal Employees Retirement System (FERS) Changes.....	-6,393
5. Program Increases.....	
a. Civilian Workyears.....	+\$599
	+599

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Procurement Operations

This increase funds additional workyears required to maintain procurement operations at the 89% utilization rate. Funds sourced from other lower priority Air Force requirements.

6. Program Decreases.....			-2,399
a. Small ICBM Program restructure (-141 Authorizations and -70 Workyears)		\$-2,399	
7. FY 1988 Current Estimate.....			\$197,127
8. Price Growth.....			+5,767
a. Stock Fund Rates.....		\$+87	
b. Industrial Fund Rates.....		+13	
c. Annualization of FY 1988 Civilian Pay Raise.....		+498	
d. FY 1989 Civilian Pay Raise.....		+3,668	
e. Federal Employees Retirement System (FERS).....		+496	
f. Civilian Health Benefits.....		+578	
g. Contract Price Changes.....		+140	
h. Other Price Growth.....		+287	
9. Program Increases.....			+26,396
a. Increase of 480 civilian workyears over FY 1988 (FY88 Base \$179,724)...		\$+26,396	

The increase of 734 workyears is required to raise the utilization rate from 89% in FY88 to 96% in FY89. These workyears are required to perform the most critical functions within procurement operations. Severe funding constraints necessitated the low utilization rate in FY88 and caused major increases in Uncompleted Purchase Requests. Lack of funding to support requested workyears in the Logistics Procurement Operations area will lead to: (1) increased acquisition lead time, pipeline will be longer and cost more; (2) more delinquent deliveries resulting in longer maintenance delays, increased cannibalization and understated requirements; (3) poor quality contracts leading to higher prices and less competition, undefinitized contracts and marginal

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Procurement Operations

contractors will increase; (4) horror stories of over-priced items will likely return.

-7,746

10. Program Decreases..... \$-1,565

a. Two less Civilian workdays in FY89.....

-3,126

b. Logistics Management System (LMS) Productivity Savings.....
This reduction of 175 endstrengths (87 workyears) is a direct result of greater efficiencies created by implementation of portions of the LMS modernization program. These greater efficiencies and reduction of personnel is in accordance with the intent of the Packard Commission Report on decreasing acquisition personnel.

-3,055

c. Small ICBM Restructuring (FY88 Base \$3,520).....
This reduction of 30 endstrengths (85 workyears) is from restructuring the small ICBM program to lower levels. All endstrengths and workyears in support of the small ICBM program will have been deleted by EOY FY89.

\$221,544

11. FY 1989 Budget Request (Amended).....

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Procurement Operations

IV. PERFORMANCE CRITERIA AND EVALUATION:

The following performance indicators project total workload requirements and capabilities for this budget activity group. Projections are in terms of scope of program activity, production, and work in-process. While the indicators are not driven directly by quality, it has a definite indirect impact. The legal and ethical parameters under which DOD contracting operates, mandate the highest level of quality obtainable.

A. AFLC CENTRAL CONTRACTING

	FY 1987	FY 1988	FY 1989
	Actual	Estimate	Estimate
1. AFLC Procurement Offices.....	7	7	7
2. Purchase Request Line Items Received.....	240,486	269,864	269,020
3. Uncompleted Purchase Request Line Items (Work In-Process).....	55,193	60,848	56,975
4. Contractual Actions Issued:			
\$0 - \$24,999.....	80,583	85,417	84,612
\$25,000 - \$99,999.....	14,415	15,730	15,346
\$100,000 and Over.....	11,570	12,127	12,558

EXPLANATION OF CHANGES:

1. PURCHASE REQUEST LINE ITEMS RECEIVED:

a. This indicator is driven by D/MM line item initiations. Authority to buy one year economic order quantities rather than every six months and continued emphasis on requirement consolidation had decreased the rate of growth projected. Because of budget cuts and uncertainty of mission support requirements in FY88 fewer items were bought on each purchase request causing the number of purchase requests to go up. Because of the increase in purchase request line items and reductions in personnel, requirements

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Procurement Operations

consolidation will not keep pace with the growth. This will cause the number of smaller dollar contracts under \$100,000 to increase in FY88 (see para 3 below)

b. FY88/89: New weapon system support growth and modification programs will keep PR line item receipts high in FY89. Workload for the B-1, C-5B, F-15E and F-16C/D programs will generate more requirements for currently procured items and introduce new items into the inventory.

2. UNCOMPLETED PURCHASE REQUEST (PR) LINE ITEMS (WORK IN-PROCESS):

a. Work in-process continues to show growth. Increased productivity through the aggressive hiring and training of quality personnel, which contributed to slower growth in the past has stopped because of the constrained budgets.

b. The ability to decrease administrative lead time (ALT) will be the key to continued stabilization of the work in-process. Currently averaging 107 days, ALT continues to influence this indicator. Hiring freezes, early outs and furloughs in FY88 will cause ALT and work-in-process to increase which will cause delays in obtaining contracted items and will impact mission support. Also contributing to ALT and work-in-process increase is the complexity of meeting the many new Congressionally directed procurement requirements.

c. FY88/FY89 Budget stability and increased workforce would cause work in process to decrease in FY89 and out years.

3. NUMBER OF CONTRACTUAL ACTIONS ISSUED:

a. The impact of stringent efforts to decrease issuance levels of undefinitized contractual actions (UCAs) and increase definitizations, resulted in a smaller rate of growth in the actions reported in this indicator in past years. Significant increases in the number of small dollar contractual actions is because of the constrained budgets and manager's efforts to use money only for their most critical requirements.

b. FY88/FY89: Previous emphasis on consolidation and requirements contracts resulted in slower increases in contractual actions. Impacts of constrained budgets can result in significant changes in this indicator. Fewer dollars may mean fewer contractual actions if exact cuts are known. If unknown as

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Procurement Operations

in the first part of FY88, the number of contract actions can go up as organizations protect funding by buying only a few items at a time. increased budgets can be handled with the same or fewer contractual actions if increases are anticipated, few budget changes are made, and there is adequate workforce for the workload.

FY 1987	FY 1988	FY 1989
ACTUAL	ESTIMATE	ESTIMATE

B. AFLC OVERSEAS CONTRACT ADMINISTRATION - (AFOMC)

1. Detachments/Operating Locations	9/18	9/22	9/23
2. Direct Contractor Man-Hours	5.1M(est)	5.2M	5.3M
3. Contracts Administered	2635	2804	2910
4. Contractors	279	301	347

EXPLANATION OF CHANGES, FY87/FY88 - FY88/FY89:

- DETACHMENTS/OPERATING LOCATIONS: The growth in this indicator represents the deactivation and activation of Dets and Ols depending on contract issuances to overseas countries. Operating locations have been and will be activated in Milano, Italy; Taif and Khames, Saudi Arabia; and Bong Dung. This indicator alone represents the significant growth in overseas workload.
- DIRECT CONTRACTOR MAN-HOURS: Man-hours reflect the F-16 Falcon Rally Repair, F-4G MOD/PDM, F-111 and F-15 MOD/DLM increases in our European and Asian detachments as well as significant man-hour increases at Randolph AFB in support of the T38 and T37 contractor field teams.
- CONTRACTS ADMINISTERED/CONTRACTORS: The number of contracts administered and the number of involved contractors will continue to show growth. This is due to European co-production programs involving numerous prime, sub and lower tier CONUS and foreign vendors. CASEUR (F-16 Contract Administration Services Europe) is comprised of a four country consortium of companies co-producing F-16 aircraft/engine components. A similar program is PEACE ONYX which is comprised mainly of Turkish vendors and involves in-country production of aircraft components, engines, radar, etc. This workload is expected to continue to grow in the future. Other co-production programs include country 85F (classified country name) and the Greek F-16.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Procurement Operations

	FY 1987 <u>Actual</u>	FY 1988 <u>Estimate</u>	FY 1989 <u>Estimate</u>
--	--------------------------	----------------------------	----------------------------

C. AFSC CONUS Contract Administration - (AFCON):

1. Air Force Plant Representative Offices (AFPROs)	24	24	24
2. Government Sales (Then-year Dollars in Billions)	38.1	37.0	38.8
3. Contractor Manyears	302,023*	293,174*	296,340*

* NOTE: Does not include the classified work and sales

Explanation of Changes:

Government Sales (2) are projected contractor sales to the Government of weapon systems, equipment, supplies, research, and other services. Contractor Manyears (3) are projected contractor workforce requirements to perform forecasted Government contractual requirements. Both of these indicators reflect continuing work on existing programs and the beginning of new programs such as C-17, UK and French AWACS, Commercial Expendable Launch Vehicle (CELV). (CELV support workload is mandated by Presidential Directive, the Commercial Space Launch Act, and DOD Directive). The contractor's declining estimate are a reflection of DOD budget reductions.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Base Operating Support (BOS)

I. NARRATIVE DESCRIPTION:

This activity group contains the resources for the Air Force's weapon system launch and recovery capability at fixed bases and installations. Base Operations provides for the operation of utility systems; maintenance, repair and minor construction of facilities; engineering services such as fire protection, crash rescue, custodial services, refuse collection, runway and street snow removal, and leasing of real property; a security force to protect aircraft, missiles, buildings, equipment, and to enforce the law; ground transportation to insure operational readiness; facilities and support to tenants on Air Force installations who support, assist, train and protect our forces; administrative and ADP services essential to operations; food, clothes, and housing for our support and operational forces; and morale, welfare and recreation support to Air Force personnel and their dependents.

- Personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through in-service or contractual effort.
- Supplies or contract costs for minor construction performed by the base civil engineers and through facility project contracts with private concerns.
- Costs of procurement, or personnel, supply and related costs of production and distribution of basic utility services (electric, heating, refrigeration, air conditioning, water).
- Supplies, equipment, purchase of services and administrative support for other engineering activities such as fire protection, crash rescue, snow removal, refuse collection, or custodial activities.
- Personnel, supply, travel, ADP support, rent and other costs associated with administration (such as Comptroller, Personnel, Judge Advocate, Command Section activities).
- Personnel costs, travel, equipment rental, supplies for the management and operation of retail supply organizations, fuels management and engine management activities.
- Personnel, supplies and other costs of maintenance and repair of installation equipment, including vehicles, office machines, furniture and appliances.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Base Operating Support (BOS)

- Personnel, supply and other costs for other base services such as security police, traffic management, vehicle operations.
- Personnel, supply and other costs for other personnel support such as that provided by chaplains, food service operations, linen exchange, Army and Air Force Exchange Service.
- Personnel, contracting, equipment and supplies, travel and other costs associated with the supervision, management and coordination of billeting.
- Personnel, supplies, equipment and other costs for morale, welfare and recreation programs.

II. DESCRIPTION OF OPERATIONS FINANCED:

Funds provide base operating support in the following areas:

- A. Maintenance and Repair: Includes personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through in-service or contractual effort. Finances pay and allowances for civilian personnel.
- B. Minor Construction: Includes supplies, personnel, and contract costs for minor construction performed in-service or by private concerns. Finances pay and allowance for civilian personnel.
- C. Operation and Utilities: Includes cost of production and distribution of basic utility services (electric, heating, refrigeration, air conditioning, sewage, and water). Finances pay and allowances for civilian personnel.
- D. Other Engineering Support: Includes fire protection, crash rescue, snow removal, refuse collection and custodial activities. Finances pay and allowance for civilian personnel.
- E. Administration: Finances all activities concerned with the headquarters command and administration of the Base; Organizational Effectiveness program; and other Base-wide activities not otherwise provided for, such as comptroller activities. Finances pay and allowances for civilian personnel.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Base Operating Support (BOS)

- F. Retail Supply Operations: Finances the operation of base supply. Includes the operation of customer support center, purchasing and contracting offices, clothing issue points and POL resale points.
- G. Maintenance of Installation Equipment: Finances system and general support systems such as vehicles and installation equipment. Finances pay and allowances for civilian personnel.
- H. Bachelor Housing Operation, Administration, and Furnishings: Finances the purchase, control, moving and handling of bachelor housing furnishings for bachelor officer quarters and bachelor enlisted quarters; and finances the operation and administration of all unaccompanied personnel housing. Finances pay and allowances for civilian personnel.
- I. Morale, Welfare, and Recreation: Finances the development, staffing, equipping, administering and operating of libraries, sports programs, child care services, and open mess. Finances pay and allowances for civilian personnel.
- J. Other Base Services: Finances security police, terminal services, laundry and dry cleaning, base transportation, and other base-wide services. Finances pay and allowances for civilian personnel.
- K. Other Personnel Support: Finances chaplain activities, information program, food service, alcohol and drug abuse program, installation museums, and reenlistment activities. Finances pay and allowances for civilian personnel.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Base Operating Support (BOS)

III. FINANCIAL SUMMARY (BOS \$ in Thousands):

	FY 1987	FY 1988		FY 1989		Change FY 88/89
		Budget Request	Approp	Current Estimate	Initial Estimate	
A. SUBACTIVITY BREAKOUT

78094 Real Property Maint Activities (Eastern Test Range).....	9,425	8,378	8,353	8,353	8,659	8,686 333
Total.....	\$649,138	\$652,781	\$660,086	\$666,437	\$691,383	\$670,073 \$3,636

B. SCHEDULE OF INCREASES AND DECREASES:

1. FY 1988 President's Budget Request.....	\$652,781
2. Congressional Adjustments.....	
a. Moral, Welfare, and Recreation.....	\$-2,769
b. AF Historians.....	-497
c. Inflation.....	+7,571
d. Logistics Modernization System.....	+3,000
3. FY 1988 Appropriated Amount.....	\$660,086
4. Appropriation Transfers.....	
a. Directed Transfer for part of the INF Treaty.....	\$-36,300
Transfer for the Intermediate Nuclear Forces Treaty Start Up Operational Requirements.	-61,900

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Base Operating Support (BOS)

b.	Directed transfer for Airlift Service Industrial Fund ASIF Refund of \$63,700 could not be made in FY88 due to inadequate resources. A program reduction to Depot Maintenance must be made to accomodate a portion of this.	-21,700
c.	Directed transfer for part of the DOD Dependent Schools. Funds were restored at the expense of other O&M programs.	-3,900
5.	Price Growth.....	-4,076
a.	FY88 Pay Raise.....	\$+4,650
b.	Federal Employees Retirement Systems (FERS) Changes.....	-11,414
c.	FY88 Health Benefits Increase.....	+2,688
6.	Program Increases.....	+79,876
a.	Acquisition and Command Support (ACS) .The base operating support associated with the ACS transfer from the RDT&E appropriation was not included in the FY88 Budget Request. Funds sourced from other lower priority Air Force O&M requirements.	\$+65,300
b.	Professional Intern Program..... Funds the Professional Intern Program which allows the Air Force to recruit college graduates and other high potential candidates to fill professional, technical and analyst positions. This program is necessary to maintain a high quality civilian workforce. Funds sourced from other lower priority AF requirements.	+12,200
c.	Civilian Permanent Change of Station (PCS) Funds the PCS costs of GS-12 and above civilians who must change geographical locations as a condition of employment. This expense is necessary so all eligible job candidates are given equal consideration and the most qualified individual can be selected. Funds sourced from other lower priority AF requirements.	+2,376

ACTIVITY GROUP: Base Operating Support (BOS)

447

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Base Operating Support (BOS)

11. Program increases.....		+4,671
a. Increase of 132 workyears (FY88 Base, \$281,774).....	\$+3,733	
Workyears are added to increase the utilization rate from 95% to 98%. FY88 low utilization rate caused by severe funding constraints.		
b. Equipment Maintenance (FY88 Base, \$14,056).....	+938	
Increase in the cost of maintaining equipment not replaced because of decreased funding for equipment purchases.		
12. Program Decreases.....		-25,049
a. Two less workdays in FY89 (FY88 Base, 262 days).....	\$-2,237	
b. Performance of Commercial Activities (FY88 Base, \$-0-).....	-330	
The reduction is based on anticipated savings to be achieved from future conversions to contract in accordance with the procedures of OMB circular No. A-76.		
c. Facility Energy conservation (FY88 Base, \$-0-).....	-80	
Energy savings resulting from programs aimed at reducing facility energy consumption.		
d. Real Property Maintenance (RPM) (FY88 Base, \$381,934).....	-2,939	
RPM is reduced to fund higher priority Air Force requirements. This will result in growth of the backlog of maintenance and repair for real property facilities at Air Force Logistics Command and Air Force Systems Command installations.		
e. Base Operating Support Functions (BOS) (FY88 Base, \$284,503).....	-19,463	
The BOS program has been reduced to fund higher priority Air Force requirements. Reductions include TDY, equipment purchases, equipment rentals, contracts, and supplies. As a result the overall efficiency of operating support for logistics functions will suffer.		
13. FY 1989 Budget Request (Amended).....		\$670,073

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Telecommunications, Command and Control

I. NARRATIVE DESCRIPTION:

This activity group provides communications system support to the Air Force Logistics Command (AFLC), the Air Force Systems Command (AFSC), and the Eastern and Western Test Ranges. At AFLC and AFSC the funds provide for the operation, maintenance, planning and programming for the full array of required base communications and electronic services. The services include base telephone support, record communications, intrabase radios, secure telephones, weather communications, air traffic control and navigation, and other communications-electronic systems. Test Range support includes off-base leased communications, computerized communications control equipment, and supplies for range communications systems.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for the pay of civilian personnel, supplies, equipment, leased communication services, and maintenance support.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Telecommunications, Command and Control

III. FINANCIAL SUMMARY (OM \$ in Thousands):

A. SUBACTIVITY BREAKOUT	FY 1987	FY 1988		FY 1989		Change FY 88/89
		Budget Request	Approp	Current Estimate	Initial Estimate	Change
72895 Base Communications	\$48,527	\$46,437	\$47,862	\$53,562	\$47,784	\$57,797
78034 Space & Missile Test Center Comm.	4,437	5,840	6,480	4,480	5,693	4,791
Total	\$52,964	\$52,277	\$54,342	\$58,042	\$53,477	\$62,588
						\$4,546

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Miscellaneous Logistics Support Activities

I. NARRATIVE DESCRIPTION:

This activity group provides resources for the Air Force Logistics Command (AFLC) Automated Data Processing program which includes the Logistics Management Systems (LMS) modernization effort and the day-to-day operation of data systems that support the Air Force logistics mission. It also provides for Headquarters, Air Force and AFLC printing and reproduction services.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for the cost of civilian personnel, travel supplies, equipment maintenance and contract support required in the operation of 487 automated data processing systems throughout AFLC, including the LMS modernization program. Resources also provide for the cost of printing and reproduction of regulations, manuals, and pamphlets in support of Headquarters, Air Force and printing, duplicating and microform requirements in printing plants at the five Air Logistics Centers and at Wright-Patterson AFB, OH.

4. Information Systems Requirements Documents (ISRDs) Processed (MY).....	306	306	306
5. ISRD Backlog (MY).....	310	310	310

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Miscellaneous Logistics Support Activities

Description and Explanation of Changes:

1. Data Systems Assigned:

DESCRIPTION AND EXPLANATION OF CHANGES: AFLC information systems activities process 487 individual automated data systems in the command's centralized computer facilities. The applications are varied and subject to change upon demand by the user. Data system mainframes at eight locations are used to process logistics data, scientific/engineering applications, command and control data, financial/budget data, and other applications required for efficient logistics support. Manpower funded under this indicator performs systems monitoring, systems maintenance, modification, surveillance, and technical support.

In FY89, 34 AFLC unique data systems are projected to be incorporated into the LMS Modernization Program.

2. ADP Mainframes (Requiring Operators):

DESCRIPTION: AFLC has 118 mainframes which require operator support to process the data. Some computers are dedicated directly to the logistics mission, while others serve special purposes or are common to other Air Force base level Information Processing Centers. Each of the five Air Logistics Centers (ALCs) and the Wright-Patterson AFB facility have a mix of small, medium, and large scale processors, most of which are operational 24 hours a day, seven days a week.

3. Number of Terminals:

DESCRIPTION AND EXPLANATION OF CHANGES: Improvements and changes to the inventory have impacted this indicator. Continued growth in FY89 is expected due to acquisition of new technology for programmer workstations and user inquiry capabilities. Included in this indicator are all AFLC "smart" and "dumb" computer terminals. Smart terminals have stand-alone capability, i.e., Z-100/150. Dumb terminals must be connected to a computer central processing unit (CPU) via communication lines.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Miscellaneous Logistics Support Activities

4. Information Systems Requirements Documents (ISRDs) Processed.

DESCRIPTION AND EXPLANATION OF CHANGES: ISRDs are issued to keep current systems operational and functioning in order to support the need of the customer. ISRDs processed relates directly to programmer/analyst type activities involved in design, analysis and implementation of data systems. This trend should continue until the modernization programs are implemented. At that time, we expect the ISRD workload to increase, since users will then be allowed to make changes to their systems.

5. ISRD Backlog:

DESCRIPTION AND EXPLANATION OF CHANGES: ISRD backlog includes all work not yet accomplished on validated ISRDs. The level of backlog for programmer/analyst type activities is expected to remain relatively constant until the modernization programs are implemented.

B. PRINTING/PUBLICATIONS DISTRIBUTION:

	FY 1987	FY 1988 Estimate	FY 1989 Estimate
1. Regulations (HQ)	\$1,625	\$1,625	\$1,625
2. Manuals (HQ)	644	644	644
3. Pamphlets (HQ)	492	492	492
4. Forms (HQ)	4,981	4,981	4,981
5. In-plant printing and duplicating (pages) (AFLC) (000)	380,222	372,618	355,166
6. Commercial printing (pages) (AFLC) (000)	981,484	1,001,114	1,021,136

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Miscellaneous Logistics Support Activities

7. Out-of-plant copying (microform reader printers, computer form printers, aperture card/engineering drawing printers, office copiers) (AFLC) (000)	265,606	292,166	321,383
8. In-plant microform (sheets) (AFLC) (000)	32,627	34,258	35,971

DESCRIPTION AND EXPLANATION OF CHANGES:

1-4. These categories portray the workload of Headquarters USAF Publishing Division as relates to Departmental Printing. The Printing procurement workload is not projected to change significantly FY89.

5. In-plant Printing (AFLC): A gradual decrease is projected in FY89. This decrease is the result of compliance with OMB direction to contract out printing services.

6. Commercial Printing (AFLC): A gradual increase is projected in FY89 as a result of compliance with OMB direction to contract out printing services. Also driving the projected increase is the requirement to update technical orders for older weapon systems such as the B-52 and the FB-111.

7. Out-of-Plant Copying (AFLC): An increase is projected in FY89 as the result of an increase in the use of self-service copiers that are being installed throughout AFLC.

8. In-plant Microform (AFLC): The projected increase in FY89 is based upon historical data that reflects an annual increase of 8%. This trend is expected to continue in FY89.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Acquisition and Command Support

I. NARRATIVE DESCRIPTION:

This activity group contains the funds to support the various staff functions at the AFSC product divisions. These divisions include the Aeronautical Systems Division, Electronic Systems Division, Space Division, Armament Division, and the Ballistic Missile Office. It does not provide funds for research, development, test and evaluation activities--those are funded in the RDT&E appropriation.

II. DESCRIPTION OF OPERATIONS FINANCED:

Categories of cost are civilian personnel, travel, transportation, contractual services, supplies, and equipment to support the following organizations:

The Aeronautical Systems Division (ASD) directs the acquisition of major aeronautical weapons systems. On-going programs include the B-1, F-15, F-16, air-launched cruise missile (ALCM), and Maverick. In addition, ASD manages the installation of new engines such as on the KC-135R, and oversees production of weapons systems.

The Electronic Systems Division (ESD) is the primary agency for the development and acquisition of command, control, communications, and intelligence systems for the Air Force and other DOD agencies.

Space Division (SD) is the focal point for research, development, acquisition, launch, and the on-orbit command and control of military space systems. SD is also the DOD focal point for plans and activities associated with the NASA Space Transportation System Program.

The Armament Division (AD) is responsible for all Air Force non-nuclear armament development to include guided weapons, mines, fuses, aircraft gun ammunition, targets, and related armament support. AD is also the focal point for munitions integration in aeronautical systems.

The Ballistic Missile Office (BMO) is responsible for development, production, acquisition, and testing of all DOD intercontinental ballistic missiles (ICBMs).

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Industrial Preparedness

I. NARRATIVE DESCRIPTION:

The industrial preparedness program provides for two industrial-related activities in FY 1989. It provides resources for common activities at Air Force Plant #42, Palmdale, California; and it funds the operation of the Defense Production Act Title III Program Office at Wright-Patterson Air Force Base, Ohio.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources cover services to support the common-use facilities and operations of Air Force Industrial Plant 42. This plant assembles/modifies critical portions of the B-1B, TR-1, F-5, SR-71, Space Shuttle, and classified systems. The plant consists of 5,644 acres of land, includes two 12,000 foot runways and associated taxiways, and is surrounded by DOD contractors: Rockwell, Lockheed, and Northrop, which are responsible for, and fund normal repair and maintenance activities, those specific areas they occupy. These funds include joint administrative services, fire protection for flight operations which include those of an Air Force contract administration service office, crash-rescue, first aid communication equipment operation, maintenance of joint buildings and structures, heating and cooling equipment, janitorial services, rubbish collection and disposal, water and sewage systems, and an inventory of small consumable equipment and tools. These funds also pay for civilian personnel to staff an office to administer the Defense Production Act Title III Program Office in accordance with instructions from the Office of the Secretary of Defense and Congress which approves individual projects. In addition to manpower, the funds are used for Service and contractor proposal technical evaluation and support. This includes reviewing industrial domestic capacities, specification reviews, engineering support and qualification testing reimbursement to appropriate laboratories or agencies.

			+343
8.	Program Increases.....		\$+343
a.	Acceleration of Defense Production Act Activities (FY88 Base, \$2,009). The FY 88 Senate Appropriations Committee report noted that service actions to accomplish Defense Production Act, Title III requirements needed to be accelerated. To accomplish this, the newly formed Defense Production Act Title III Program Office will broaden its activities to perform technical evaluations and negotiate purchase agreements with civilian contractors to expand domestic production capability for critical items. To support such an effort, increased funding will be required to cover additional travel (\$+290), supply (\$+5), and miscellaneous contractual support (\$+48) requirements.		
9.	Program Decreases.....		-174
a.	Reduction in Civilian Pay Workyears (FY88 Base, \$441) Decrease in civilian end strengths in FY88 reduced workyears from 17 at the end of FY87 to 11. Workyears continue to decline in FY89 to 7 resulting in the decrease in civilian pay funding requirements.	\$-120	
b.	Contractor Operated Plant Costs (FY88 Base, \$9,474) Reduces janitorial and other services that are part of the facility contract supporting Air Force Plant 42. Decreases the level of effort to minimum essential, for these lower priority services, to assist in meeting shortfalls resulting from constrained funding.	-52	
c.	Two less workdays in FY89 (FY88 Base, 262 days).....	-2	
10.	FY 1989 Budget Request (Amended).....		\$12,068

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Command

I. NARRATIVE DESCRIPTION:

The Command activity group provides for the day-to-day operation of Headquarters Air Force Logistics Command (AFLC), its five Air Logistics Centers' (ALCs) Command sections, and Headquarters Air Force Systems Command (AFSC). The major objective is to operate and maintain an efficient and effective central logistics command and control capability to provide for policy formulation, planning, programming, budgeting, resource management, acquisition management, resource distribution, and review and evaluation of the program performance of subordinate units.

II. DESCRIPTION OF OPERATIONS FINANCED:

The Command activity group resources provide for the pay of civilian personnel, supplies, equipment, utilities, and contractual services associated with AFLC Headquarters, the five ALC command sections, and AFSC Headquarters.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Commissary Operations

I. NARRATIVE DESCRIPTION:

The operation of all Air Force commissary troop issue activities and resale stores is consolidated under the Air Force Commissary Service (AFCOMS). Workload management, supervision, administration and responsibility for rations, resale products, and cash accounts are performed at Headquarters AFCOMS (Kelly AFB, Texas), regional offices, and at troop issue activities and resale stores worldwide. Funding provides for certain overhead expenses of resale commissary stores, allowing goods to be sold at cost plus a 5% surcharge. AFCOMS major objectives are to fully support wartime subsistence readiness requirements and to maximize customer service to CONUS and overseas patrons.

II. DESCRIPTION OF OPERATIONS FINANCED:

The Commissary Operations Activity Group provides appropriated fund support for all Air Force commissary resale stores, staff management of the commissary system (including supervision, administration, and warehousing activities), and policy and management of troop issue subsistence functions. Resources are used for personnel-related requirements which approximate 69% of the required funding. The remaining 31% is used to support non-personnel related contractor operated functions, travel of personnel, civilian PCS moves, supplies, equipment, maintenance contracts, and other essential administrative requirements. Annual resale store/troop subsistence sales of over \$2.4 billion and 2.5 billion are projected for FY 1988 and FY 1989, respectively.

FORCE PROGRAM VII. CENTRAL SUPPLY AND MAINTENANCE

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Transportation

I. NARRATIVE DESCRIPTION:

This activity group includes the costs of First Destination Transportation (FDT) and Second Destination Transportation (SDT).

FDT is the movement of property from the point of acquisition (usually the manufacturer's plant) to the point at which the materiel is first received for use, storage, or subsequent distribution in the military materiel system. When it is advantageous to the government, FDT charges are included in the contract price of investment items financed from procurement appropriations designated as "FOB destination." When the FDT charge is not part of the negotiated contract price (i.e., FOB origin), it is paid from O&M funds budgeted for in this activity group.

Second Destination Transportation applies to the shipment of DOD property to any point worldwide after initial delivery. SDT is a key factor in the Air Force logistics system, and its resources enable the Air Force central supply and maintenance system to support forward deployed strategic and tactical combat weapon systems.

II. DESCRIPTION OF OPERATIONS FINANCED:

FDT provides for CONUS inland movement of newly procured materiel directly from contractor plants to depot and storage facilities, CONUS Air Force bases, or aerial/water ports of embarkation for onward movement. Transportation is provided by both military and commercial carriers.

SDT provides for the movement of materiel from CONUS Air Logistics Centers to field activities worldwide. It also provides port-handling charges and transportation accessorial services such as vessel retention, vessel per diem, and demurrage. Specifically, SDT provides for the movement of retrograde cargo from overseas ports of embarkation, the inter- and intra-theater distribution of Air Force mail through the Army Post Office (APO) System, the movement of strategic missiles, the Alaskan Contract Airlift System, and the support of classified Air Force special programs. SDT also provides for the movement of materiel for modification and modernization, and the movement of support equipment items for unit moves. In addition, SDT provides for prepositioning of war readiness materiel (WRM) and munitions in call-forward programs. SDT requirements generally fall into three categories: (1) those driven primarily by the flying hour program,

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Transportation

(2) those driven by troop strength (subsistence, etc.) and (3) those driven by other factors. The flying hour portion, approximately forty-eight percent of total SDT, is based on the correlation between flying hours supported by units in a geographic area and the tons of cargo needed in that area. Non-flying hour related requirements such as prepositioning of WRM, and vehicle shipments are determined by the managers of specific programs with the aid of various workload factors, such as short tons or measurement tons moved and SAAM missions used.

FORCE PROGRAM V.I.I: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Transportation

III. FINANCIAL SUMMARY (C&M \$ in Thousands):

A. SUBACTIVITY BREAKOUT	FY 1987	FY 1988		FY 1989		Change FY 88/89
		Budget Request	Approp	Current Estimate	Initial Estimate	Amended Estimate

5. Appropriation Transfers.....	+2,150
a. Transfer in for part of the \$11,000 Air Force cost to support the Intermediate Nuclear Forces start-up/operational requirements.....	\$+2,150

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Transportation

6. Program Increases.....		+9,968
a. Second Destination Transportation.....		
increased due to tonnage being shipped by surface transportation		
instead of by airlift due to funding constraints.	\$+9,968	
7. Program Decreases.....		-22,159
a. First Destination Transportation.....	\$-4,205	
FDT is decreased due to 18,177 less tons of cargo to ship caused by		
procurement appropriation cuts (-3,560); 542,964 less gallons of fuel		
required to support engine testing and aircraft deliveries (-526); and		
68 fewer Special Assignment Airlift Missions (SAAM) required to support		
deliveries of new assets from contractor's facilities (-119).		
b. Second Destination Transportation.....	-17,954	
SDT is decreased due to the cutback of logistics air (LOGAIR) to a		
day per week operation (-9,012); diversion of cargo from SAAM to		
surface transportation (-5,968); and reduction of 2,138 tons of cargo		
requiring shipment by the Alaskan Air command contract air (CONAIR)		
system (-2,974).		
8. FY 1988 Current Estimate.....		\$391,325
9. Price Growth.....		
a. Industrial Fund Rates.....		
b. Contract Price Changes.....	\$+52,018	
c. Other Price Growth.....	+6,095	
	+1,314	
10. Program Increases.....		+27,647
a. Second Destination Transportation (FY88 Base, \$365,713).....	\$+15,878	
Program growth results from the attempt to move the cargo backlog		
accumulated in warehouses caused by FY 88 constrained funding. These		
funds will support the shipment of 48,000 measurement tons (MT) of new		

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Transportation

vehicles. 21,559 MT of War Readiness Materiel (WRM) assets, expected increases to the APO Mail System, and an increase of 9,220 short tone (ST) shipped in the LOGAIR system. This restores our war fighting responsiveness to the minimum acceptable level.

b. Military Airlift Command (MAC) channel (FY88 Base, \$149,912)..... +11,769

Increase required to move 7,395 short tons of logistic cargo to the MAC channel which was diverted to surface transportation due to funding constraints in FY 88. This represents recovery of only 40% of the TP2 cargo diverted to surface transportation in FY88 due to funding shortfalls. Shipping high value cargo by surface is not the most economical method. Surface shipment directly increases the pipeline time which in turn drives up the purchase requirement for additional spares.

11. Program Decreases..... -4,473

a. Military Sealift Command (MSC) (FY88 Base, \$65,903)..... \$-1,814

Decrease of cargo movement requirements (24,264 measurement tons) and a reduced requirement of 9 per diem vessel days in support of annual resupply of the Northeast.

b. Special Assignment Airlift Mission (SAAM) (FY88 Base, \$15,245)..... -2,388

Decrease of 16 general cargo SAAM's partially offset by an increase of 13 special weapons and missiles SAAM's.

c. Fuel (FY88 Base, \$18,311)..... -271

Decrease of 352,459 gallons required to support LOGAIR systems and 161,715 fewer gallons to support engine testing and aircraft deliveries.

12. FY 1989 Budget Request (Amended)..... \$473,926

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

* SAAM missions are charged at the same rate as regular channel. The command requesting a SAAM mission will fund the additive cost from other lower priority AF requirements.

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Test Ranges

1. NARRATIVE DESCRIPTION:

This activity group provides for the operation of the Utah Test and Training Range (UTTR) at Hill AFB and for the Space and Missile Test Organization (SAMTO). SAMTO operates the Eastern Space and Missile Center (ESMC) at Patrick AFB and the Western Space and Missile Center (WSMC) at Vandenberg AFB. These are our nation's only space ports (to date a \$2.1 billion capital investment in range equipment) for all launches of sensitive National high priority DOD satellite/space systems. SAMTO operates tracking sensors that are integral elements of the DOD worldwide space surveillance network. SAMTO also operates the launch heads for developmental and operational testing of all new and existing ballistic missile weapon systems.

WSMC's geographic test area extends from the coast of California (at Vandenberg AFB) to the Indian Ocean, with the unique capability of conducting space launches to place satellites in polar orbits, and the unique capability of testing ballistic missiles using westerly trajectories--without over-flying populated land masses. Tracking instrumentation facilities are located on Vandenberg AFB, at several locations along the coast of California (Pillar Point, Anderson Peak, and Santa Inez Peak), and in the Hawaiian islands (Molokai, Kokee Park, and Oahu). The WSMC instrumentation includes 10 precision tracking radars, one area surveillance radar, three major telemetry receiving stations, a centralized data reduction capability, four major optical tracking systems, five missile flight termination transmitter systems, and a worldwide communications network. Tracking instrumentation belonging to the Army, Navy, NASA, and other Air Force activities is used to complete the tracking instrumentation network necessary for supporting missile flight safety, and acquisition of missile, space booster and satellite/spacecraft performance parameters for space and missile activities at WSMC. The West Coast Offshore Operating Area is operated by WSMC, and provides a unique corridor for aircraft and cruise missile performance testing and evaluation.

ESMC extends 10,000 miles east from the Atlantic coast of Florida to the Indian Ocean to support launches of Navy and British fleet ballistic missiles, Army ballistic missile launches, and manned and unmanned space vehicle launches for placing satellites and space platforms in equatorial orbits. Tracking instrumentation facilities are located on Patrick AFB, Cape Canaveral AFS, Jonathan Dickinson State Park, Antigua Island, Ascension Island, and Pretoria, South Africa (caretaker status). The ESMC instrumentation includes 10 precision tracking radars, one area surveillance radar, five telemetry receiving stations, a central data reduction capability, four major optical tracking systems, four missile flight termination transmitter systems, precision impact scoring system, worldwide communications network and a general purpose range instrumentation tracking ship (USNS Redstone). Tracking instrumentation belonging to NASA

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Test Ranges

and other Air Force activities is used to complete the tracking network necessary for supporting missile flight safety, and acquisition of missile, space booster and satellite/spacecraft performance parameters. ESMC also operates airfields at Patrick AFB, Cape Canaveral AFS, and Ascension Island.

The Utah Test and Training Range (UTTR), located approximately 70 miles west of Salt Lake City, Utah, consists of two large restricted ranges: the North Range, with an airspace approximately 23 by 49 miles, and the South Range, with airspace area approximately 50 by 68 miles. Both ranges are bounded by military operating areas for a total of 5800 square miles of controlled airspace. The landscape, which varies from high country desert to mountain ranges, provides excellent areas for air-to-surface and air-to-air testing and training for both manned and unmanned aircraft. The High Accuracy Multiple Object Tracking System (HAMOTS) collects, records and displays time-space position information (TSPI) for one or more targets. There are also cinetheodolites to provide additional TSPI information, particularly in terminal areas for air-to-surface missions. The UTTR radar network consists of two precision tracking radars and a surveillance radar system. Information from these radars is displayed at the mission control center (MCC) at Hill AFB via a microwave data link and can be sent to the Edwards AFB MCC when required. Two telemetry acquisition stations and a ground station are also located at the Hill AFB MCC. A mobile station is also available to be located anywhere on the range where it can interface with the microwave system. Various target facilities support both operational and test communities with standard bomb and strafing targets (Eagle Range) as well as tactical targets consisting of airfields, convoys, rail yards, etc. (Wildcat and Baker's Strongpoint ranges). Scoring is accomplished by optical or television systems.

II. DESCRIPTION OF OPERATIONS FINANCED:

ESMC and WSMC have responsibilities for planning, range control, communications, data collection (metric radar, telemetry, optical and scoring), range safety, meteorology, data processing and analysis, for aircraft, missile, and space vehicle test and evaluation. The planning and scheduling function supports user (Army, Navy, Air Force, NASA, Commercial, etc.) programs from inception through launch operations. An example is the Joint Pacific Area Scheduling Office (JPASO). JPASO is a DOD chartered scheduling and coordination organization at Vandenberg AFB. Participating organizations include Pacific Missile Test Center (PMTC), Kwajalein Missile Range (KMR), 4950th Test Wing, Consolidated Space Test Center (AFSC) and Consolidated Space Operations Center (AFSPACECOM). ESMC and other DOD Agencies as required. JPASO serves as the central point of contact for the receipt and coordination of all scheduling requirements for Pacific Area Resources, regardless of the controlling agency.

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Test Ranges

WSMC has the lead in directing the efforts of this multi-agency group, which includes NASA and various range users, to define launch and range activities in the Pacific area. Likewise, ESMC performs the same function for activities within its geographic area of responsibility. Communications facilities effectively tie together control centers and up-range, mid-range, and down-range instrumentation sites. These facilities consist of outside cable plant, microwave equipment, satellites, and HF, VHF, and UHF radios. The range control centers at ESMC and WSMC are the nerve centers for all launch support activity conducted at Vandenberg AFB, Cape Canaveral AFS, and Kennedy Space Center. They provide a single point for command over all resources participating in support of a launch or test operation. Metric Radars gather position and velocity data on test objects, missiles and space vehicles. This data is used by Range Safety to determine missile/space vehicle performance in real time and by users for post flight analysis. Missile, space vehicle and aircraft performance parameters are received and processed at telemetry sites located throughout the ranges' geographic areas, and in conjunction with aircraft and ship resources provide total coverage. Optical sites provide video, sequential and long range photographic data for users. Included are time correlated, high resolution, long range photographs of objects in space, or missiles in flight.

Optical sensors are used to observe post-boost deployment of reentry vehicles, penetration aids, and to provide a visible diagnostic capability in the event of missile malfunction. The Missile Impact Locating Scoring (MILS) is an acoustical measuring system of hydrophone arrays that provide impact location by determining the time differences for the impact sound at each hydrophone in the array. The arrays are connected by cable to land stations (Antigua and Ascension) where the data is collected for analysis. In the Pacific, Splash Detection Radars (SDR), and Recording Automatic Digital Optical Trackers (RADOT) are employed to accurately score the reentry vehicles. Real-time/post-flight data processing is provided at both ESMC and WSMC. The data centers provide data for range safety and post-flight performance analysis. Missile flight control (range safety) has the function of protecting life and property during all manned and unmanned launches from WSMC, ESMC, and Kennedy Space Center (KSC). The missile flight control function is achieved by displaying real-time computer generated, impact prediction areas, present position, and telemetry information on cathode ray tubes. As they view this information, Range Safety Officer (RSO) can determine if it is safe to permit the missile to continue its flight. ESMC also operates the general purpose instrumentation ship (USNS Redstone). This ship provides a floating platform which has all the basic capabilities of land-based facilities including communications, data collections (metric, radar, telemetry, and optical), range safety, meteorology, data processing and analysis. This allows submarine

FORCE PROGRAM V.I.I.: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Test Ranges

launched ballistic missile tests from the North Atlantic to downrange target zones at Ascension and Antigua Islands.

UTTR has responsibility for planning, air traffic control, data collection, processing and analysis, communications, and range safety for manned aircraft, cruise missiles, and remotely piloted vehicles. The Mission Control Center (MCC) serves as the UTTR primary operational control, communication, and data collection center. Located in Building 1274 at Hill AFB, the MCC can display real-time HAMOTS and radar Time-Space-Position-Information (TSPi) data on a large screen display and plot boards, respectively. The telemetry can be recorded and displayed on stripcharts. Data processing is accomplished by using four SEL 32/75 and a CYBER 73 computer located at Hill AFB and two CYBER 74 computers located at Edwards AFB. On the range itself, in addition to areas designated for aircraft to engage tow targets, UTTR has a variety of ground target and test stands to support the operational and test communities. Eagle Range is a standard scorable air-to-ground range with two bomb circles, skip targets, two acoustical strafing panels, and various armored vehicles. The helicopter air-to-ground range is an unmanned range with various armored vehicles deployed to provide a realistic tactical scenario. Wildcat and Baker's Strongpoint Ranges consist of simulated industrial complexes, bunkers and command post complexes, airfield (complete with surface-to-air missile sites), convoys, railroad yards, and aircraft revetted positions. Wildcat Range has a real-time television optical scoring system. Kitty Cat Range is a live ordnance drop area with three track vehicles that resemble an artillery fire support base. Munitions test targets are used to test new munitions and conduct shelf-life surveillance testing. Each of the 26 targets has been developed for a specific application using live and inert munitions. Range instrumentation that supports the UTTR test management and range control includes HAMOTS -- a multi-lateration system that tracks, records, and displays the position of test vehicles at the UTTR. HAMOTS collects the TSPi of one or more targets for real-time display at the MCC. The UTTR radar network is composed of two precision tracking radars and a surveillance radar system. Both tracking radars are linked by microwave to the MCC at Hill AFB and displayed on plotboards. Radar information may be sent to Edwards AFB by microwave through the data acquisition and transmission system. Two surveillance radars (AN-GPN12) are located on the range and air traffic control is provided by the 299th Communication Squadron (Clover Control) of the Utah Air National Guard. The UTTR has 12 cine theodolites to provide TSP, on test vehicles. Six cinesextants and a full range of high-speed cameras provide documentary photography. Two range telemetry acquisition stations and a ground station are located in the MCC at Hill AFB. A mobile telemetry acquisition system is available to be located anywhere on the Range Complex where there is a capability to interface with the microwave system.

Improvement Modernization Programs at both ranges resulting in continued use of equipment that is inefficient and costly to maintain. In the long run O&M requirements will increase due to the maintenance costs.

10. FY 1989 Budget Request (Amended)..... \$235,856

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Test Ranges

UTTR, ESMC, and WSMC are Major Range and Test Facility Base (MRTFB) activities under Department of Defense Directive 3200.11. MRTFB's are national assets which are sized, operated, and maintained primarily for DOD Test and Evaluation support missions and are also available to all users having a valid requirement for their capabilities. Funding of the MRTFB is designed to (a) assure the most effective development and testing of material; and (b) provide for interservice compatibility efficiency, and equity without influencing technical testing decisions or inhibiting legitimate and valid testing. MRTFB users reimburse the specific activity for services rendered in accordance with guidance in DODD 3200.11. All costs not reimbursed by users are funded by the managing activity (AF for UTTR, ESMC, and WSMC). Total funds required to operate and maintain UTTR, ESMC, and WSMC are composed of reimbursements earned from users and direct O&M funds (3400) provided by the Air Force in this activity group. Other procurement funds (3080) are provided to procure equipment to update, extend the useful life and modernize the existing instrumentation capabilities. A portion of the funds in this activity group provides the manpower and supplies for the design, installation, and checkout of hardware procured (3080) for the improvement and modernization programs.

1) ESMC

	FY 1987	FY 1988	FY 1989
DIRECT (3400 FUNDS FROM THIS ACTIVITY GROUP)	\$134,087	\$134,071	\$135,503
OTHER PROCUREMENT (3080)	38,721	49,683	26,497
REIMBURSEMENTS	119,275	120,963	120,085
TOTAL	\$292,083	\$304,717	\$282,085

These funds provide for the operation of the ESMC which includes:

- 10 precision radars
- five telemetry receiving stations
- four major optical tracking systems
- four missile flight termination system transmitter systems

FORCE PROGRAM VIII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Test Ranges

a general purpose instrumentation ship (USNS Redstone)

a worldwide communications network

Base Operating Support (BOS) at instrumentation facilities located at Jonathan Dickinson State Park, Grand Bahama Island, Antigua, Ascension Island, and Pretoria, South Africa (caretaker status)

a special purpose instrumentation ship (USNS Observation Island)

airfields at Grand Bahama Island and Ascension Island

BOS funds for Patrick AFB, Cape Canaveral AFS, and their airfields are provided in another activity group. ESMC activities are accomplished largely through two major contracts (Pan Am/RCA and Technicolor Graphics). The work breakdown structure which follows provides a measure of the scope, diversity, and complexity of ESMC activities.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Environmental Restoration

I. NARRATIVE DESCRIPTION:

The Environmental Restoration Activity Group provides funding for two major programs: (1) the repair of environmental damage caused by contamination and (2) the removal of hazardous waste generated from current activities. Budget development for these two programs is separately accomplished; the first through the Office of the Secretary of Defense (OSD), and the second directly by the Air Force.

Beginning in FY 1986, funds for the correction of environmental damage caused by contamination were appropriated in a centralized DoD transfer appropriation, "Environmental Restoration, Defense." Air Force environmental restoration requirements are initially identified and submitted through Air Force channels, to the Deputy Assistant Secretary of Defense for Environment (DASD(E)) for approval. Approved projects are consolidated by DASD(E) for all the military services and submitted as part of the overall DoD budget request. Funding is maintained in the Defense Environmental Restoration Account (DERA). OSD transfers funds to the Air Force during the year of execution. Commencing in FY 1987, funds were included in the O&M, AF appropriation for the removal of hazardous waste materials generated from current activities and other related hazardous waste initiatives. These requirements are directly budgeted for in the Air Force O&M budget and are directly appropriated to the Air Force in Major Force Program VII. In previous years these operations were financed by the Defense Logistics Agency.

II. DESCRIPTION OF OPERATIONS FINANCED:

The primary operations financed within this activity are to identify, investigate and restore active and inactive DoD and non-DoD lands and resources affected by DoD hazardous waste release. The Air Force is responsible for the environmental restoration of active and inactive DoD lands currently under Air Force control and non-DoD lands where AF hazardous wastes are released. The Department of the Army establishes requirements, develops budgets and accomplishes environmental restoration of all formerly-used DoD lands. Air Force efforts are generally accomplished through the use of private sector contractors. The other operations financed within this activity is the removal of currently generated hazardous waste produced through the day-to-day activities of Air Force bases and other related hazardous waste initiatives. The Air Force reimburses the Defense Logistics Agency for removal of hazardous waste from areas falling within its responsibility and private sector contractors for work not within DLA's capability.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Industrial Fund and Stock Fund Support

I. NARRATIVE DESCRIPTION

This activity group contains DoD stock fund and industrial fund refunds and passthroughs that affect the O&M, Air Force appropriation.

II. DESCRIPTION OF OPERATIONS FINANCED

Refunds and passthroughs that involve MFP 7 in the O&M, Air Force appropriation are shown here. A refund from a DoD stock or industrial fund is shown as a credit, while a passthrough to a fund is shown as a direct appropriation requirement. Refunds provide O&M financing by transfer of available funds from a revolving fund, thereby obviating the need for a direct appropriation of funds in that amount. When revolving funds require additional cash, the money is requested in the O&M account and is subsequently "passed through" to the fund involved. Beginning in FY 1988, refunds are treated as appropriation transfers to more accurately reflect industrial fund operating results. "Transfers" increase program authority (i.e. total obligation authority) while refunds decreased program authority.

FORCE PROGRAM VII: CENTRAL SUPPLY AND MAINTENANCE

ACTIVITY GROUP: Industrial Fund and Stock Fund Support

FORCE PROGRAM VIII: TRAINING, MEDICAL AND OTHER GENERAL PERSONNEL ACTIVITIES

I. DESCRIPTION OF OPERATIONS FINANCED

The resources requested for Major Force Program VIII provide for individual training and education programs and operation of Air Force medical facilities worldwide.

A. Training and Other General Personnel Activities are those necessary to provide quality trained and knowledgeable personnel in sufficient quantities to effectively and efficiently operate, maintain and manage complex Air Force weapon systems and the associated support structure. To accomplish this goal resources are requested in this Budget Activity for the operation of the Air Force recruiting and training programs (except command training responsibilities such as combat crew-training). Included in this program are the functions of: recruiting and examining; recruit (basic military) and specialized training; officer acquisition training which includes the Air Force Reserve Officer Training Corps (AFROTC) program, the Air Force Officer Training School (OTS) and the Air Force Academy (AFA); flight training; the operation of professional military schools and development programs; the Junior Reserve Officer Training Corps program; the part-time voluntary education program for military personnel; Veteran's Educational Assistance Program (VEAP); the social actions program; and civilian development programs. Requirements for real property maintenance, communications and base operating support of the training establishments are also included in this budget submission.

B. Medical Programs contain those resources needed to provide health care in four activity groups: Hospital Operations; Care in Non-Defense Facilities; Telecommunications, Command and Control-Medical; and Base Operations Medical.

Hospital Operations provides for health care services in Air Force medical facilities, including Primary Care for the Uniformed Services (PRIMUS) clinics, in the United States and overseas for Air Force active duty military personnel and their dependents, retired military personnel and their dependents, and other eligible beneficiaries; health care and hospitalization of Air Force active duty personnel by civilian health care professionals; other diverse health care services including physiological training units; and aeromedical evacuation. These activities provide the support necessary to maintain the highest degree of combat readiness and effectiveness of the Air Force.

FORCE PROGRAM VIII: TRAINING, MEDICAL AND OTHER GENERAL PERSONNEL ACTIVITIES

I. DESCRIPTION OF OPERATIONS FINANCED: (Cont'd)

Care in Non-Service Facilities provides for health care services by Veterans Administration Facilities Uniformed Services Treatment Facilities (formerly Public Health Service Hospitals), Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) and from various civilian facilities and practitioners.

Telecommunications, Command and Control-Medical covers support provided by communication squadrons to hospitals, clinics, and other health facilities.

Base Operations Support covers real property maintenance provided to base level hospitals, clinics, and other health facilities.

The Medical Service mission is to maintain the health of the Air Force to ensure maximum wartime readiness and combat capability. The Medical Service also provides (to the greatest extent possible) a peacetime health care system for all beneficiaries. The Air Force Medical Service operates and maintains a health care system capable of providing a comprehensive, high-quality, and uniform program of health services for members and eligible beneficiaries in a cost effective manner.

Seven medical centers, seventy-seven hospitals, forty-one clinics, eighty-three aid stations and other health activities such as physiological training units, aeromedical evacuation staging facilities, and specialized medical and dental training facilities and laboratories are located world wide in support of the health care program. This program also finances care in defense and non-defense medical facilities for over three million beneficiaries that include active duty members and their dependents, retirees and their dependents, and survivors.

FORCE PROGRAM VIII: TRAINING, MEDICAL AND OTHER GENERAL PERSONNEL ACTIVITIES

FORCE PROGRAM VIII: TRAINING, MEDICAL AND OTHER GENERAL PERSONNEL ACTIVITIES

I. DESCRIPTION OF OPERATIONS FINANCED

The resources requested for Major Force Program VIIIA provide for individual training and education programs.

A. Training and Other General Personnel Activities are those necessary to provide quality trained and knowledgeable personnel in sufficient quantities to effectively and efficiently operate, maintain and manage complex Air Force weapon systems and the associated support structure. To accomplish this goal resources are requested in this Budget Activity for the operation of the Air Force recruiting and training programs (except command training responsibilities such as combat crew-training). Included in this program are the functions of: recruiting and examining; recruit (basic military) and specialized training; officer acquisition training which includes the Air Force Reserve Officer Training Corps (AFROTC) program, the Air Force Officer Training School (OTS) and the Air Force Academy (AFA); flight training; the operation of professional military schools and development programs; the Junior Reserve Officer Training Corps program; the part-time voluntary education program for military personnel; Veteran's Educational Assistance Program (VEAP); the social actions program; and civilian development programs. Requirements for real property maintenance, communications and base operating support of the training establishments are also included in this budget submission.

Junior ROTC Units	306	316	326

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Recruiting and Examining

I. NARRATIVE DESCRIPTION:

This activity group supports a personnel procurement system to recruit, process, and classify recruits to fill a balanced complement of officer and enlisted positions in the U.S. Air Force. Individuals must meet established enlistment/commissioning standards to satisfy the immediate strength needs and the diverse skill requirements of the active force. Our goal is to attract sufficient numbers of qualified applicants from a demographic cross section of the country to permit the highest degree of selectivity to sustain the career force.

II. DESCRIPTION OF OPERATIONS FINANCED:

The USAF Recruiting Service conducts recruiting efforts at 5 groups, 33 squadrons, and approximately 1,400 offices, including 16 overseas locations. Recruiting Service is responsible for recruiting for entry into active duty, both prior and non-prior service enlisted personnel, as well as Officer Training School candidates, medical professionals, and Reserve Officer Training Corp four year scholarship and four year non-scholarship referrals. Recruiting Service advertising supports the following personnel procurement programs: Enlisted, Career Motivation, Air Force Reserves, Air Force Academy, Reserve Officers' Training Corps, Officer Training School, Health Professional, and Specialized Recruiting (women, minorities, hard-to-fill skills, etc.). Also included is Air Force Manning at the Military Entrance Processing Command (MEPCOM) which administers physical and mental examinations to all service applicants and ensures applicants meet service standards. Other operations financed include the Department of Defense Medical Evaluation Review Board, the development of the Armed Services Vocational Aptitude Battery (the enlistment exam used by all services), and the personnel processing and classification of new enlistees upon entrance to active duty.

11. Program Increases.....	\$+2,886	

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

a. Increased Accession Support Requirements (FY 88 Base, \$24,931).....\$+1,584

The total projected recruiting workload (enlisted, officer, and medical) increases by 11,193 personnel (+20%) in FY 89 and will require intensive recruiter effort and the necessary resources to achieve the FY 89 recruiting mission. These additional funds provide for applicant processing/recruitment costs plus direct recruiter support items.

b. Increased Accessions (FY 88 Base, 40,410 Accessions).....\$+1,008

An increase in non-prior enlisted accessions from 40,000 in FY 88 to 50,000 in FY 89 and an increase in prior service accessions from 410 in FY 88 to 1,036 in FY 89 will result in an increase in direct recruiting expenses for applicant travel, meal and lodging.

c. Armed Services Vocational Aptitude Battery (ASVAB) Support.....\$+ 254
(FY 88 Base, \$1,894)

The Air Force is the Department of Defense Executive Agent for Research and Development. Funding supports on-going development of both the operational and high school enlistment tests used by all Services. Periodic test revisions are necessary both to maintain test validity and to guard against test compromise. To that end, the funding increase supports developing follow-on versions of ASVAB tests, including development and test items, new forms, and validation studies.

d. Defense Medical Evaluation Review Board (DODMERB) Support (FY 88 Base, \$532).....\$+ 40

DODMERB is the central Department of Defense clearing house for accession physicals for applicants to all five service academies and all ROTC scholarship programs. They have been levied with the requirement to screen results of the drug and alcohol testing program mandated by the FY 88 Authorization Act. The FY 89 increase is required for the support costs to assume this responsibility.

12. Program Decreases.....\$- 513

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

a. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

a. Civilian Pay.....\$- 73

Two less workdays in FY 89 (FY 88 base, 262 days).

b. Recruiting Squadron Closure (FY 88 Base, \$24,931).....\$- 300

Two recruiting squadrons will be closed and their recruiting mission absorbed into neighboring squadrons. Exact squadrons for closure to be determined.

c. ASVAB Studies (FY 88 Base, \$1,894).....\$- 140

Equity studies in support of the high school Armed Forces Vocational Aptitude Battery (ASVAB) were completed in FY 88.

13. FY 1989 Budget Request (Amended).....\$47,913

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Recruit and Specialized Training

I. NARRATIVE DESCRIPTION

This activity group supports essential training programs to provide effective and efficient military indoctrination for newly enlisted recruits to facilitate a smooth transition from civilian life to the military environment; to provide initial and follow-on technical skill progression training to Air Force members and appropriate personnel of other services to assure optimum capability to operate and maintain various complex weapon systems; and to provide noncommissioned officers with the management and leadership training to fulfill their supervisory responsibilities.

II. DESCRIPTION OF OPERATIONS FINANCED

Operations financed include the Basic Military Training School at Lackland AFB, Texas; training programs conducted at six technical training centers, civilian educational institutions and contractor facilities; and major air command noncommissioned officer leadership schools and academies. All new Air Force enlistees are assigned to the Basic Military Training School for six weeks to acquire the specific knowledge and skills necessary to function effectively in a military organization. Upon completion of recruit training, most graduates enter formal specialized training in a particular career field. Basic technical courses range in length from 4 to 50 weeks and cover skills ranging from administration specialist to precision measurement equipment repair. In addition to basic technical training, skill progression training is provided for individuals who have experience but require a new or higher degree of skill or familiarization with new equipment and operating techniques. Although most skill progression training is conducted in Air Force technical training centers, some training is conducted at civilian educational institutions and contractor facilities. These non-Defense classes are sponsored only where it is more cost effective such as in the case of unique systems/procedures or for the training of an initial cadre of personnel to operate or maintain a new system. Noncommissioned officers attend leadership schools and academies, operated by major air commands where they receive training in communication skills, supervision, human relations and other professional military training subjects.

a. Trainer Equipment Maintenance Contract Conversion (FY 88 Base, \$4,618).....		\$+4,545	

Provides full year costing of the equipment maintenance contract that began in FY 88 at three Air Training Command Technical Training Centers (Sheppard, Lowry, Chanute). Maintenance was previously performed by military personnel.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

b. Increased TDY-to-School Inputs (FY 88 Base, 35,799 Inputs).....\$+3,953

Air Force skill progression training is technical training provided for career personnel who are qualified in their basic specialty but require additional training to operate and maintain a specific weapon system. In addition to skill progression inputs, inputs are required for officers to attend initial skill courses for career areas that require specialized skills which are not taught in colleges. It is imperative that funding for the additional inputs be provided to sustain the technical abilities of the career force and to enable the Air Force the essential initial skill training for the 19% increase in officer accessions compared to FY 88. As a result of end strength reductions from FY 87 to FY 88/89, additive requirements are essential to retrain and cross train our career force in order to maintain a balance of skills during a drawdown of the force. In FY 89, the Air Force will be required to retrain 6,900 as compared with 6,500 in FY 88.

c. Intelligence Training Support (FY 88 Base, \$7,537).....\$+2,908

Funding supports Contract Hardware/Software Logistics Support (CLS) for the Sentinel Aspen Phase I, General Imagery Intelligence Training System (GIITS), and Sentinel Bright I and II. GIITS is a computer-based training system for the Air Force which provides digital imagery exploitation and automated hardcopy imagery exploitation training. The Voice Processing Training System (VPTS) is required for cryptologic intelligence linguist training and the Cryptologic Intelligence Training System (CITS) for all cryptologic intelligence operations and maintenance training. These systems will be fully operational first quarter FY 89. Training supports the National Security Agency and the Strategic and Tactical training requirements at the operational Commands. Funds include dollars required for computer operators and programmers that were severely constrained in FY 88.

d. Skill Training Support (FY 88 Base, \$148,354).....\$+2,801

Increase required for 106 civilian workyears to raise utilization rate from 91% in FY 88 to 95% in FY 89. The increase in civilian workyears is necessary due to increase in accessions in FY 89.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

e. Recruit Training (FY 88 Base, 40,000 Accessions).....\$+1,031

Non-prior service accessions increase from 40,000 in FY 88 to 50,000 in FY 89 (+10,000). Increased costs are for BDU field jackets issued in Basic Military Training and student supply issues tied directly to number of accessions.

12. Program Decreases.....\$- 2,234

a. Civilian Pay.....\$- 504

Two less workdays in FY 89 (FY 88 Base, 262 days)

b. Performance of Commercial Activities (FY 88 Base, \$0).....\$-1,730

The reduction is based on anticipated savings to be achieved from future conversions to contract in accordance with the procedures of OMB circular No. A-76.

13. FY 1989 Budget Request (Amended).....\$176,078

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Officer Acquisition Training

I. NARRATIVE DESCRIPTION:

This activity group provides for the production of Air Force officers in the quantity, quality and specific professional skills needed to meet total force requirements for FY 1988 through FY 1992.

II. DESCRIPTION OF OPERATIONS FINANCED:

Operations financed include the Air Force Academy, Officer Training School, Air Force Reserve Officer Training Corps, Airman Education and Commissioning Program, and the Flight Screening Program. The Air Force Academy provides a wide spectrum of military and academic training and education to provide cadets with the knowledge and character essential for leadership and the motivation to become career officers in the Air Force. Officer Training School trains and commissions second lieutenants from non-prior and prior service groups as Air Force needs dictate. Officer Training School is a three month program of intensive military education and training that provides the capability to respond rapidly to short term needs in officer accession requirements. The Air Force Reserve Officer Training Corps supplements academic education with military education and training designed to meet specific Air Force officer accession requirements. The Airman Education and Commissioning Program allows airmen on active duty to earn academic degrees in specific fields needed by the Air Force and prepares them to enter Officer Training School and earn a commission. Flight Screening provides the Air Force with an economical means of identifying trainees who possess the potential to complete undergraduate pilot training following commissioning.

f. Other Price Changes.....	\$+	221

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

11. Program Increases.....	\$+5,168
a. Air Force Academy Work Force Utilization (FY 88 Base, \$28,208).....	\$+2,409
Increase supports higher utilization of Air Force Academy civilian support staff. With officers assigned to the Air Force Academy filling all faculty positions, the civilian work force is essential to operating and maintaining the Air Force Academy. This action increases the utilization rate from 81% in FY 88 to 95% in FY 89.	
b. Officer Training School Accession Increase (FY 88 Base, \$893).....	\$+ 186
Increase of prior service candidates through Officer Training School to meet overall officer accession requirements in FY 89.	
c. Reserve Officer Training Corps Scholarships (FY 88 Base, \$37,376).....	\$+2,573
Increase in funding for scholarships required for additional students in engineering and technical specialties. The increase funds 300 additional scholarships supporting a partial restoration of ROTC scholarships towards the 6,200 Air Force requirement.	
12. Program Decreases.....	\$-1,389
a. Civilian Pay.....	\$- 149
Two less workdays in FY 89 (FY 88 Base, 262 days)	
b. Performance of Commercial Activities (FY 88 Base, \$0).....	\$-1,240
The reduction is based on anticipated savings to be achieved from future conversions to contract in accordance with the procedures of OMB circular No. A-76.	
13. FY 1989 Budget Request (Amended).....	\$78,942

c. Net All Others.....	-11	
3. FY 1989 Amended Estimate.....	8013	827

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Flight Training

I. NARRATIVE DESCRIPTION:

This activity group supports undergraduate pilot training, undergraduate and advanced navigator training, instructor pilot and navigator training, undergraduate pilot training helicopter, Euro-NATO Joint Jet Pilot Training, flight screening programs, and the Air Force Instrument Flight Center. Air Force officers receive undergraduate helicopter training from the Army. The objective of flight training operations is to produce pilots and navigators to meet total rated force requirements. A shortage of qualified aviators severely affects readiness and mobilization capability.

II. DESCRIPTION OF OPERATIONS FINANCED:

There are six undergraduate pilot training bases. Five of the bases train active Air Force, Air National Guard, Air Force Reserve, and international students. The sixth base is dedicated to support of the Euro-NATO Joint Jet Pilot Training program. Undergraduate pilot training instructor pilots receive training at Randolph Air Force Base, TX. Both undergraduate and advanced navigator training programs are conducted at Mather Air Force Base, CA. Navigator training is provided to personnel of other services on a non-reimbursable basis. International students receive flight training on a reimbursable basis. Aircraft maintenance functions are being converted from blue suit (active duty military) to contractor operations over the next three years. The Tanker-Transport Training System, a new aircraft to be used in the specialized (dual track) undergraduate pilot training concept, is being produced (Aircraft procurement appropriation).

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Flight Training

III. FINANCIAL SUMMARY (OM \$ in Thousands):

A. SUBACTIVITY BREAKOUT

f. Other Price Changes.....	\$+	371

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

11. Program Increases.....\$+31,919

a. Undergraduate Flying Training Aircraft Maintenance Conversion (FY 88 Base, \$8,360).....\$+20,217

Flying training aircraft maintenance for all five undergraduate flying training bases are being turned over to commercial contractors between fiscal years 1988 and 1992. FY 89 funding includes one base converted in mid-FY 88 and a second base converting in April 1989. FY 88 base funded the first base (half year) conversion only. Conversions are funded in accordance with procedures outlined in QMB circular A-76. Workload was previously performed by military personnel.

b. Aircraft Engine Overhauls (FY 88 Base, \$6,600).....\$+ 6,718

Increase supports aircraft engine overhauls for the undergraduate navigator (T-43) aircraft. Periodic maintenance intervals on T-43 engines have been extended to maximum allowable periods under FAA guidelines. Failure to perform engine overhauls in FY 89 will force grounding of navigator training aircraft. Maintenance is performed by contractor logistics support scheduled through the Air Force Logistics Command.

c. Flying Hours Increase (FY 88 Base, \$188,451).....\$+ 4,421

Aircraft maintenance, life support supplies, and fuel costs to support pilot production changes to the undergraduate pilot training flying hour program. FY 89 entries are being increased in the undergraduate pilot training (jet) program to achieve a 125 pilot production increase in FY 90.

d. Aircraft Maintenance Work Force Utilization (FY 88 Base, \$23,024).....\$+ 362

Increase supports higher utilization of civilian aircraft mechanic and administrative work force assigned to flight training programs. By increasing the utilization from 90% in FY 88 to 94% in FY 89, retraining costs and fluctuations in technical support being experienced in FY 88 can be eliminated.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

a. Aircraft Wash Rack Contract Conversion (FY 88 Base, \$198).....\$+ 201

Final phase of a two year conversion to commercial operation of aircraft wash racks at four Air Training Command bases, previously manned by military personnel.

12. Program Decreases.....\$- 1,059

a. Civilian Pay.....\$- 179

Two less workdays in FY 89 (FY 88 Base, 262 days).

b. Performance of Commercial Activities (FY 88 Base, \$0).....\$- 880

The reduction is based on anticipated savings to be achieved from future conversions to contract in accordance with the procedures of OMB circular No. A-76.

13. FY 1989 Budget Request (Amended).....\$255,208

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Professional Development Education

I. NARRATIVE DESCRIPTION:

This activity group supports professional military education and professional development programs conducted by the Air University, the Air Force Institute of Technology, and civilian institutions across the country. Professional military education programs provide career military and civil service personnel with a broadening of their background for increased responsibility as Air Force professionals. Professional development programs equip military and civilian personnel at all levels with specialized training within their discipline.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for pay of civilian personnel, supplies and equipment, travel, tuition at civilian institutions, and other requirements for conducting professional education programs.

The Air University at Maxwell Air Force Base, Alabama directs all professional education in the United States Air Force. Its programs have the objective of preparing personnel for key assignments in Air Force organizations through resident schools and courses at civilian institutions. Professional education programs included in this package are as follows:

a. Professional military education includes the Air War College, Air Command and Staff College, Squadron Officer School, Senior Non-Commissioned Officer Academy, and equivalent schools in other services through cross-service agreements.

b. Specialized professional development programs are conducted at such training facilities as the Center for Professional Development (Personnel, Comptroller, Judge Advocate, Chaplain Schools, and the Education Development Center), and the Center for Aerospace Doctrine, Research, and Education located at Maxwell Air Force Base, Alabama.

c. The Air Force Institute of Technology, located at Wright-Patterson Air Force Base, Ohio, is responsible for scientific, engineering, technical and special Air Force education at the graduate level (and undergraduate level for personnel cross-training into engineering) in resident facilities and also at civilian colleges or universities throughout the country. Besides the Civilian Institution Directorate, AFIT also operates the Schools of Civil Engineering, Systems and Logistics, and Engineering. Short courses are conducted for Air Force students and members of other services in resident facilities and at civilian institutions throughout the country.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Education and Training - Health Care

I. NARRATIVE DESCRIPTION

This activity group includes the education and training of health care personnel, and a health professionals accession program. Medical education and training of Air Force and Army personnel is conducted at the School of Aerospace Medicine and Brooks Army Medical Center, Brooks AFB, Texas; at the School of Health Care Sciences, Sheppard AFB, Texas; and at various civilian medical institutions throughout the country. The health professionals accession program is also conducted at civilian institutions across the country. Medical education and training for both Air Force and Army personnel in the San Antonio, Texas area are now supported by the newly formed Joint Military Medical Command.

II. DESCRIPTION OF OPERATIONS FINANCED

The resources provide for the manpower, material and other support necessary for the operation of one Army and all Air Force medical resident schools, and for tuition, textbooks and supplies for personnel participating in the Air Force health professionals accession program and postgraduate work at various civilian medical schools and institutions.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Other Training/Education and Personnel Activities

I. NARRATIVE DESCRIPTION:

This activity group includes Civilian Education and Training Program, Junior ROTC, Off-Duty and Voluntary Education, Veterans' Education Assistance Program (VEAP), the Educational Assistance Test Program (EATP) and service-wide personnel programs in functions such as mission support, professional development and career advancement, substance abuse control, equal opportunity, mortuary affairs, morale and welfare, etc.

II. DESCRIPTION OF OPERATIONS FINANCED:

The Civilian Education and Training Program funds travel, tuition, fees and books to provide technical, professional and specialized skill training, supervisory and management development, administrative and clerical instruction to over 170,000 Air Force civilian employees. The Air Force Junior ROTC program provides cadets at 316 high schools in the United States, Guam and DOD dependent schools in Europe with an introduction to the scientific and technical aspects of aerospace and prepares them to assume leadership responsibilities within the cadet corps, school and community. The Voluntary Off-Duty Education Program, a major recruiting and retention incentive, provides military personnel with the opportunity for professional development and advancement through tuition assistance for post secondary education. The VEAP (Public Law 94-502) is a contributory program in which military personnel may receive two-for-one matching funds from the Air Force when the individual enters a training/education program. The EATP was initiated to test the effect of certain education incentives on recruiting and retention. The program encompasses several incentives including forgiveness of educational loans, financial assistance and a noncontributory VEAP. The Armed Forces' Radio and Television Service (AFRTS) provides news and entertainment to Armed Forces personnel stationed overseas. The Community College of the Air Force (CCAF), an accredited associate degree granting institution, assists enlisted personnel in their voluntary educational growth by translating Air Force technical/educational experiences into educational credits applicable to career related degree programs. The Air Force Correctional and Rehabilitation Squadron is the service's central facility for prisoners on short sentences who are considered good candidates for return to duty. The Defense Equal Opportunity Management Institute is responsible for defense-wide training of human relations instructors. The Equal Opportunity/Human Relations Education and Drug/Alcohol Abuse Control Programs are conducted to minimize the adverse mission impact of discrimination and drug/alcohol abuse on the Air Force and its members. Mortuary services provide contractual mortuary services, transport, escort and other necessities for deceased active Air Force members. The Air Force Band and Honor Guard support military endorsed functions. Central procurement of library materials provides mission essential scientific/technical, commercial and academic publications to technical, office and base libraries to achieve discounts on quantity orders.

a. Civilian Training (FY 88 Base, \$37,576).....			\$+4,728

Provides for centrally managed renewal and the Federal Employees Compensation Act (FECA) pipeline to return disabled employees to productive employment. The intern programs are targeted for accessions of high quality college graduates for professional and managerial force renewal.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

These interns are a mobile corporate resource and are centrally controlled by senior Air Staff functional managers. For the FECA pipeline, current computations show a savings of approximately 20 to 1 on the original investment over the lifetime cost of an employee on workers compensation.

b. Off-Duty Voluntary Education (FY 88 Base, 281,902 Enrollments).....\$+1,977

Every year since 1977, we have one more year group accessed that is not eligible for use of the Vietnam Era GI Bill thereby driving increased enrollments funded by tuition assistance. Current trends indicate that the percent of individuals on active duty that are entitled to Vietnam Era GI Bill is decreasing by 10.1% per year.

c. Armed Forces' Radio and Television Service (AFRTS) (FY 88 Base, \$7,517).....\$+1,416

Provides funding to meet Air Force required portion of Department of Defense contract with the Turkish Post, Telephone, and Telegraph (PTT) -- their equivalent to our Federal Communications Commission -- to operate/maintain satellite television downlinks at 12 Air Force locations out of 23 remote locations in Turkey for Armed Forces Radio and Television. Funds also provide for civilian broadcaster personnel in Comiso, Italy, supplies, and equipment which were reduced in FY 88 due to budgetary constraints.

d. Training/Education and Personnel Activities Support (FY 88 Base, \$155,871).....\$+ 764

Partial restoration to Equal Opportunity/Human Relations Education, Drug/Alcohol/Abuse, mortuary, band, correctional and rehabilitation, honor guard, library programs, and base education offices for civilian hiring, supplies, and equipment that were severely constrained in FY 88.

e. Junior ROTC (FY 88 Base, \$8,057).....\$+ 229

Ten additional Junior ROTC units. Funds support costs of instructor pay, travel, and supplies.

12. Program Decreases.....\$- 2,305 601

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

a. Civilian Pay.....\$- 367

Two less workdays in FY 89 (FY 88 Base, 262 days).

b. Veterans Education Assistance Program (VEAP) (FY 88 Base, \$13,419).....\$-1,938

This decrease reduces funding in accordance with the Veterans Administration estimate of matching payments for education/training programs covered by Public Law 94-502.

13. FY 1989 Budget Request (Amended).....\$169,848

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Training Support Activities

I. NARRATIVE DESCRIPTION

This activity group provides the support required to conduct and manage individual training/education programs and to provide training assistance as needed to units and personnel outside the training establishment.

II. DESCRIPTION OF OPERATIONS FINANCED

Operations financed include the Air Training Command headquarters and the Air University headquarters; on site training conducted by field training detachments on weapon systems identified to specific commands; the Air Force Extension Course Institute (ECI) which provides correspondence course programs for all active and reserve personnel; development of new specialized skill training capabilities, update/restructure of existing courses and service test application of new instructional technologies; and the Air University Printing Plant. The objectives are to provide positive command, control, and support to the training establishment and to provide training at active/reserve units for introduction of new systems/equipment into the Air Force inventory. The Extension Course Institute offers career development courses which are mandatory for upgrading in most airman skills. It also offers correspondence training directed toward total force military education requirements. Its courses are available to active duty and reserve personnel who desire to further their education in professional or technical career-oriented areas.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

a. Extension Course Institute Military Construction Project (MCP) Support
Furnishings (FY 88 Base, \$0).....\$+ 332

Funding provides support furnishings, such as tables, desks, chairs, and office partitions, for a consolidated Extension Course Institute (ECI) facility at Gunter AFB, Alabama. An adequate facility is required to house all ECI administrative, manuscript development, course processing and warehouse functions. The new facility, being built with FY 88 MCP funding, will collocate Air Force personnel now scattered in eight World War II barracks structures.

b. Training Support Work Force Utilization (FY 88 Base, \$16,960).....\$+ 608

Increase in civilian utilization rate to 95% in FY 89 for the training support work force. This increase is essential to develop and maintain Air Force computer based instructional courseware for FY 89 and the outyears. Failure to increase the civilian utilization rate will severely impact the Air Force's ability to conduct both resident and extension programs.

c. Training Support Operations (FY 88 Base, \$11,371).....\$+2,056

The increase funds additional consolidated training support contract activities. FY 88 constrained levels caused sufficient degradation to cause other programs to meet minimum support requirements out of lower priority Operations and Maintenance requirements, thereby creating losses in savings available through centralized training support operations.

d. Automated Printing and Data Processing (FY 88 Base, \$2,351).....\$+ 231

Funds support maintenance and operation of existing and new standard Air Force automated data processing and printing systems on-line in FY 89. Failure to commit adequate funding support to these systems, currently serving as cost-effective alternatives to increased manpower, would force idling of expensive automated equipment and a loss of function.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Base Communications

I. NARRATIVE DESCRIPTION

This activity group supports the training and recruiting missions in the Air Force. The requested funds provide for the operation, maintenance, planning and programming for the full array of required base communications-electronics service. The goal is to provide a minimum acceptable level of communications-electronics capability to ensure the efficient accomplishment of the day-to-day training and recruiting mission.

II. DESCRIPTION OF OPERATIONS FINANCED

The required services include base telephone support, record communications (AUTODIN), intra-base radios, secure telephones, weather communications, air traffic control and navigation, official tolls, and other communications-electronics service. Resources provide for pay of civilian personnel, supplies, contract services, the costs associated with providing communications-operations, and air traffic control services and maintenance.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Base Communications

III. FINANCIAL SUMMARY (O&M \$ in Thousands):

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

ACTIVITY GROUP: Base Operations - Training

I. NARRATIVE DESCRIPTION

Base operations is comprised of real property maintenance activities (RPMA) and base operations support (BOS). RPMA includes all costs related to the civil engineering functions, including maintenance of real property facilities. BOS entails "all other" base operating functions, such as supply support, transportation, security police, comptroller, data processing, personnel support, and food services.

II. DESCRIPTION OF OPERATIONS FINANCED

Base operations support functions for fixed installations and assigned mission units to include administration, information services, comptroller, supply activity operations, equipment maintenance (including transient aircraft), transportation, food service, chaplain, recreation activities, security police (law enforcement), community service activities, bachelor housing operations and furnishings, data processing activities, bands, ground safety, procurement, management engineering teams, and support groups/units/air base operations.

Real property maintenance activities are provided by base civil engineering squadrons and the San Antonio Real Property Maintenance Agency and include: the operation of utilities systems; purchase of utilities, maintenance, repair and minor construction (less than \$200,000); and other engineering support such as fire protection, crash rescue, custodial services, refuse collection, snow removal and leasing of real property.

b. FY 89 Civilian Pay Raise.....	\$+ 2,558
c. Civilian Benefit Increases (FERS and Health).....	\$+ 1,134
d. Other Stock Fund Rates.....	\$+ 1,340
e. Industrial Fund Rates.....	\$- 80
f. Contract Price Changes.....	\$+ 3,316
g. Other Price Changes.....	\$+ 4,129
11. Program Increases.....	\$+49,339
a. Real Property Maintenance (RPM) (FY 88 Base, \$227,862).....	\$+19,144
Increased funds are necessary for infrastructure repairs at the Air Force Academy, Air Training Command, and Air University installations constrained by FY 88 funding.	
b. Base Operations (FY 88 Base, \$163,491).....	\$+17,591

Increase raises the FY 89 civilian utilization to 95%. This is a 7% increase over the FY 88 utilization rate. This increase is necessary to prevent severe restrictive hiring practices instituted in FY 88. These additional workyears prevents the further degradation of installations and assist in stopping the delay of base operations support functions workload.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

c. Military Construction Program (MCP) Support/Furnishings (FY 88 Base, \$0).....\$+ 4,803

Funds required to support MCP projects that will be completed in FY 89. Includes 100 Unaccompanied Officers Personnel Housing (UOPH) at Chanute AFB, 500 UOPH for Defense Language Institute (DLI) at Lackland AFB, 100 TLF at Lackland AFB, 335 Unaccompanied Enlisted Personnel Housing (UEPH) at Randolph AFB, and 1,000 UEPH at Lackland AFB. These facilities will not be functional without these funds. Funds will provide beds, desks, dressers, wardrobes, chairs, lamps, and other authorized furniture. If the facilities cannot be placed in service, quarters to house the TDY, technical school students, and permanent party personnel will not be available.

d. Increased Student Inputs (FY 88 Base, 184,495 Inputs).....\$+ 2,396

Increase of 16,667 student inputs over FY 88 resulting in an increase to Laundry/Food Service contracts.

e. Consolidated Support Complex, Maxwell AFB (FY 88 Base, \$0).....\$+ 2,244

Furnishings/Equipment required for a new Consolidated Support Complex. Currently individuals work in all or part of 25 widely dispersed facilities which were mainly built as World War II barracks and are generally inadequate in size and configuration. Project approved in the FY 88 Military Construction Program, project number PN05892076. The beneficial occupancy date is FY 89.

FORCE PROGRAM VIII: TRAINING, MEDICAL, AND OTHER GENERAL PERSONNEL ACTIVITIES

B. RECONCILIATION OF INCREASES AND DECREASES: (Cont'd)

f. Automated Data Processing (ADP) Maintenance (FY 88 Base, \$5,744).....\$+ 1,850

Funds to support maintenance for standard Air Force ADP systems. New systems such as Security Police Automated System, Core Automated Maintenance System, Transportation Operational Personal Property Standard System, Base Contracting Automatic System, Work Order Information Management System/Services Information Management System, and Command Budget Automated System are being installed in FY 88 and coming on line in FY 89. These systems support Air Force directed programs and reports using ADPE which are directly related to the operational and technical training mission. If these must pay bills are not funded, the expensive systems have to be disconnected and will be idle if the capability to maintain the equipment is not available. The only alternative would be to convert back to the time consuming and outdated manual system for which manpower is not available.

g. Personnel Support (FY 88 Base, 108,875 Population).....\$+ 1,311

Base Operations Support will be increased due to an increase of 3,277 permanent party personnel.

12. Program Decreases.....\$- 2,111

a. Civilian Pay.....\$- 580

Two less workdays in FY 89 (FY 88 Base, 262 days).

b. Performance of Commercial Activities (FY 88 Base, \$0).....\$- 1,451

The reduction is based on anticipated savings to be achieved from future conversions to contract in accordance with the procedures of OMB circular No. A-76.

c. Energy Conservation (FY 88 Base, \$0).....\$- 80

Reflects the savings resulting from programs aimed at reducing facility energy consumption.

13. FY 1989 Budget Request (Amended).....\$512,611

FORCE PROGRAM VIII: TRAINING, MEDICAL AND OTHER GENERAL PERSONNEL ACTIVITIES

FORCE PROGRAM VIII-B: MEDICAL OPERATIONS

I. DESCRIPTION OF OPERATIONS FINANCED:

The resources requested for health care provide for mission operations in four activity groups: Hospital Operations; Care in Non-Defense Facilities; Telecommunications, Command and Control-Medical; and Base Operations-Medical.

Hospital Operations provides for health care services in Air Force medical facilities including Primary Care for the Uniformed Services (PRIMUS) clinics in the United States and overseas for Air Force activity duty military personnel and their dependents, retired military personnel and their dependents, and other eligible beneficiaries; health care and hospitalization of Air Force active duty personnel by civilian health care professionals; other diverse health care services including physiological training units; and aeromedical evacuation. These activities provide the support necessary to maintain the highest degree of combat readiness and effectiveness of health care system capable of sustaining the readiness of the Air Force.

Care in Non-Service Facilities provides for health care services by Veterans Administration facilities, Uniformed Services Treatment facilities (USTF), Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), and from various civilian facilities and practitioners.

Telecommunications, Command and Control-Medical covers support provided by communication squadrons to hospitals, clinics, and other health facilities.

Base Operations covers real property maintenance provided to base level hospitals, clinics, and other health facilities.

The Medical Service mission is to maintain the health of the Air Force to ensure maximum wartime readiness and combat capability. The Medical Service also provides (to the greatest extent possible) a peacetime health care system for all beneficiaries. The Air Force Medical Service operates and maintains a health care system capable of providing a comprehensive, high-quality, and uniform program of health services for members and eligible beneficiaries in a cost effective manner.

Seven medical centers, seventy-seven hospitals, forty-one clinics, eighty-three aid stations and other health activities such as physiological training units, aeromedical evacuation staging facilities, and specialized medical and dental training facilities and laboratories are located world wide in support of the health care program. This program also finances care in defense and non-defense medical facilities for over three million beneficiaries that include active duty members and their dependents, retirees and their dependents, and survivors.

FORCE PROGRAM VIII-B: MEDICAL OPERATIONS

ACTIVITY GROUP: 041A - Hospital Operations

I. NARRATIVE DESCRIPTION:

This activity group supports seven medical centers, seventy-seven hospitals, forty-one clinics, five Primary Care for the Uniformed Services (PRIMS) Clinics, and eighty-three aid stations in the Air Force health care system. Hospitals range in size and complexity from large tertiary care facilities with extensive training and regional responsibilities (area medical centers) to relatively small facilities with limited inpatient capabilities (base hospitals). Clinics are not staffed and equipped to provide inpatient support. This health care system provides inpatient care, outpatient services and dental care to the extent authorized for an eligible beneficiary population of approximately three million. The total population continues to increase due to additional active duty personnel, their dependents, and the rising number of retired personnel and their dependents.

A worldwide aeromedical evacuation system is maintained in a high state of readiness to provide an expeditious means to transport patients and casualties during combat conditions. Physiological and environmental health laboratories provide support for occupational health and preventive disease programs. Several other activities are also funded in this activity group: the Air Force's share of the Armed Forces Institute of Pathology, the Armed Services Medical Regulating Office, and epidemiological flights and laboratories.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for civilian personnel, temporary duty travel, contractual services, medical and non-medical and equipment, and other operating expenses. The objective is to provide a comprehensive and high quality health care system capable of sustaining the readiness of the Air Force.

FORCE PROGRAM VIII-B: MEDICAL OPERATIONS

ACTIVITY GROUP: 041A - Hospital Operations

e. FY89 Health Benefits Increase.....	\$+	637
f. Stock Fund Rates.....	\$+	13,069
g. Other Price Growth.....	\$+	1,515

11. Program Increases \$+181,155

a. Medical Supplies (FY88 Base, \$263,225) \$+ 79,600

This increase restores a 22% medical supply and associated workload level. This increase is necessary due to a severe drawdown of supplies in FY88 caused by constrained funding.

b. Termination of Special Status of
Uniformed Services Treatment Facilities (USTFs) \$+ 34,600

Current public law mandates the closure of all USTFs effective 1 January 1989. The workload from these closed facilities will be picked up primarily in the direct care system.

c. Medical Investment Equipment Threshold Change (FY88 Base, \$25,121) \$+ 28,292

The congressionally enacted threshold change for Medical Investment Equipment from \$5,000 to \$15,000 places another \$28,292 thousand worth of equipment requiring replacement during FY89 within the Operations and Maintenance (O&M) funding area.

d. Primary Care for the Uniformed Services (PRIMUS) Clinics (FY88 Base, \$3,800). \$+ 10,600

Required for a full years operation of the four PRIMUS clinics opened in September 1988 and the opening of one additional clinic in FY89.

e. Contracts for Specialty Shortfalls (FY88 Base, \$42,895). \$+ 6,276

FORCE PROGRAM V.I.I.-B. MEDICAL OPERATIONS

ACTIVITY GROUP: 041A - Hospital Operations

Required to contract physician services in specialties in which it is hard to recruit and retain qualified providers. Primary shortfalls are in the areas of Radiology, and Obstetrics and Gynecology.

- | | | | |
|----|---|-----|-------|
| f. | Travis Medical Center Support (FY88 Base, \$9,718)..... | \$+ | 6,000 |
| | Required for equipment maintenance and other contracts in support of the new David Grant Medical Center at Travis Air Force Base, California. | | |
| g. | Replacement Equipment (FY88 Base, \$25,121)..... | \$+ | 5,500 |
| | Purchase of \$5.5 million in additional replacement equipment is required above the FY88 level to replace seriously outmoded medical equipment which directly impacts our ability to provide top quality health care. | | |
| h. | Contract Logistics Support (CLS) for C-9a Aircraft (FY88 Base, \$8,472)..... | \$+ | 4,410 |
| | Required for increased cost of CLS for C-9a aircraft used for Aeromedical Evacuation. This increase is required due to increasing age of the C-9a aircraft. | | |
| i. | Accession Drug Testing (FY88 Base, \$0)..... | \$+ | 4,000 |
| | Required for a full years pre-accession drug testing. This program was implemented late in FY88. | | |
| j. | Dental Contracts (FY88 Base = \$4,040) | \$+ | 1,546 |
| | Additional funds are required for an increase in contract dentists from 72 to 98 for FY89. | | |
| k. | Automatic Data Processing (ADP) Maintenance (FY88 Base, \$8,999)..... | \$+ | 331 |

FORCE PROGRAM VIII-B: MEDICAL OPERATIONS

ACTIVITY GROUP: 041A - Hospital Operations

Additional funds are required for the maintenance of medical ADP support systems such as TRIMUS and ACCESS.

12. Program Decreases	\$-	2,043
a. 2 less workdays in FY89 (FY88 Base, \$177,564)	\$-	1,503
b. Savings from Contract Conversions (FY88 Base - \$42,895)	\$-	540
13. FY 1989 Budget Request (Amended)	\$	851,239

* Workload displayed is the anticipated workload based on current trends. Due to severe funding constraints in FY88, these workload projections will be forced downward by as much as 22%. The increase in projected workload level over FY87 is attributable to the addition of Brooke Army Medical Center (BAMC). One half of one percent growth is also projected.

FORCE PROGRAM VIII-B: MEDICAL OPERATIONS

ACTIVITY GROUP: 041A - Hospital Operations

** Workload displayed is the anticipated workload based on current trends plus .5% growth. Closing of the Uniformed Services Treatment Facilities (USTFs) on 1 January 1989 will increase these workload projections by up to 9.5%.

FORCE PROGRAM VIII-B - MEDICAL OPERATIONS

ACTIVITY GROUP: Telecommunications, Command and Control-Medical

I. NARRATIVE DESCRIPTION:

This program provides telecommunications support for seven medical centers, seventy-seven hospitals, forty-one clinics, eighty-three aid stations and other health activities such as physiological training units, aeromedical evacuation staging facilities, and specialized medical and dental training facilities and laboratories located worldwide.

II. DESCRIPTION OF OPERATIONS FINANCED:

This program provides resources for the following medical installation communications support: base telephone systems, intrabase radio systems, war readiness communications, official tolls, and other base level communication requirements.

FORCE PROGRAM VIII-B MEDICAL OPERATIONS

ACTIVITY GROUP: Base Operations

I. NARRATIVE DESCRIPTION:

This activity group provides administrative operational and facilities support to seven medical centers, seventy-seven hospitals, forty-one clinics, eighty-three aid stations, and other health activities, such as physiological training units, aeromedical evacuation staging facilities, and specialized medical and dental facilities and laboratories located worldwide.

II. DESCRIPTION OF OPERATIONS FINANCED: Funds provide base operating support in the following area:

A. Maintenance and Repair: Personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through in-service or contractual effort.

B. Minor Construction: Supplies or contract costs for minor construction performed by the base civilian engineers and through facility project contracts with private concerns.

C. Operation and Utilities: Cost of production and distribution of basic utility services (electric, heating, refrigeration, air conditioning, and water).

D. Other Engineering Support: Purchase of services and administrative support for other engineering activities such as fire protection, crash rescue, snow removal, refuse collection, or custodial activities.

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

I DESCRIPTION OF OPERATIONS FINANCED:

The resources requested provide administrative support of departmental and major administrative headquarters, field commands and associated activities. This Decision Unit also provides the Air Force and DOD agencies with essential photographic, motion media and video services necessary to meet their national security objectives; provides the Civil Air Patrol with necessary Air Force support authorized by law; supports the fundamental public right and need to know about the U.S. Air Force and how it performs its mission; funds the Office of the Secretary of the Air Force, Headquarters USAF, Air Force Cost Center, Air Force District of Washington, Air Force Civilian Personnel Management Center, Air Force Audit Agency, Air Force Service Information and News Center, the Accounting and Finance Center, the Aerospace Audiovisual Service, the Air Force Inspection and Safety Center, the Air Force Military Personnel Center, and the Air Force Management Engineering Agency; and provides service-wide support to the Air Force in specialized areas.

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Departmental Headquarters

I. NARRATIVE DESCRIPTION:

This activity group covers the operation of the Office of the Secretary of the Air Force, Headquarters USAF, and the Air Force District of Washington. Headquarters USAF is engaged in the formulation of plans and policies and the supervision and direction of subordinate offices, agencies, and commands on behalf of the Secretary of the Air Force and the Chief of Staff of the Air Force. Also included is the 7th Communications Group which provides automated data processing support to the Office of the Secretary of the Air Force, Headquarters USAF, and selected Offices of the Secretary of Defense.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources requested provide for pay of civilian personnel, travel, supplies, equipment, contractual services, and ADPE support.

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

b. FY 1988 Health Benefit Increase.....	+380
c. Federal Employees Retirement System (FERS) Changes.....	-1,895
d. Fuel.....	-21

5. Program Increases.....	\$+5,963
a. Air Staff Automation Program.....	\$+5,963

This program replaces the Honeywell classified and unclassified systems which support the Offices of the Secretary of Defense, the Secretary of the Air Force, the Joint Chiefs of Staff, and numerous other agencies. This replacement represents 70% of the computing power in the Pentagon and ensures mainframe computer support through the late 1990s. The software includes an open architecture operating system, standard high order and very high order languages, decision support system generators, data base management systems, sophisticated graphics, modeling and expert system.

The increase results from the transitioning of over 200 applications, representing 4.5 million lines of code, to the HSRP. The majority of these applications will be transitioned in FY89. It is imperative that the FY89 transition take place as the old systems are saturated and continually degrading; Honeywell discontinued support for the software in 1987 and will discontinue support for hardware in 1988. Additionally, the maintenance contract for the current systems expires in 1990. This makes the transition of software to a viable system, the HSRP, imperative.

6. Program Decreases.....	\$-3,410
a. Civilian Pay.....	\$-3,057
b. Reduction of 144 workyears	
Travel.....	-353
Reduction in nonoperational TDY

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Service-Wide Support
I. NARRATIVE DESCRIPTION:

This activity group covers the operation of major field headquarters and other field activities not included elsewhere; namely:

1. Civil Air Patrol (CAP) Program, which provides 75% of search and rescue support for Air Force directed missions, to assist U.S. Customs Service in anti-drug surveillance missions, to promote cadet activities for young men and women towards Air Force careers, and to foster aerospace awareness activities for CAP members and U.S. citizens.
2. Air Force Audit Agency, which is the sole Air Force organization responsible for performing independent and objective evaluations according to statutory and regulatory criteria. Audit findings and recommendations help Air Force officials to make economical and efficient use of resources; prevent fraud, waste and abuse; comply with regulatory requirements; and achieve program results.
3. Air Force Information Systems, which provide for centralized management of automated data processing activities engaged in Air Force-wide or similar automation projects.
4. Air Force Accounting and Finance Center, which provides pay service to active duty and retired members; develops policy and system requirements for accounting and finance directives; provides technical supervision and guidance to the accounting and finance field network; performs centralized accounting and finance functions; prepares and maintains accounting data; and provides reports on all funds appropriated to the Air Force by the Congress.
5. Air Force Inspection and Safety Center, which provides continual surveillance of the status of readiness and safety of activation within major commands and separate operating agencies; and management of Air Force safety programs, nuclear surety programs and the Inspector General Complaints System.
6. Air Force Office of Medical Support, which supports the Air Force Surgeon General's objective of providing quality health care to military members.
7. Air Force Orientation Group, which uses audiovisual products and static aircraft exhibits to portray the roles and missions of the Air Force throughout the world.

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Service-Wide Support

8. Air Force Museum, which obtains and maintains historical aeronautical items for display to the public.
9. Air Force Information Program, which provides accurate and timely information to public media and all segments of the civilian population to help foster mutual acceptance, respect and cooperation.
10. Air Force Review Board, which investigates complaints and grievances and prepares recommendations for final Air Force decisions.
11. Air Force Legal Services Center, which provides legal support for Departmental Headquarters and associated activities.
12. Air Force Service Information and News Center, which provides management of resources necessary to produce information support for departmental and major management headquarters, field commanders, and other activities on the accomplishment of their responsibilities under the USAF Information Program.
13. Air Force Management Engineering Agency, which develops and maintains Air Force manpower standards used to quantify management advisory services, administer Air Force productivity programs, and manage grade distributions/allocations.
14. Air Force Combat Operations Staff, which provides a readiness-oriented, combat-related structure to support the Chief of Staff as a member of the Joint Chiefs of Staff (JCS).
15. HQ USAF Historical Research Center, which provides various historical and reference services to the Air Force. This includes conducting the Air Force Oral History Program; serving as a repository for Air Force historical documents; maintaining the Contemporary Historical Evaluation Combat Operation; and preparing books and other historical works relating to USAF and military aviation.
16. Air Force Capability Assessment Program, which will provide commanders with the ability to assess subordinate units' ability to respond to operational taskings.

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Service-Wide Support

17. Air Force Cost Center, which is responsible for maintaining the state-of-the-art cost analysis in the Air Force. The organization's charter is to develop the requisite cost analysis data bases, methodology modeling, and data automation -- and then insure their effective application to major resource allocation and cost management decisions throughout the Air Force.

18. Air Force Elements organization, which is responsible for Air Force personnel assigned to non-Air Force activities and performing duty with joint/unified commands, international activities, and government agencies world wide.

19. Productivity Enhancing Capital Investment (PECI) projects, including the Fast Payback Capital Investment (FASCAP) program, Component Sponsored Investment Program (CSIP), and the Productivity Investment Fund (PIF).

20. Official mail costs paid to the United States Postal Service.

21. Costs of claims for accidental injury/death and unemployment compensation paid to the Department of Labor.

II. DESCRIPTION OF OPERATIONS FINANCED:

Funds provide for pay of civilian personnel, travel, transportation, utilities and rents, communications, contract services, supplies, equipment, postage costs associated with the movement of official mail within CONUS, and administrative costs identified with the aforementioned organizations and activities.

FORCE PROGRAM (X): ADMINISTRATION AND ASSOCIATED ACTIVITIES

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Service-Wide Support

12. Program Increases.....		\$+10,700
a. Postal Rates (FY 88 Base, \$36,664).....		\$+2,189
Full year impact of FY 1988 postal rates increase.		
b. Personnel Compensation Programs (FY 88 Base, \$91,923).....		+6,456
Increased reimbursement to Labor Dept for Unemployment Compensation and Disability Compensation.		
c. Base Level Accounting and Reporting System (FY 88 Base, \$0).....		+856
This increase supports contractual system design for BLARS. This system will provide the Air Force Accounting and Finance Center's accounting and finance network with a new standard base-level accounting system which optimizes the utilization of Phase IV hardware.		
d. System 2200 (FY 88 Base, \$12,800).....		+1,199
Hardware installation was delayed during FY 88 due to funding constraints. This increase is required to fund hardware installation slipped from FY88. There are approximately 300 items in each System 2200 and configuration varies by base. It is vital to maintain installation schedules as they correspond to manpower reductions.		
13. Program Decreases.....		\$-6,496
a. Civilian Pay (FY 88 Base, \$143,643).....		-1,137
Two fewer workdays in 1989.		
b. Capability Assessment Program (FY 88 Base, \$1,065).....		-762
Phase out of program		
c. Civil Air Patrol (FY 88 Base, \$8,580).....		-1,733
One-time congressionally increased funds for the drug surveillance program will not be necessary in FY89.		

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Service-Wide Support	
d. Productivity Investment Funds (FY 88 Base, \$10,228).....	-2,864
Completion of world-wide installation of COMSEC equipment; completion of installation and site preparation of the Transportation Operational Personal Property System; completion of installation of vehicle washing system at Pease AFB, NH.	
14. FY 1989 Budget Request (Amended).....	\$353,069

FORCE PROGRAM IX ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Personnel Activities

I. NARRATIVE DESCRIPTION:

This activity group covers the operation of the Air Force Military Personnel Center (AFMPC), which provides overall management of military personnel functions for all elements of the active duty Air Force in the grades of airman basic through colonel. Funding also supports the AF Civilian Personnel Management Center (CPMC), which develops and manages Air Force-wide career management programs providing executive, managerial and employee development and training and a complete system of career management and referral for a wide variety of career fields. AFCPMC further manages all operational aspects of the Air Force civilian personnel data system.

II. DESCRIPTION OF OPERATIONS FINANCED:

These resources provide for the pay of civilian personnel, travel, rental of equipment, contractual services, administrative supplies and equipment to support the activities described above. Resources also provide for the Base Information Analysis Program, which is a top-down analysis of information requirements of Air Force organizations at wing level and below.

• FORCE PROGRAM (X) ADMINISTRATION AND ASSOCIATED ACTIVITIES

FORCE PROGRAM (X) ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Personnel Activities		
a.	Data Storage Devices	\$+200
	Purchase of individual data storage devices for Combat Personnel Control System (CPCS). This purchase will allow an individual that goes to a remote location to be identified instantly on arrival and make available critical personnel information. This system resulted from the Long Commission recommendation after a study of the Beirut incident. The device complies with the results of the study.	
b.	Tempest Certified Microcomputers	+904
	Purchase of software for 619 CPCS Tempest certified microcomputers. Microcomputers were purchased in FY87 without software. This purchase provides all necessary operating and most functional software for the entire CPCS system.	
6.	Program Decreases	
a.	Leased Equipment	-1,321
	Reduction due to purchase of leased equipment	
b.	Centrally Managed Civilian PCS	-2,172
	The central PCS program supports centrally managed career programs mid-to upper-level managers and the Senior Executive Service (SES). By centrally funding those PCS moves, the selecting supervisor is provided the guarantee for selection of the most qualified candidate. These selections include managers and supervisors in the following career fields: crucial to the support of the Air Force mission: Acquisition, logistics, comptroller, manpower and personnel, engineering services, safety, security and OSD, scientists and engineers, etc. This transfer reflects the major command destination designation. Program reductions in FY 88 have restricted the number of moves to 372 which is only 32% of the planned program. Only Air Force within DOD centrally budgets and manages career programs. (Other Service's programs are decentralized to the lowest level and costs are spread among various base level accounts and are not visible.)

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Other Support Activities
I. NARRATIVE DESCRIPTION:

This activity group provides, in part, support for the Aerospace Audiovisual Service (AAVS). AAVS is a technical service of the Military Airlift Command which trains, programs, organizes, equips, and maintains the Air Force Visual Information (VI) documentation force and manages the VI documentation program, the Air Force production program, the central and regional, VI libraries VI support centers as requested by MAJCOMs; and provides other technical support to Air Force operations. In addition, this activity group provides for emergency and extraordinary expenses as determined by the Secretary of the Air Force; and supports Air Force personnel assigned to the White House and Executive Office of the President.

II. DESCRIPTION OF OPERATIONS FINANCED:

The funds requested provide for civilian personnel, contractual services, supplies and equipment which support the Aerospace Audiovisual Service (AAVS). AAVS provides Visual Information (VI) support in the following areas:

- a. VI Documentation. AAVS maintains visual information documentation crews, both ground and aerial qualified, to accomplish documentation of significant Air Force operations, events, exercises, weapon tests, humanitarian actions, etc, for operational, historical, and public affairs purposes. Documentation media include still photography, motion picture, and video.
- b. Audiovisual (AV) Production Program. AAVS manages in-house and government-owned and contractor operated (GOCO) television, motion picture, interactive video disc, and slide-tape production activities in support of Air Force operational and training requirements. Additionally, AAVS manages the procurement of commercially produced off-the-shelf AV and VI productions.
- c. Air Force Central, Regional and Base VI Libraries. AAVS operates the central VI library which provides a worldwide distribution network for VI information and productions used to meet operation and training requirements. AAVS also manages regional libraries in Europe, Alaska, and in the Pacific, and operates base libraries for major commands as requested.
- d. DoD Motion Media Records Center. AAVS manages the DoD Motion Media Records Center. The Records Center holds film for all of the Services and OSD.

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Other Support Activities

e. VI Technology. AAVS provides consultation, engineering, and technical support in applying visual information systems and facilities to Air Force activities.

Funds are made available to the Secretary of the Air Force for emergency and extraordinary expenses.

Support is provided for Air Force personnel assigned to the White House and Executive Office of the President.

FORCE PROGRAM IX: ADMINISTRATION AND ASSOCIATED ACTIVITIES

ACTIVITY GROUP: Base Operating Support (BOS)
I. NARRATIVE DESCRIPTION:

This activity group provides resources for all Air Force office space in CONUS leased from the General Services Administration (GSA), including maintenance, repair, and other services. Also supported in this activity group are the civil engineering functions of the Air Force District of Washington (AFDW).

II. DESCRIPTION OF OPERATIONS FINANCED:

Funds provide base operating support as follows:

- A. Standard Level User Charges: Includes General Services Administration (GSA) charges for Standard Level User Charges (SLUC) inside and outside the National Capital Region; reimbursable charges including building alterations; standby electrical generator service, and special guard service inside the National Capital Region (NCR); and minor facility support for separate operating agencies.
- B. Maintenance and Repair: Includes personnel costs, transportation, rent, supplies and equipment for the maintenance and repair of real property facilities through organic or contractual effort.
- C. Minor Construction: Includes supplies, personnel, and contract costs for minor construction performed through organic or contractual effort.
- D. Operation and Utilities: Includes cost of production and distribution of basic utility services (electric, heating, refrigeration, air conditioning, sewage, and water).
- E. Other Engineering Support: Includes fire protection, snow removal, refuse collection, and custodial activities.
- F. Other: Finances all other activities concerned with administration of the management headquarters and associated support activities in the National Capital Region.

FORCE PROGRAM X: SUPPORT TO OTHER NATIONS

I. NARRATIVE DESCRIPTION:

The resources requested provide for support of units and activities providing the United States' share of support to the North Atlantic Treaty Organization (NATO); Supreme Headquarters Allied Powers Europe (SHAPE); Military Headquarters and Agencies, United Nations Command/US Forces Korea (UNC/USFK); as well as Headquarters, Republic of Korea/US Combined Forces Command (ROK/US CFC); North Atlantic Treaty Organization, Airborne Early Warning and Control (NATO AEW&C) program, and other international headquarters.

International Headquarters Agencies provide support to operations of the International Activities, Miscellaneous Support to Other Nations including Latin American Cooperation and civic action efforts, Management Headquarters-International and Management Headquarters Technology Transfer Functions which prevents the loss of US and Western technologies to potential adversaries. Air Force reviews and makes recommendations on all munition and strategic trade export license cases referred by the Departments of State and Commerce. This program element also provides for necessary USAF participation in the ongoing 15 nation Coordinating Committee (COCOM) Commodity Control List and Munitions List Reviews; development and maintenance of the Militarily Critical Technologies List; membership in steering and working groups and participation in other Technology Transfer activities. This program element grouping provides the Air Force portion of support to NATO, SHAPE, and other international activities.

The two phases of the NATO AEW&C program consist of support of (1) the aircraft acquisition and delivery phase, and (2) Main Operating Base (MOB) (Geilenkirchen) requirements for the Air Force personnel assigned to this program. The resources provided by the O&M portion of this program element support the U.S. activities as stipulated in the Multilateral Memorandum of Understanding (MMOU) of 1978, and in the Operations and Support (O&S) MOU of 1984. Section V of the MMOU states in part: "Participating governments will, in particular, provide free of charge on a reciprocal basis, normal government services related to activities occurring within their countries when requested by contracting officers as follows: quality assurance modification, inspection, contract administration services, acceptance testing, and certification." These costs are commonly referred to as "waivered" costs and require Congressional prior approval. Further, the O&S MOU requires that the U.S. provide funding for U.S. personnel assigned prior multinational NATO AEW&C force, including associated support at NATO Air Base Geilenkirchen. This support is in addition to the NATO common funded operations and support of the NATO AEW&C fleet.

II. DESCRIPTION OF OPERATIONS FINANCED:

! /

FORCE PROGRAM A SUPPORT TO OTHER NATIONS

The O&M costs of units and activities in support of Air Force participation in international military organizations specifically include administrative and operational expenses such as civilian salaries, travel of personnel, utilities, communications, office supplies, purchased services and purchased equipment.

Expenses thru 1984 for NATO ABW&C have been primarily in support of the acquisition phase. Geilenkirchen activities commenced on a limited scale in FY 1981 and were related to arrival of Air Force personnel at the base. Expansion of the program in FY 1982 was related to aircraft delivery and buildup of the operational forces at the base which continued through FY 1986. The continuing O&M costs specifically include operational expenses in support of military and civilian personnel working on the program, and include civilian salaries and allowances, travel, utilities, communications, supplies and equipment, and purchased services.

Also included are Foreign Military Sales Reimbursable Personnel who provide engineering, logistics, and quality assurance services to the United States.

FORCE PROGRAM X: SUPPORT TO OTHER NATIONS

ACTIVITY GROUP: International Headquarters Agencies

I. NARRATIVE DESCRIPTION:

Provides resources to support the operations of international management headquarters and associated activities, technology transfer functions, and miscellaneous authorized support to allied or friendly countries. This includes the Air Force portion of support to NATO (North Atlantic Treaty Organization); SHAPE (Supreme Headquarters Allied Powers Europe) and other international activities.

II. DESCRIPTION OF OPERATIONS FINANCED:

The costs of this activity group include civilian salaries and allowances, travel of military and civilian personnel, utilities, communications supplies, equipment, and purchased services in support of Air Force participation in international military organizations. Funds are also included to support Latin American cooperation, including people-to-people contacts essential for advancing USAF regional influence in an area hindered by limited security assistance funding and small numbers of USAF personnel. Beginning in FY 1988 the Air Force is also authorized to participate in civic action efforts in Third World countries, fund foreign countries' participation in joint military exercises with the U.S., and pay certain expenses of defense personnel of developing countries.

FORCE PROGRAM X: SUPPORT TO OTHER NATIONS

ACTIVITY GROUP: NATO Airborne Early Warning and Control (AEW&C) Program

I. NARRATIVE DESCRIPTION:

The NATO AEW&C program is a multinational endeavor that includes the purchase of 18 E-3A aircraft, modification of selected NATO Air Defense ground sites, and construction of a main base as well as forward operating bases. The O&M resources support the US activities as stipulated in both the Multilateral Memorandum of Understanding (MMOU) signed in December 1978 and in the Operations and Support Memorandum of Understanding (O&S MOU) for the NATO AEW&C Force signed in December 1984.

The Air Force provides the resources for "normal government services" such as quality assurance, inspection, contract administration services, etc., that are afforded the program free of charge by all participating nations as agreed in the MMOU. The Air Force also funds on a continuing basis the USAF military personnel assigned to the NATO E-3A Multinational Force and personnel in commands supporting the NATO AEW&C program. The funding in this activity group is separate and distinct from the annual US contribution to the international budget that funds operations and support of the NATO E-3A Multinational Force. (The US contribution is budgeted by the Army, acting as executive agent for NATO support.)

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources provide for support of the USAF military personnel assigned to the NATO E-3A Multinational Force, including their associated support at overseas locations. The Force will have completed its operational build-up by early FY 1987 with the completion of all NATO E-3A forward operating bases in FY 1986. FY 1987 will mark the first full year of operations with a full complement of operating bases. Other expenses are associated with close-out of remaining acquisition tasks and continued acquisition of NATO E-3 system enhancements approved by NATO authorities. These continuing costs include: administrative and operational expenses in support of military and civilian personnel working on the program (except System Program Office personnel), and include civilian pay, travel of military and civilian personnel, utilities, communications, supplies and equipment, and purchased services.

FORCE PROGRAM X: SPECIAL OPERATIONS FORCES

1. DESCRIPTION OF OPERATIONS FINANCED:

The primary mission of the United States Air Force Special Operations Forces (AFSOF) is to provide USCINCSOC and theater CINCs Special Operations forces capable of conducting long-range infiltration, exfiltration, resupply, and close air support missions to support contingency and wartime operations in pursuit of national objectives.

To execute special operations, forces are normally task organized and employed in small formations, capable of both supporting actions and independent operations, to enable timely and tailored responses through the spectrum of conflict. AFSOF may conduct or support unconventional warfare, counterterrorist operations, collective security, psychological operations, close air support, interdiction or other mission areas.

The resources requested permit the USAF to maintain AFSOF and to upgrade capabilities as new applicable technologies emerge and theater CINC requirements change. SOF is used as a force multiplier at all levels of conflict, in peacetime as well as in war. The utility of AFSOF is its component role in the overall SOF capability to execute national command authority taskings for unconventional, limited, or general war and for counterterrorism, counterinsurgency, psychological operations, and low intensity conflict.

FORCE PROGRAM XI: SPECIAL OPERATIONS FORCES

ACTIVITY GROUP: Special Operations Forces

I. NARRATIVE DESCRIPTION:

This activity group provides resources for Special Operations (SOF) activities. USAF Special Operations Forces provide infiltration, resupply and exfiltration of other Services and Allied unconventional warfare forces. These forces are the primary USAF support of USCINCSOC and theater Unified Commanders-in-Chief for unconventional warfare, psychological operations, and peacetime crisis response activities. Training is accomplished with numerous foreign countries to assure unconventional warfare and crisis response liaison supports. With AC-130 gunships, these forces provide armed reconnaissance and maritime/coastal surveillance, and other unconventional warfare operations. This group also includes the USAF Special Operations School, the Special Operations Photo Processing Cell (SOPPC), Special Operations Combat Control and Weather Squadrons/Teams/Detachments. Forces are positioned in each major military theater to be readily available for contingency or war plan operations.

II. DESCRIPTION OF OPERATIONS FINANCED:

Resources include Operation and Maintenance support for special operations weapon systems. Specifically excluded are Air Force centrally managed accounts for BOS, DPEM, RPMA, munitions, current mission MILCON and Class IV modification as well as special operations training aircraft. Also included are the associated costs specifically identified and measurable to the US Special Operations Command headquarters, the Air Force share of support for the Joint Special Operations Command, special operations wing headquarters, and special operations squadrons, teams and detachments.

HOW INDUSTRIAL FUNDS OPERATE

Industrial funds operate under the provisions of Section 2208, Title 10 U.S.C. These provisions authorize the Secretary of Defense to establish working capital fund for industrial-type and commercial-type activities providing common services within the Department of Defense. Each industrial fund activity has a charter defining the scope of operations to be performed at that activity. These charters are required to be approved by the Assistant Secretary of Defense (Comptroller) prior to the commencement of operations.

The Department currently has five industrial funds - Army, Navy, Marine Corps, Air Force and Defense. Each industrial fund is administered and managed by their respective Service or Defense Agency. Within each industrial fund, individual activities which perform similar functions are organized into activity groups. A management agency or command is designated to provide general direction and exercise oversight responsibilities for those activities within the group. Authority to incur costs, however, is vested with managers at each activity.

Air Force Industrial Fund activities are anticipated to receive customer orders totaling approximately \$5.6 billion in FY 1988 and \$6.0 billion in FY 1989. Approximately 84% of these orders are anticipated to come from Department of Defense activities. Other federal, state and local government agencies, as well as other parties, may purchase goods or services where appropriate and authorized by law. Functions performed by Air Force Industrial Fund activities include depot maintenance (aircraft, combat vehicle, and other depot maintenance efforts); transportation services (airlift), base services (real property maintenance), and laundry and dry cleaning.

Industrial fund activities receive their initial working capital through an appropriation or a transfer of resources from existing appropriations or funds. Industrial fund activities use these resources to initially finance the costs of goods and services provided to their customers. Subsequently, the industrial fund activities are reimbursed by their customers for the goods or services provided. Workload at industrial fund activities is generated by customer orders (requests for goods or services). Customers orders constitute obligations of ordering activity, and create a contractual (buyer-seller) relationship between the industrial fund activity and the customer.

Customer rates are established on a fiscal year basis. These rates are established at levels intended to recover costs plus applicable surcharges, if any, necessary to provide working capital to ensure continued operation of the fund. Once established, rates are stabilized (held constant) for the applicable fiscal year. This "stabilized rate" policy serves to protect appropriated fund customers from unforeseen

inflationary pressures as well as other cost uncertainties. In turn, this policy also reduces disruptive fluctuations in planned industrial fund workload levels and thereby permits more effective utilization of industrial fund resources.

Industrial funds operate on a break-even basis over the long term. Profits, when they occur, are disseminated through refunds. Similarly, losses are recouped through the collection of a payment (called a passthrough) equal to such losses. Refunding prior years' profits or collecting prior years' losses outside of the industrial fund rate structure permits rates to more nearly reflect anticipated costs and avoids distortions which might otherwise occur. Effective in FY 1988 refunds will be treated as transfers. They serve the same purpose; however, the budgetary impact and accounting treatment are different.

Estimated workloads, costs, manpower requirements, and customer rates for industrial fund activities are initially developed by local managers at each industrial fund activity. These estimates are reviewed and consolidated by the management agency or command responsible for the direction and oversight of the activity group. These consolidated estimates are then reviewed by the respective Service and the Office of the Secretary of Defense prior to submission to the Congress.

Congressional oversight of industrial funds is exercised both directly and indirectly. The congressional authorization and appropriation process permits the Congress to adjust the resource levels and programs of industrial fund customers. It also provides the Congress an opportunity to direct refunds or passthroughs between appropriated funds and applicable industrial fund activities. The Congress may also exercise oversight control by placing ceilings or limits on certain resources or types of expenses, or through the establishment or prohibition of policies or practices. These latter actions should be carefully considered so as not to unduly conflict with the desired business-like approach or to reduce the flexibility of industrial fund managers to respond to changes in workload, technology, or other market-related conditions.

The operation of activities under the industrial fund concept promotes a business-like approach to accomplishing certain complex and necessary Defense efforts. Cost accounting systems offer an effective means for identifying specific costs and thereby enhancing the capabilities of industrial fund managers and their customers to make more cost-effective decisions. Operation under the industrial fund concept results in a flexible system maximizing the use of financial manpower, and other resources required to efficiently respond to fluctuations in workload. The operation of industrial fund activities also permits consuming activities (customers) to budget for end products or services required rather than the component parts or efforts necessary to achieve those end products or services.

FY 1989 RATE CHANGES

DOD policy provides for industrial fund rates to be established at estimated cost plus a surcharge for the Asset Capitalization Program. Establishing rates which approximate costs aids individual program managers (customers) in making cost effective program decisions. Such decisions may involve selecting among alternative goods or services, selecting from competitive sources that provide similar goods or services, or selecting whether to purchase a new item or to repair an existing one.

Customer rates are established for each fiscal year. Once established, these rates are stabilized (held constant) for the entire applicable fiscal year. This "stabilized rate" policy serves to protect appropriated fund customers from unforeseen inflationary increases as well as other cost uncertainties. This policy better assures customers that they will not have to make program adjustments in order to pay for potentially higher than anticipated prices. In turn, this policy also reduces disruptive fluctuations in planned industrial fund workload levels and thereby permits more effective utilization of industrial fund resources.

Industrial funds operate on a break-even basis over the long-term. Profits, when they occur, are refunded. Similarly, when losses occur, they are recouped through the collection of an amount equal to such losses (a passthrough). Refunds and passthroughs, when required, generally are provided for between the applicable industrial fund activity group and their parent Service's Operation and Maintenance appropriation (the primary customer). Occasionally, however, when appropriations other than the parent Service's Operation and Maintenance appropriation represent major DOD customers, refunds may be made to other appropriations. (Transfers and passthroughs are discussed in more detail in the section entitled "Transfers and Passthroughs.")

Program managers make a number of decisions based on cost considerations. If stabilized rates charged by industrial fund activities vary significantly from estimated costs, decisions which may appear to be cost effective to program managers may, in fact, not be cost effective for the Air Force as a whole. The policy of returning profits through refunds and recouping losses through passthroughs, rather than through the rate structure, allows the Air Force industrial fund rates to more nearly reflect anticipated costs. This policy also avoids potential major perturbations in rate changes from year-to-year that might otherwise occur if profit and loss amounts were returned or recouped through the rate structure.

SUMMARY OF APPROVED FY 1989 AIR FORCE INDUSTRIAL FUND RATE CHANGES
(Change is from Approved FY 1988 Rate)

AIR FORCE INDUSTRIAL FUND:

FY 1989 Rate Change

Depot Maintenance Industrial Fund:	
Organic Operations.....	+3.7
Contract Operations.....	*
Aerospace Maintenance and Regeneration Center.....	+0.1
Laundry & Dry Cleaning.....	-9.7
San Antonio Real Property Maintenance Activity:	
Utilities.....	+0.2
Public Works.....	-0.5

* These activities will operate on a cost reimbursable basis in FY 1989. Customers will be charged actual costs rather than a stabilized rate. The change between amounts charged in FY 1988 and those to be charged in FY 1989 for this activity is +3.6%.

FY 1989 INDUSTRIAL FUND RATE CHANGES
(Change is from Approved FY 1988 Rate)

MILITARY AIRLIFT COMMAND (MAC):

	<u>FY 1989 Rate Change</u>
Cargo.....	+16.0
Passenger.....	+6.2
Special Assignment Airlift Mission (SAAM).....	+5.8 **
JCS Exercise Program.....	+5.8 ***
Training and Other.....	+21.7

** In order to discourage the use of SAAM services when other less costly alternatives are available, MAC charges a premium (above cost) for these services. The Congress has directed that this premium be absorbed by DOD customers. Consistent with that direction, funds for the payment of SAAM premiums will be excluded from amounts requested in the President's budget. The SAAM rate change of 5.8%, as shown above, excludes the SAAM premium. This change (+5.8%) is the rate that will be used in the President's budget. MAC, however, will continue to charge a premium for SAAM services during actual budget execution. The approved rate change for SAAM services in FY 1989, including the SAAM premium, is +15.8%.

*** Effective with FY 1989, MAC will establish separate rates for the JCS Exercise Program funded from the O&M, Defense Agency appropriation. (Currently this program is charged the same rate as SAAM customers.) Unlike charges for SAAM services, amounts charged for this program will not include a premium. Thus, the above rate change of 5.8% is the rate change for both budget presentation purposes and budget execution.

SUMMARY OF AIR FORCE INDUSTRIAL FUND
TRANSFERS (-) AND PASSTHROUGHS (+)

Retained Earnings - Congressional Action.....	-149.7		
Premium Rates for SAAM.....	-54.0		
ACP Surcharge Reduction.....		-17.4 *	
Airlift Service Industrial Fund.....	+7.6		
Federal Employees Retirement System.....	+19.4		
Total.....	\$-195.4	\$-17.4	\$ 5.0

* FY88/89 actions are transfers

The following tables and narratives summarize applicable transfers/passthroughs for the Air Force Industrial Fund:

Retained Earnings - Refunds in the President's Budget: During FY87 Industrial Fund profits were returned by refund to appropriated fund accounts while losses were recouped by a passthrough from appropriated accounts. The FY 1987 President's budget projected accumulated profits of \$18.7 million at the end of FY 1986. Accordingly, the President's budget provided for a refund of this amount in FY 1987. Effective in FY88 refunds will be treated as appropriation transfers.

Retained Earnings - Impact of Congressional Action: Based on its projection of profits in excess of those included in the Departments budget, the Congress directed refunds of \$149.7 million in FY 1987.

Premium Rates for Special Assignment Airlift Mission (SAAM): The Military Airlift Command's SAAM program allows customers to "lease" a MAC aircraft and crew for a specified mission. During FY 1987 MAC charged a premium rate for such leases. This premium, which is charged in order to discourage customers from leasing aircraft in a manner which would divert traffic from other regularly scheduled MAC flights, results in a profit. Since this SAAM profit can be foreseen, the President's budget provided for such profits to be refunded.

SUMMARY OF AIR FORCE INDUSTRIAL FUND
TRANSFERS (-) AND PASSTHROUGHS (+)

Airlift Service Industrial Fund: The FY 1988/FY 1989 President's budget provided for a passthrough of \$7.6 million to MAC's Airlift Service Industrial Fund in FY 1987. This passthrough was intended to offset the impact of payments previously scheduled, but not made, in FY 1986.

Federal Employee Retirement System (FERS): The FY 1988/FY 1989 President's budget provided a passthrough to offset the estimated additional costs associated with the new FERS program. These costs had not been provided for in the FY 1987 President's budget.

Department of the Air Force
Air Force Industrial Fund
Summary of Operations

Industrial Fund Functions: The Air Force Industrial Fund consists of four activity groups: the Airlift Service Industrial Fund, the Depot Maintenance Industrial Fund, Laundry and Dry Cleaning, and the San Antonio Real Property Maintenance Activity.

Airlift Service Industrial Fund: Provides airlift services both in support of peacetime efforts as well as those necessary for the wartime deployment of balanced fighting forces.

Depot Maintenance Industrial Fund: The Depot Maintenance Industrial Fund provides support for customers who order depot maintenance services. Services provided include authorized work in connection with the conversion, overhaul, repair, or alteration of aircraft and other equipment. Effective FY 1988, operations at the Aerospace Maintenance and Regeneration Center at Davis Monthan Air Force Base, Arizona were converted to industrial fund operations. This activity provides for the storage, reclamation, regeneration and disposal of aircraft and other equipment for all the Services.

Laundry and Dry Cleaning: Provides laundry and dry cleaning services for installations not adequately served by commercial facilities.

San Antonio Real Property Maintenance Activity: Provides base services for all Department of Defense facilities in the San Antonio, Texas area.

Budget Highlights: Airlift Service Industrial Fund (ASIF) tariffs increase in FY 1989 to permit the full recovery of anticipated FY 1989 costs. Due to DOD's stabilized rate policy and higher currently estimated FY 1988 costs than projected in the FY 1988/FY 1989 President's budget, a larger FY 1988 operating loss is anticipated to result. ASIF resources in both FY 1988/FY 1989 are considered adequate, although only marginally, to sustain continued airlift operations. The conversion of Special Air Missions, Medical Evacuation programs and certain MAC Headquarters functions to Operation and Maintenance funding in FY 1988 will reduce industrial fund costs approximately \$150 million per year.

Customer funding has been severely constrained in FY 1988, causing anticipated FY 1988 Depot Maintenance Industrial Fund customer orders to decrease approximately \$500 million below amounts previously estimated in the FY 1988/FY 1989 President's budget. Despite aggressive management action to reduce expenses, the Depot Maintenance Industrial Fund projects a \$100 million larger FY 1988 operating loss in the current budget than estimated in the FY 1988/FY 1989 President's budget.

Department of the Air Force
Air Force Industrial Fund
Summary of Operations

An aggressive plant and equipment modernization program continues to be an essential part of the FY 1989 budget. The FY 1989 ACP is a 60% reduction from FY 1987 levels and will limit Laundry and Dry Cleaning efforts. Laundry and Dry Cleaning customer rates decrease in FY 1989 reflecting a reduction in the size of its Asset Capitalization Program.

FY 1989 customer rates will enable San Antonio Real Property Maintenance Activity (SARPMA) to break-even in FY 1989. SARPMA's Asset Capitalization Program is budgeted at a constant level in FY 1988 and FY 1989, although each program is below the level estimated in the FY 1988/FY 1989 President's budget.

Department of the Air Force
Air Force Industrial Fund
Summary of Operations

Summary of Financial Operations:

	(Dollars in Millions)		
	FY 1987	FY 1988	FY 1989
Revenue *	\$6,154.9	\$5,408.5	\$7,061.3
Cost of Goods & Services Sold *	6,065.6	5,609.9	7,061.3
Revenue Less Costs	89.3	-201.4	-
ACP Surcharge	36.0	-	-
Refunds & Passthroughs (Net)	-195.4	-	-
Net Operating Results	\$ -142.1	\$ -201.4	\$ 0
Prior Year & Other Adjustments	49.5	-	-
Transfers and Passthroughs	-	-17.4	+5.0
Accumulated Operating Results	-100.9	-319.7	-314.7

* Includes amounts of \$1,010.7 million in FY 1989 paid from DOD Military Personnel appropriations. These amounts are included for illustrative purposes only. Actual revenue, cost, and rates, as well as, amounts reflected in DOD customer accounts, exclude amounts paid from Military Personnel appropriations.

Summary of Changes in Operations:

	(Dollars in Millions)		
	FY 1987	FY 1987	FY 1987
	Estimated	Actual	Variances
Revenue	\$6,315.2	\$6,154.9	\$ -160.3
Cost of Goods & Services Sold	6,083.2	6,065.6	-17.7
Revenue Less Costs	232.0	89.3	-142.6
ACP Surcharge	-36.0	-36.0	-

Net Operating Results	4.2	-142.1	-146.2

Department of the Air Force
Air Force Industrial Fund
Summary of Operations

Summary of Variances

	(Dollars in Millions)		Net
	Revenue	Costs	Operating Results
		Refunds and Passthroughs	
Depot Maintenance.....	\$-243.5	\$ -189.6	\$ -57.5
Airlift Service.....	+104.6	+182.1	-77.5
San Antonio Real Property Maintenance.....	-20.3	-9.9	-10.4
Laundry and Dry Cleaning.....	-1.1	-0.3	-.8
Total.....	\$-160.3	\$ -17.7	\$ -146.2

Depot Maintenance revenue and cost decreased due primarily to decreased demand (fewer customer orders) for contract depot maintenance and higher organic costs than expected. Airlift Service revenue and cost increased due to greater demand (increased customer orders) for passenger, cargo, and Special Assignment Airlift Missions and higher costs than projected. San Antonio Real Property Maintenance (SARPM) revenue and cost variances were due to uncertainty regarding their continued operation, and therefore, a slower pace of operations. Additionally, SARPM costs were slightly higher than anticipated. Laundry and Dry Cleaning revenue and cost variances are due to incorrectly including earnings for Keesler and Maxwell Air Force base laundries, which closed in FY 1986, in the FY 1987 estimate.

Department of the Air Force
Air Force Industrial Fund
Airlift Service Industrial Fund

Activity Group Functions: The Military Airlift Command (MAC) is the Department of Defense's single manager for airlift services and is responsible for maintaining a worldwide airlift system in a constant state of readiness. Accomplishment of this mission directly affects the readiness and sustainability of deployed forces throughout the world as well as the nation's ability to project forces quickly. Both the byproduct capability of readiness training programs and augmentation from the commercial Civil Reserve Fleet carriers are used to satisfy airlift requirements. The Airlift Service Industrial Fund is a management tool used by the Military Airlift Command to effectively and efficiently allocate this capability during peacetime. Financial flexibility is a key and vital feature of the Airlift Service Industrial Fund, serving as an effective mechanism for illuminating the financial consequences of day-to-day airlift management decision.

Activity Group Composition:

<u>Activity</u>	<u>Location</u>
Airlift Service Industrial Fund	Scott AFB, Illinois

Budget Highlights: Airlift Service Industrial Fund (ASIF) tariffs increase in FY 1989 to permit the full recovery of anticipated FY 1989 costs. Due to DOD's stabilized rate policy and higher currently estimated FY 1988 costs than projected in the FY 1988/FY 1989 President's Budget, a larger FY 1988 operating loss is anticipated to result. Because FY 1989 fiscal constraints preclude a passthrough to recoup estimated losses, the projected accumulated operating loss at the end of FY 1988 will not be recovered during FY 1989. ASIF resources in both FY 1988 and FY 1989 are considered adequate, although only marginally, to sustain continued airlift operations.

This budget reflects the conversion from industrial fund to Operation and Maintenance, Air Force appropriations in FY 1988, of operations of the Special Air Missions, Medical Evacuation programs, and certain MAC Headquarters functions. These conversions will reduce industrial fund costs of operation, and customer charges, by approximately \$150 million a year.

Summary of Purchases of Capital Assets:

The Airlift Service Industrial Fund does not participate in the Asset Capitalization Program. Equipment costing in excess of \$5,000 is purchased with appropriated fund at no cost to the Airlift Service Industrial Fund.

Summary of Airlift Operations: The Airlift Service Industrial Fund provides a number of different strategic and tactical combat airlift services with rates established independently for each type of service. A brief description and summary of operations is shown below for each of these services.

- Passenger Operations: Provides for the movement of military personnel, military dependents, retired personnel and authorized civilian personnel while in a permanent change of station, temporary duty, or other authorized travel status. Approximately 90% of passenger services are performed by commercial airlines, either on regularly scheduled commercial or charter flights. Estimated revenues and costs are shown below:

	(Dollars in Millions)		
	FY 1987	FY 1988	FY 1989
Revenue *	\$348.1	\$334.2	\$430.0
Cost of Passenger Services *	367.6	347.7	430.0

ACP Surcharge	0	0	0
Refunds & Passthroughs	+15.1	0	0
Net Operating Results	\$ -4.4	\$-13.5	\$ 0

* Includes amounts of \$ 77.0 million in FY 1989 paid from DOD Military Personnel appropriations. These amounts are included for illustrative purposes only. Actual revenue, cost, and rates, as well as, amounts reflected in DOD customer accounts, exclude amounts paid from Military Personnel appropriations.

Department of the Air Force
Air Force Industrial Fund
Aircraft Service Industrial Fund

- Cargo Operations: Provides for the movement of supplies, equipment, and other cargo over regularly scheduled channel flights. Approximately 80% of these cargo operations are accomplished by military aircraft. The remaining 20% of cargo operations are performed by commercial airlines which participate in the Civil Reserve Fleet program. Estimated revenues and costs are shown below:

	(Dollars in Millions)	
	<u>FY 1987</u>	<u>FY 1988</u>
Revenue *	\$582.9	\$523.8
Cost of Cargo Services *	596.3	575.6
Revenue Less Costs	\$-13.4	\$-51.8
ACP Surcharge	0	0
Refunds & Passthroughs	-50.7	0

		\$ 0

* Includes amounts of \$257 million in FY 1989 paid from DOD Military Personnel appropriations. These amounts are included for illustrative purposes only. Actual revenue, cost, and rates, as well as, amounts reflected in DOD customer accounts, exclude amounts paid from Military Personnel appropriations.

Department of the Air Force
Air Force Industrial Fund
Airlift Service Industrial Fund

- Special Assignment Airlift Mission: SAAM services are airlift services provided by the Air Force's Military Airlift Command (MAC). This service allows customers to "lease" a MAC aircraft and crew for a specified period of time or journey. MAC charges a premium rate for SAAM services. This premium is charged in order to discourage customers from using SAAM services in a manner which would divert traffic from other regularly scheduled MAC flights. Because this premium could be expected to result in a profit, the FY 1988/FY 1989 President's Budget provided for these profits to be transferred to various Operation and Maintenance appropriations. Actual experience, however, shows that MAC is experiencing significant losses in most areas of operations, including SAAM. Thus, the requirement for MAC to make these transfers has been waived. Waiving these transfers, however, has required various Operation and Maintenance appropriations to make program reductions in order to offset amounts previously intended to be funded from resources available through the transfer of SAAM profits.

During its review of the FY 1988/FY 1989 President's Budget, the Congress expressed a belief that precluding customers from budgeting for the SAAM premium would create an effective incentive for limiting the use of SAAM services in instances where less costly alternatives may be available. Accordingly, the Congress requested that SAAM premiums be absorbed by DOD customers and be excluded from DOD customer budget requests. The amended FY 1988/FY 1989 biennial budget complies with this guidance. Although MAC will continue to charge a premium for SAAM services, it's industrial fund budget excludes amounts associated with the SAAM premium. This exclusion is consistent with the treatment accorded appropriated fund budgets. Actual profits associated with the SAAM premium will be used to offset the need for pass-throughs, or will be merged with other profits to be transferred to appropriated funds, as applicable. Thus, transfers specifically associated with SAAM premiums will not be provided for subsequent to FY 1987.

Department of the Air Force
Air Force Industrial Fund
Airlift Service Industrial Fund

	(Dollars in Millions)	
	FY 1987	FY 1988
Revenue *	\$ 310.5	\$ 248.7
Cost of SAAM Services *	272.4	243.3
Revenue Less Costs	\$ 38.1	\$ 5.4
ACP Surcharge	0	0
Refunds & Passthroughs	-41.7	0
Net Operating Results	\$ -3.6	\$ 5.4
		\$ 0

* Includes amounts of \$134.4 million in FY 1989 paid from DOD Military Personnel appropriations. These amounts are included for illustrative purposes only. Actual revenue, cost, and rates, as well as, amounts reflected in DOD customer accounts, exclude amounts paid from Military Personnel appropriations.

- JCS Exercises: JCS Exercises are designated by the Joint Chiefs of Staff to maintain the MAC force operationally ready to provide the valuable training required for the Army, Navy, Marines and Air Force to meet their minimum requirements for war. The requirements and dollars are based on user forecast made annually at the JCS Exercise Planning Conference. Estimated revenues and costs are shown below:

	(Dollars in Millions)	
	FY 1987	FY 1988
Revenue *	\$ 187.7	\$ 182.3
Cost of JCS Exercises Services *	170.3	178.2

		\$ 0

* Includes amounts of \$103.5 million in FY 1989 paid from DOD Military Personnel appropriations. These amounts are included for illustrative purposes only. Actual revenue, cost, and rates, as well as, amounts reflected in DOD customer accounts, exclude amounts paid from Military Personnel appropriations.

Department of the Air Force
Air Force Industrial Fund
Airlift Service Industrial Fund

- Training and Related Operations: Includes Local Training Test and Ferry, International Aeromedical Evacuation Missions and Joint Airborne/Air Transportability Training. Local training provides aircrew training not obtainable on routine missions. Test and Ferry consist of flying aircraft to and from contractor facilities in conjunction with depot maintenance efforts. Joint Airborne/Air Transportability Training provides proficiency and other training in support of various military operations (exclusive of JCS Exercises). This joint training better insures the combat readiness of forces assigned to Unified commanders. Because mission and financial responsibility for such joint training is assigned to the Air Force, the Operation and Maintenance, Air Force appropriation represents the primary customer. International Aeromedical Evacuation efforts provide for international transportation of personnel for emergency and other medical reasons. Estimated revenues and costs are shown below:

	(Dollars in Millions)		
	FY 1987	FY 1988	FY 1989
Revenue *	\$381.1	\$275.6	\$620.2
Cost of Training Services *	358.5	313.6	620.2
Revenue Less Costs	\$ 22.6	\$-38.0	\$ 0
ACP Surcharge	0	0	0
Refunds & Passthroughs	-27.6	0	0
Net Operating Results	\$ -5.0	\$-38.0	\$ 0

* Includes amounts of \$294.1 million in FY 1989 paid from DOD Military Personnel appropriations. These amounts are included for illustrative purposes only. Actual revenue, cost, and rates, as well as, amounts reflected in DOD customer accounts, exclude amounts paid from Military Personnel appropriations.

Department of the Air Force
Air Force Industrial Fund
Airlift Service Industrial Fund

- Special Air Mission: Provides for special airlift requirements and services in support of the White House, Congress, and other high-level government official travel. This function was transferred to the Operation and Maintenance Air Force, appropriation in FY 1988. Actual revenues and costs for FY 1987 are shown below:

	(Dollars in Millions)	
	FY 1987	FY 1988
Revenue.....	\$ 44.2	\$ 0
Cost of Special Air Services.....	50.2	0

Department of the Air Force
Air Force Industrial Fund
Depot Maintenance Industrial Fund

Activity Group Functions: The Depot Maintenance Industrial Fund provides support for customers who order depot maintenance services. Services provided include authorized work in connection with the conversion, overhaul, repair, or alteration of aircraft, components, missiles, and other equipment. The Depot Maintenance Industrial Fund also performs manufacturing, development, and test work, and provides services and materiel to other activities. Beginning in FY 1988, the Depot Maintenance Industrial Fund was expanded to include the operations of the Aerospace Maintenance and Regeneration Center at Davis-Monthan Air Force Base, Arizona. This activity stores, reclaims, regenerates, and disposes of aircraft and other equipment for all DOD components.

Activity Group Composition:

<u>Activity</u>	<u>Location</u>
Ogden Air Logistics Center	Ogden, Utah
Oklahoma City Air Logistics Center	Oklahoma City, Oklahoma
Sacramento Air Logistics Center	Sacramento, California
San Antonio Air Logistics Center	San Antonio, Texas
Warner-Robins Air Logistics Center	Warner-Robins, Georgia

Support Center Pacific (Detachment of Ogden ALC)	Kadena Air Base, Japan

Department of the Air Force
Air Force Industrial Fund
Depot Maintenance Industrial Fund

Budget Highlights: Customer funding has been severely constrained in FY 1988, causing anticipated FY 1988 Depot Maintenance Industrial Fund customer orders to decrease approximately \$500 million below amounts previously estimated in the FY 1988/FY 1989 President's budget. Despite aggressive management action, such as slippage and re prioritizing of programmed depot maintenance, furlough of civilian employees and reduction of contract maintenance operations, to reduce expenditures, the Depot Maintenance Industrial Fund projects a \$100 million FY 1988 operating loss. Because FY 1989 fiscal constraints preclude a passthrough to recoup estimated losses, the projected accumulated operating loss at the end of FY 1988 will not be recovered during FY 1989.

Department of the Air Force
Air Force Industrial Fund
Depot Maintenance Industrial Fund

Summary of Financial Operations:

	(Dollars in Millions)		
	FY 1987	FY 1988	FY 1989
Revenue *	\$3,885.8	\$3,471.1	\$4,057.4
Cost of Goods & Services Sold *	3,830.6	3,585.2	4,057.4

Actual revenue, cost, and rates, as well as, amounts reflected in DOD customer accounts, exclude amounts paid from Military Personnel appropriations.

Department of the Air Force
Air Force Industrial Fund
Depot Maintenance Industrial Fund

Summary of Changes in Operations:

	(Dollars in Millions)		
	FY 1987 Estimated	FY 1987 Actual	Variance
Revenue.....	\$4,129.3	\$3,885.8	\$-243.5
Cost of Goods & Services Sold.....	4,020.2	3,830.6	-189.6
Revenue Less Costs.....	109.1	55.2	-53.9
ACP Surcharge.....	35.4	35.4	0
Refunds & Passthroughs (Net).....	-82.0	-85.6	-3.6
Inventory Adjustments.....	0	0	0
Net Operating Results.....	\$ -8.3	\$ -65.8	\$ -57.5

Revenue and expense variances in FY 1987 is primarily driven by a reduction in customer orders on contract maintenance and a slight increase on organic maintenance costs. Overall this reflects a reduction in actual customer orders. Customer orders and revenue decreased more than cost because approximately 25% of costs are fixed.

Department of the Air Force
Air Force Industrial Fund
Depot Maintenance Industrial Fund

Summary of Workload Indicators:

(Specific Unit of Measurement)
FY 1987 FY 1988 FY 1989

Meaningful Depot Maintenance workload indicators are extensive and are considered beyond the scope of a budget summary. These workload indicators are provided to OSD and the Congress through various depot maintenance management reports.

Department of the Air Force
Air Force Industrial Fund
Depot Maintenance Industrial Fund

Summary of Organic and Contract Depot Operations and Operations of the Aerospace Maintenance and Regeneration Center: The Depot Maintenance Industrial Fund finances both organic and contract depot maintenance services. These efforts include the repair, overhaul, and modification of aircraft, engines, missiles and exchangeable components. Effective with FY 1988, the Depot Maintenance Industrial Fund includes the Aerospace Maintenance and Regeneration Center. This activity performs the storage, reclamation, regeneration and disposal of aircraft and other equipment for all DOD components. Approximately 96% of the services provided by the Depot Maintenance Industrial Fund are provided to Air Force customers, primarily Operation and Maintenance appropriations (83%). The financial operations of each of these functions - organic depot maintenance, contract depot maintenance, and the Aerospace Maintenance and Regeneration Center - are discussed below.

- Organic Operations: Organic operations include those depot maintenance services performed by Air Force employees at five Air Logistics Centers, Support Group Europe, Support Center Pacific, and the Aerospace Guidance and the Metrology Center.

	(Dollars in Millions)	
	FY 1987	FY 1988
Revenue.....	\$2,522.9	\$2,170.0
Cost of Goods & Services Sold *	2,467.7	2,284.1
Revenue Less Costs.....	\$ 55.2	\$ -114.1
ACP Surcharge.....	35.4	0
Refunds & Passthroughs (Net).....	-85.6	0
Net Operating Results.....	\$ -65.8	\$ -114.1

* Includes amounts of \$ 40.4 million in FY 1989 paid from DOD Military Personnel appropriations. These amounts are included for illustrative purposes only. Actual revenue, cost, and rates, as well as, amounts reflected in DOD customer accounts, exclude amounts paid from Military Personnel appropriations.

Department of the Air Force
Air Force Industrial Fund
Depot Maintenance Industrial Fund

- Contract Operations: Contract operations include those depot maintenance efforts performed by the private sector through contracts with various Air Logistics Centers. The Air Force finances these efforts through its industrial fund activities, rather than directly from appropriated funds. Estimated financial operations are summarized below:

	(Dollars in Millions)		
	<u>FY 1987</u>	<u>FY 1988</u>	<u>FY 1989</u>
Revenue.....	\$1,362.9	\$1,279.2	\$1,508.4
Cost of Goods and Services Sold.....	1,362.9	1,279.2	1,508.4
Revenue Less Costs.....	\$ 0	\$ 0	\$ 0

- Aerospace Maintenance and Regeneration Center Operations: The Aerospace Maintenance and Regeneration Center previously operated as an appropriated fund activity within the Operation and Maintenance, Air Force appropriation. This activity, which provides storage, reclamation, regeneration and disposal of aircraft and other equipment for all Services, was converted to an industrial fund activity effective with FY 1988. Estimated financial operations are summarized below:

	(Dollars in Millions)		
	<u>FY 1987</u>	<u>FY 1988</u>	<u>FY 1989</u>
Revenue.....	\$ 0	\$ 21.9	\$ 22.6
Cost of Goods and Services Sold.....	0	21.9	22.6
Revenue Less Costs.....	\$ 0	\$ 0	\$ 0

Department of the Air Force
Air Force Industrial Fund
Laundry and Dry Cleaning Service

Activity Group Functions: The seven worldwide Air Force Government-owned and Government-operated laundry and dry cleaning plants provide services to government activities and authorized individuals at costs that are competitive with commercial facilities.

Activity Group Composition:

<u>Activity</u>	<u>Location</u>
Eglin Air Force Base	Florida
Loring Air Force Base	Maine
Clark Air Base	Philippines
Kadena Air Base	Okinawa (Japan)
Lajes Air Base	Azores
Torrejon Air Base	Spain
Incirlik Air Base	Turkey

Budget Highlights: Approximately 82% of new customer orders for the Laundry and Dry Cleaning Service come from Department of Defense customers. The balance of 18% is from authorized individuals. Types of service include basic laundry and dry cleaning, clothing alteration and tailoring, and coin operated laundry and dry cleaning facilities.

An aggressive plant and equipment modernization program is an essential part of the 1989 budget. Equipment and real property, which are largely of World War II origin, will be replaced or rehabilitated through the Asset Capitalization Program and minor construction projects. Capital outlays will be primarily for state of the art items and systems, such as cleaners, pressers, washers and heaters, which will improve workplace ergonomics, reduce energy consumption, increase productivity and reduce costs. The FY 1989 ACP program is a 60% reduction from FY 1987 levels and will limit Laundry and Dry Cleaning efforts. Laundry and Dry Cleaning Service customer rates decrease in FY 1989 reflecting a reduction in the size of its Asset Capitalization Program.

San Antonio Real Property Maintenance Activity

Activity Group Functions: The San Antonio Real Property Maintenance Activity is designed to provide professional and economical civil engineering support to all DOD installation in the San Antonio, Texas area. Included in these services are both the operation and maintenance of bases and the procurement and sale of utilities, as well as the maintenance of utility systems.

Field engineers provide real property maintenance and civil engineering services to the above installations, as well as Camp Bullis, the 22nd Army Reserve Training Center, the Department of Interior for the San Antonio Missions' National Historic Park, and certain nonappropriated fund recreational facilities located at Canyon Lake, Medina Lake and LBJ Lake.

Activity Group Composition: The San Antonio Real Property Maintenance Activity is a single activity with six field engineers located at the following installations in the San Antonio, Texas area:

Randolph Air Force Base
Lackland Air Force Base
Brooks Air Force Base

Kelly AFB, Texas
Fort Sam Houston, Texas
Wilford Hall Medical Center

Budget Highlights: FY 1989 customer rates will enable San Antonio Real Property Maintenance Activities (SARPMAs) to break-even in FY 1989. SARPMAs' Asset Capitalization Program is budgeted at a constant level in FY 1988 and FY 1989, although each program is below the level estimated in the FY 1988/FY 1989 President's budget.

Equipment purchases will be for new, state-of-the-art items, as well as badly needed replacements. Assets which increase productivity and reduce cost significantly will be given high purchase priority. The objective is to maintain a modern plant capable of meeting the needs of our customers.

Department of the Air Force
